Budget Message

By

GOVERNOR GOODWIN J. KNIGHT

1955-56 Budget

To the Senate and Assembly of the Legislature of California:

In conformity with Section 34, Article IV, of the Constitution, I submit to you the Budget for the State of California for the Fiscal Year ending June 30, 1956. It is a realistic budget of the needs and obligations of our growing, forward-looking State. It is a budget which continues to call for strict economy in state expenditures without sacrificing the quality of essential services. It is again a budget with more than half its outlay devoted to the State's assistance to counties, cities, and school districts largely under fixed and continuing appropriations.

In formulating this budget I have complied with the spirit and the letter of the Constitution, which requires the Governor to submit to the Legislature a complete plan of all expenditures of the State and of all estimated revenues and which makes this further mandate:

“If the proposed expenditures for the ensuing fiscal year shall exceed the estimated revenues therefor, the Governor shall recommend the sources from which the additional revenue shall be provided.”

The expenditure requirements for the ensuing year are estimated at \$1,529,768,426. Following is a comparison with the last completed year and the current year:

	<i>Millions of dollars</i>		
	<i>Actual</i>	<i>Estimated</i>	<i>Proposed</i>
	<i>1953-54</i>	<i>1954-55</i>	<i>1955-56</i>
State Operations -----	\$346.9	\$376.6	\$414.5
Capital Outlay -----	286.9	313.3	292.9
Local Assistance -----	747.6	783.4	822.4
Totals -----	\$1,381.4	\$1,473.3	\$1,529.8

I shall first discuss the more important elements of the expenditure estimates under the three major divisions of State Operations, Capital Outlay, and Local Assistance.

STATE OPERATIONS

The expenditures for State Operations are based on the policy of making every effort to serve a growing population without increasing costs. In general, increases are limited to those made

absolutely necessary by heavier work. Improvements in services are provided in a few cases where there is a strong showing that more effective programs will produce economy in the long run.

Mental Hygiene

Mental Hygiene is the principal example of a department for which provision is made for an orderly program of improved treatment, with the objective of more rapid cures and shorter hospitalization, resulting in greater long-term economy. Support appropriations recommended for the Department of Mental Hygiene amount to \$70,890,813, an increase of \$7,096,372, or 11.1 percent over the current year. There will be an estimated average of 48,462 patients in its 14 hospitals during the year, which is 3,000, or 6.6 percent more than this year's number. Provision is made for staffing new wards and treatment centers and for general improvements in the nursing and medical staffing of hospitals.

Education

State Colleges

One of our largest and most important budget problems for next year and for a good many years beyond is that of meeting the needs of higher education. A dramatic increase in birth rate, beginning about 20 years ago, together with heavy in-migration, which has already swollen attendance in the elementary and secondary schools, is now having greater and greater effect on the enrollments in our state colleges and university. For next year enrollments will increase from 34,461 to 38,181, or 10.8 percent in the state colleges. During the current year enrollments in the state colleges will exceed this year's budget estimates by more than 3,400 students. With relatively small augmentation from the additional students' fees, this 10 percent overload will be carried in the current year without increased appropriations. For the ensuing fiscal year provision is made for relief from this overload and for the anticipated further increase in enrollments. The forecast of enrollments is believed to be a reasonable estimate of the number of qualified students, under new admission rules, who can be accommodated within available facilities and with the additions to teaching staffs which can be recruited. Accordingly appropriations for the state colleges are proposed at \$25,661,010. This is an increase of 14.4 percent over the current year, in face of the estimated increase in enrollment of 10.8 percent. The more valid comparison, however, is with the appropriations and enrollments of 1953-54. The increase over that year will be \$5,893,389, or 29.8 percent, while the increase in enrollments will be 28.0 percent.

University of California

The estimated increase in enrollments on the eight campuses of the University of California, while less than that forecast for the state colleges, is nevertheless substantial. The university expects an enrollment in 1955-56 of 36,651 students, an increase of 7.4

percent over the current year and 12.9 percent over 1953-54. The Regents and the President of the University have presented what I believe to be a very carefully and conservatively planned budget which calls for a state support appropriation of \$62,539,152, an increase of 4.1 percent over the current year. I am recommending this budget to you without change.

During the 1954 Budget Session, consideration was given to the possible use by the regents of some \$13,000,000 in reserve funds which the university had accumulated from federal reimbursements for overhead costs on research projects and from accumulated savings. It was the final conclusion of the Legislature that the regents could apply \$3,300,000 of these funds to meet its requirements for the current year. It now appears that only \$1,500,000 of these funds will be needed for current expenses. The regents have allocated the remainder of the \$13,000,000, plus some further accretions, to a program of constructing students' residence halls and other capital outlay which will produce future income.

Corrections

The support appropriations for the Department of Corrections are recommended at \$23,811,703, an increase of \$2,664,369, or 12.6 percent. Average inmate population is estimated at 16,450 for the ensuing year, an increase of 7.4 percent over the current year.

Additional facilities will be manned at Vacaville, at Tehachapi which is now a rehabilitated unit for men, and at the temporary colony near San Luis Obispo which will reduce overcrowding in the other prisons.

Our prisons are growing at a rate substantially greater than the 3 percent annual increase in total population. We are undertaking a comprehensive study of crime incidence, probation, term fixing and parole policies, with the objective that sound measures may be found to stem the trend of increasing prison costs.

Youth Authority

The Department of the Youth Authority will require a total support appropriation of \$9,257,885, an increase of 9.4 percent over the current year, which is at almost exactly the anticipated rate of increase in the number to be committed to the four schools for boys and the two girls' schools.

Alcoholic Beverage Control

The support appropriation proposed for the new Department of Alcoholic Beverage Control amounts to \$2,950,934 for 1955-56 which will be the first full year of operation of the new department. I am giving my full and hearty support to a strong, effective, equitable administration of this important responsibility. I am hopeful that after the first year's experience under the new concept, economies will be developed which will permit us to operate this department at a smaller cost to the State.

Fish and Game

The support expenditures for the Department of Fish and Game are recommended at \$7,757,622, an increase of 3.4 percent, which is the amount needed to maintain the present level of services and staffing. There is a serious need to bring the Wildlife Protection Branch of the department up to essential standards. The staff of wardens and patrol captains has failed to keep pace with the tremendous increase in the number of hunters and anglers. I believe it is most important that the existing fish and game be more adequately protected.

Under present law the department's operating expenses are paid out of the Fish and Game Preservation Fund made up principally from angling and hunting license fees. In spite of the heavy increases in licenses, the fund has not been able to keep pace with greater costs, due principally to the rise in price and wage levels. I do not believe it advisable to use General Fund moneys for this purpose, and since hunting and angling license fees are already at rates generally in line with those of other states, we should look to other sources of financing the needed increase in the Wildlife Protective Services. I suggest as a possible source, a portion of additional revenues from horseracing, which I will discuss more fully later in this message. One other possibility would be a modification of the formula by which present horseracing revenues are allocated, to the end that a small portion of the money going to fairs might be allocated to the Wildlife Protection Service.

There is a need also for developing projects which will make more hunting and fishing opportunities available to the public, which I will discuss under Capital Outlay.

Highway Patrol

The Highway Patrol will require \$19,380,606 for its support in 1955-56, an increase of \$2,062,937, or 11.9 percent, which is mainly for an augmentation in manpower of 270 additional patrolmen. The force should be increased still further to make it adequate to meet present day highway enforcement needs, but 270 appears to be the number of well qualified men that can readily be recruited and trained in one year.

Salary Increases

The Legislature has wisely enacted laws which contemplate salary rates for employees of the State comparable to those in private industry and other governmental jurisdictions, based on the principle of like pay for like work. You have also established a procedure whereby the State Personnel Board reports each year to the Governor and to the Legislature the findings of its survey of prevailing pay rates. The Personnel Board has reported that salaries in the state service are lagging behind those in private industry and other governmental jurisdictions to the extent that an increase averaging 5 percent is fully justified for the ensuing

fiscal year. Provision is made in the budget for the amounts necessary to meet such an increase. California has a tradition of high standards in the personnel of its State Government, and maintaining proper pay levels is an important element in continuing such high standards. I heartily recommend the approval of the proposed salary increase item.

Included also is provision for adjusting the salaries of department heads and members of boards and commissions whose salaries are fixed by statute. The Assembly Interim Committee on Civil Service and Personnel has recently made recommendations for moderate increases in these statutory salaries, which in my opinion are overdue and fully justified. Amounts to finance them are included in the proposed appropriation for salary increases.

All of these salary increases will require \$11,306,480 from the General Fund, \$4,730,968 from special funds and \$2,193,697 from trust and utility funds.

Total State Operations

Over all, the total proposed expenditures for State Operations aggregate \$414,515,174, a net increase of \$37,924,588, or 10.1 percent, which includes the proposed 5 percent salary increase as well as a recommended emergency fund of \$1,500,000. Your careful analysis will show that expenditures proposed for State Operations are determined on a strictly economical basis.

CAPITAL OUTLAY

The budget for capital outlay may be divided into three main parts: (a) the highway construction and improvements program, (b) the state building construction program, and (c) the beach and park program.

Highway Construction

The highway construction program for 1955-56, as proposed in this budget, contemplates continuing the present 6 cents per gallon motor vehicle fuel tax and the other related increase in highway user revenues enacted in 1953. Unless affirmative action is taken by the Legislature at this session, present rates will expire June 30, 1955. I have the firm conviction that the present level of highway user taxes should be maintained in order to continue at existing rates the good progress which is being made in eliminating critical deficiencies in our State Highway System. I have asked the Highway Commission to include in the budget program projects amounting to approximately \$25,000,000 which, unless the present rates are continued, must be eliminated from this budget. I feel sure that the people of our State are quite willing to pay these higher rates in order to avoid what would otherwise be long delays in meeting the highway deficiencies throughout the State.

State Building Construction Program

In response to the need for long-term planning for the building construction requirements of the State and in line with one of the resolutions of your last special session, I appointed an advisory committee of department heads to assist in developing a long-term appraisal of construction requirements and a five-year program of projects to meet those requirements. This committee has submitted a preliminary report which is now in process of refinement for submission to the Legislature through the Director of Finance. It will present a well-considered and conservative appraisal of needs in terms of projected student enrollments in the university and in the state colleges, patients to be treated and cared for in our state hospitals, admissions to our adult correctional institutions and youth training schools, and other requirements. It will present a schedule of thoroughly justified projects which must be constructed in the next five years in order to meet these projected needs.

The five years immediately ahead are critical ones since needs will grow at rates much greater than the population and the anticipated expansion in the economy and tax base. Our population is growing at the rate of approximately 3 percent annually and, assuming no significant boom or depression, we can conservatively expect our tax base to increase at substantially the same 3 percent rate. Compared to this, however, we must face increases in college and university enrollments approximating 10 percent per year and increases in our hospitals and correctional institutions of almost 5 percent annually. Our five-year building construction program will call for outlays of more than \$400,000,000. Fortunately, the Legislature wisely provided for reserving for Capital Outlay purposes the General Fund's share of the impounded tideland oil royalty funds when the federal title question was favorably terminated. This amounts to approximately \$37,000,000 which, together with savings through economies in previous construction and planning and a recommended augmentation of \$16,000,000 from the General Fund, will provide a budget of \$63,000,000 as next year's part of the Capital Outlay program.

As you will see from the more detailed analysis in the Capital Outlay part of the budget, the following, in round numbers, are the principal components of next year's program:

University of California.....	\$8,700,000
State Colleges	18,700,000
Mental Hygiene Hospitals.....	19,900,000
Adult Correctional Facilities.....	7,600,000
Youth Authority Facilities.....	2,000,000

This \$63,000,000 portion of the five-year program budgeted for 1955-56 contains the top priority projects which must be financed now to meet unquestioned needs. There remain more than

\$300,000,000 in projects which must be undertaken in the subsequent four years ending with Fiscal Year 1959-60 to provide the facilities which, under conservative estimates, will be badly needed because of further increases in students, patients, correctional cases and other requirements. Some part of this future outlay should be financed each year from current funds. There is no prospect at this time, however, of there being sufficient current revenues to defray this entire program. Accordingly I recommend for your consideration the submission to the voters of a proposed bond issue of approximately \$200,000,000 to help finance the remainder of the five-year program. The proceeds should be made subject to specific direction by the Legislature as to projects to be undertaken and should be available to augment what current revenues we may be able to devote to capital outlay during this period. Our State enjoys a high credit rating and we may anticipate a low interest cost for such a bond issue. Generally I am a strong advocate of a pay-as-you-go financing program for government expenditures. Here, however, we have an extraordinary need which would cause an excessive burden if raised by current taxes. I believe we have reasonable hopes that after having accomplished this five-year program of plant expansion the further requirements may be more nearly at the rate of expansion of the State's economy and tax base and may therefore be financed from current revenues.

Fishing and Hunting Access Roads and Trails

There is a great need for making certain coastal and inland fishing waters and certain hunting areas available to public use which are not available because of the absence of access roads and trails. I recommend that a program for such projects be authorized, to be financed from the additional revenues to be derived from horse race wagering or from a reallocation of a portion allocated to fairs. I understand that a great deal could be accomplished for an amount not to exceed \$2,500,000.

Beach and Park Program

Capital outlay is recommended for the Division of Beaches and Parks in the amount of \$2,400,000. The program recommended for this year is limited primarily to expanding existing facilities so as to provide more public accommodations.

The Public Resources Code has since 1943 earmarked 70 percent of the receipts from royalties on tideland oil operations for state beach and park purposes. During the time these moneys were impounded pending the settlement of the question of title raised by the Federal Government, the General Fund advanced moneys for beach and park capital outlay purposes and acquisitions were confined to those which could be financed from the \$15,000,000 appropriation made in 1945. When the tideland dispute was settled and the impounded moneys released in September, more than \$32,000,000 was paid into the State Beach and Park Funds. These amounts, however, are not available for expenditure until appropriated by the Legislature. The State Park

Commission has developed a recommended five-year program of beach and park acquisition and development which would consume all of these funds. Before such a program can be undertaken, however, some basic policies must be decided by the Legislature, among which are: (1) whether we should continue the requirement that all state moneys for acquisition of beaches and parks be matched by local or private interests; and (2) whether the future beach and park program should be geared to tideland oil production. I question if there will be time during this session for a thorough consideration of these policies. The wiser course, in my judgment, is to make a comprehensive interim study of the whole matter, meanwhile carefully preserving these moneys for future use.

LOCAL ASSISTANCE

As was previously indicated, more than half, in fact \$822,394,-552, or 53.8 percent of the total expenditures for the next fiscal year are required for assistance to local units of government. The largest part of this sum will go for the State's share of the support of the public school system, which will amount to more than \$469,-000,000 an increase of \$33,000,000, or 7.6 percent, over the current fiscal year. Here again is an element in our budget which will increase at more than twice the rate of our total population growth, not only next year but for all foreseeable years in the future. Let me make it clear that I am a strong supporter of a sound, up-to-date program of public education. The whole future of our State depends upon such a program. I am directing special attention to these costs not in criticism of our system of free public education but rather with the purpose of strengthening our financial support for it.

The above amount does not provide for continuing child care centers for which the State will spend approximately \$3,800,000 during this current year. Provision is not carried forward into the budget for next fiscal year because in the 1953 act the Legislature made clear its position that in its present form the program for child care centers was considered to be a war condition measure which should expire at June 30, 1955, the end of the present year. I am not opposed to a permanent program of child care centers if the Legislature should see fit to enact the required basis for such a permanent program with appropriate sharing of costs between the local school districts, the participating parents, and the State.

Other programs of local assistance, including those for Public Health, Social Welfare, and Flood Control, are included at substantially present levels.

REVENUE DEFICIENCY

This State is in a sound financial condition and enjoys a top credit rating. It is essential to the entire economy of California that the solvency of the State Government be maintained and its

good credit be preserved. To carry out this responsibility we must face up to a simple, hard fact: The State Government, largely through direct vote of its citizens, is committed to an expenditure program which calls for more money than our present revenue system will produce. In Fiscal Year 1952-53 General Fund expenditures exceeded revenues by \$23,286,000; in Fiscal Year 1953-54 the deficiency was \$46,000,000. For the current, 1954-55, Fiscal Year, under the revised estimate the deficiency will be \$52,000,000.¹ The expenditures as estimated in this budget for 1955-56 will exceed estimated revenues by \$99,900,000. (This deficiency is actually \$147,000,000 if we take our capital outlay budget into account and consider the use of the tideland oil royalties funds and other accumulations in the Capital Outlay and Savings Fund amounting to \$48,000,000.) When we apply our carry-over surplus of \$30,721,433 we are faced with a net deficiency of \$69,213,088 for next year.

It is significant that this revenue shortage is very nearly the amount of next year's cost of the added State's school support voted by Proposition 2 in November of 1952. The amendment under that proposition raised the State's school support from approximately \$147 per year per pupil to the present \$180. This increase of \$33 per unit of attendance, when multiplied by the total attendance of 2,375,000, gives us a cost of \$78,375,000 for next year. We have postponed the financing of the added cost of this measure from year to year by meeting it out of accumulated reserves. We cannot postpone longer the unpleasant responsibility of increasing revenues without jeopardizing the State's solvency. True, by exhausting all reserves, one more year's expenditures could be met. This would be unsound fiscal management. It would leave the State without any cushion whatever to meet even a small business slump or a slight failure to forecast revenues accurately. Moreover the deficit which would face us in the 1956 30-day budget session in financing the 1956-57 budget would be staggering as will be seen from the following forecasts:

GENERAL FUND		
	<i>(Millions of dollars)</i>	
	1955-56	1956-57
Estimated revenues, present laws--	\$845.7	\$871.0
Estimated expenditures		
State operations -----	\$300.2	\$315.0
Capital outlay -----	15.9	25.0
Local assistance -----	629.5	669.0
Total expenditures -----	\$945.6	\$1,009.0
Current deficiency -----	—\$99.9	—\$138.0

¹ At the close of the 1954 Budget Session the deficiency was estimated at \$82,000,000. A slight apparent improvement in revenue yields, together with savings in expenditures brings about this revised estimate.

Without additional revenues at this point the only alternative would be the registration of warrants. It must be remembered also that our revenues are closely geared to economic conditions. The above projections assume a moderate increase in business volume and income. A slump of as much as 10 percent would shrink revenues by more than 80 million dollars per year.

I have said repeatedly that a sound public finance program neither incurs heavy deficits nor piles up large, unneeded surpluses, and that I would oppose increasing taxes while huge reserves were still on hand. It can readily be seen, however, that we are reaching the end of heavy reserves and that we need look only one short year into the future to see that we are headed for insolvency unless some action is taken to put our budget into balance.

The obvious first approach in dealing with an unbalanced budget should be toward reducing expenditures. The budget I am submitting has been carefully reviewed as to controllable expenditures. More than two-thirds of the General Fund budget is composed of fixed charges provided by the Constitution or continuing appropriations. Most of this is for support of schools, and for old age assistance, aid to needy children, and such outlays. The people have repeatedly given their support to these programs, and we know full well that no significant reductions can be made in this part of the budget.

A large part of the remaining one-third is taken up with operating our state hospitals, prisons, and other functions where there is small possibility of substantial reductions without serious lowering of standards. I am confident you will find the budget I am submitting is a sound and tight one on controllable expenditures. A realistic and objective analysis will demonstrate that even the most stringent and arbitrary budget cutting could not meet the deficits with which we are faced.

I am accordingly recommending as the most sound and prudent course of action, first, a further use of reserves—but not their complete exhaustion—and, second, a moderate augmentation of revenues.

I propose that the General Fund carry-over surplus amounting to \$30,721,000 be used directly to meet General Fund expenditures and that the entire balance in the Capital Outlay and Savings Fund (a holding reserve derived from General Fund sources) be applied to 1955-56 Capital Outlay indirectly relieving the General Fund by \$48,631,000. This balance was made up of oil royalty payments of \$37,055,000 and savings from prior year Capital Outlay appropriations of \$11,576,000.

This would leave the Revenue Deficiency Fund (the “rainy day” fund) intact to be available both as a revenue deficiency cushion in a future year and as a fund for disaster relief in case of extreme emergency.

As the second part of the plan I recommend that steps be taken at this session to adjust our revenue system to bring income more

nearly into line with required expenditures by the adoption of the following measures:

Increase Excise Tax on Alcoholic Beverages

California's tax rate on distilled spirits is one of the lowest in the Nation at the present rate of 80 cents a gallon. The national average of such state taxes is more than \$1.60 a gallon. I recommend that the rate be increased to \$1.50 a gallon.

The state excise tax on beer at 2 cents per gallon is even further out of line with the rates in other states. The median rate is 6.75 cents per gallon. I propose a moderate increase to 4 cents a gallon.

Tax on Cigarettes and Tobacco Products

California is one of seven states which do not levy a tax on cigarettes or other tobacco products. Forty-one states and the District of Columbia now employ either a cigarette tax or a tobacco tax. The rates vary from a low of 2 cents per package on cigarettes in 4 states to 8 cents per package in one state. The prevailing rate is 3 cents per package. I recommend the adoption of a cigarette tax at 3 cents per package with a comparable tax on other tobacco products.

Increased License Fees on Horse Racing

Horse racing continues to be a lucrative enterprise which should, without undue burden either to the wagerers or the track owners, be taxed at moderately increased rates. I propose that the over-all commissions on betting pools be increased by 1 percent, from 13 percent to 14 percent, with a corresponding increase in the license tax; that at the same time a surtax be placed on the track owners which will place a heavier tax on the higher brackets of net income.

Following is an estimate of the yields from these additional tax sources:

	<i>1955-56</i>	<i>Full year</i>
Distilled spirits excise tax, from 80¢ to \$1.50 per gallon-----	\$11,700,000	\$14,000,000
Excise tax on beer increased from 2¢ to 4¢ per gallon-----	3,000,000	3,600,000
Tax on cigarettes and tobacco products at 3¢ per package on cigarettes and 20% on other products -----	50,100,000	57,000,000
Horse-racing license fees and tax, 1% increase on wagers and surtax on profits-----	5,600,000	5,600,000
Total estimated yields-----	\$70,400,000	\$80,200,000

The above program for increased revenues in my opinion would involve the least onerous burden upon our citizens and would be an important step toward maintaining the solvency of our State Government and permitting it to carry out its obligations.

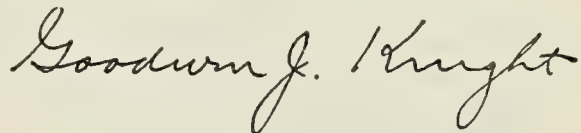

I share in the concern which many people have with the ever-growing cost of government. This is a matter which deserves the sober and thorough consideration of all good citizens. The danger is not only in the increasing burden of taxes; it is even more in the growing tendency to look to government, whether it be Federal, State or local, to solve problems which might better be accomplished by private initiative. We should undertake a campaign of public education with the objective of directing people's thinking toward a more careful counting of costs when new government programs and enterprises are under consideration. Generally our voters have used good judgment in voting on constitutional amendments and other measures. A greater assurance of wise action might be afforded, however, if the costs are fully disclosed when new measures are proposed.

While there has been a great increase in the State Budget since the last major change in our general tax system was made in 1935, the increase has not been at a greater rate than the growth in the total income of the people of the State.

In Fiscal Year 1936-37, State General Fund taxes amounted to \$3.28 for each \$100 of individual income in the State. In the current fiscal year the State General Fund tax levy will amount to \$3.17 for each \$100 of individual income. The additional levies which I am proposing would add about 30 cents to the \$3.17 average just quoted.

I submit this budget as a sound, equitable means of financing the important and widespread functions, activities and responsibilities of the State Government for the fiscal year ahead. I offer the full cooperation of my administration in aiding you in your consideration of this most important matter.

Respectfully submitted,

A handwritten signature in cursive script, reading "Goodwin J. Knight". The signature is written in dark ink and is positioned above the printed name of the Governor.

Governor

January 12, 1955

Letter of Transmittal

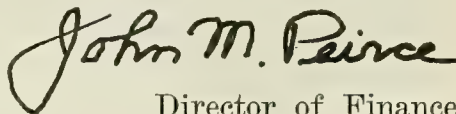

HONORABLE GOODWIN J. KNIGHT, *Governor of California*
State Capitol, Sacramento, California

DEAR GOVERNOR KNIGHT: Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year July 1, 1955, to June 30, 1956, compiled in conformity with your policies and instructions.

The revenue estimates were made after a careful appraisal of the economic situation in consultation with leading economists. Exacting review has been given to expenditure requirements to be sure that they are at the lowest amounts consistent with furnishing necessary services and meeting the State's obligations.

Again I wish to express appreciation for the cooperation received from department heads and staff members in the work of compiling this budget document.

Respectfully yours,

A handwritten signature in dark ink, reading "John M. Peirce". The signature is written in a cursive style with a large, stylized "J" and "P".

Director of Finance

January 12, 1955

Summary Statements

Schedule 1. General Budget Summary.

Schedule 1-A. Reconciliation of General Fund Accumulated Surplus as of June 30, 1955, as Estimated in the 1954-55 Budget with the Amount Estimated in the 1955-56 Budget.

Budget Revenue Estimates

Schedule 2. Comparative Statement of Revenues for the Fiscal Years 1953-54, 1954-55, and 1955-56.

Analysis of Expenditures, 1955-56

Schedule 3. Comparative Statement of Expenditures by Character, Function, Organization Unit and Fund for the Fiscal Years 1953-54, 1954-55, and 1955-56.

Schedule 4. General Fund, Statement of Financial Condition as of June 30, 1954.

Schedule 5. Summary of Fund Condition by Funds as of June 30, 1954, June 30, 1955, and June 30, 1956.

Budget Revenue Estimates

State revenue to be received during the 1955-56 fiscal year is estimated at \$1,362,187,237. Although this forecast counts heavily upon a gradual business recovery from the recession of 1953-54, total receipts will not constitute a new record in State financial history. That record is being established this year with the release of money impounded in the State and Federal treasuries during the controversy over ownership of the tidelands. Settlement of the issue has returned to the State \$66,728,680 in oil royalties accumulated since 1947. This large, nonrecurring item will carry revenue receipts during the current year to an estimated \$1,397,477,165, exceeding by a wide margin the record of any previous period.

During 1955-56, \$845,680,535 will accrue to the State General Fund and \$516,506,702 will go to the various special funds under these estimates. The General Fund total will be the largest ever received, exceeding the current total by \$18,654,089, or 2.3 percent. Among the principal developments expected are continued moderate advances in sales and both corporate and personal income tax collections; a greater volume of inheritance and gift tax receipts, growing out of higher security prices; essential stability in the insurance gross premiums tax after a period of spectacular increases; and a drop in interest income as the General Fund surplus is depleted.

With highway user levies maintained at present rates, receipts from motor vehicle taxes and fees will increase to approximately \$451,500,000 in the coming period from \$437,700,000 this year and \$415,700,000 in 1953-54. The only other change of major importance affecting special fund receipts is the drop in oil royalty revenue from the abnormal peak of the present year.

REVENUE COMPARISON

Totals, Special Funds	\$473,364	\$570,451	\$516,507
Grand Totals -----	\$1,271,447	\$1,397,477	\$1,362,187

Receipts during the three fiscal years covered by this budget are summarized in the accompanying table. Amounts for 1953-54 represent actual receipts

and those for 1954-55 are revisions of the estimates presented last year.

Effect of the recession upon 1953-54 revenue was unexpectedly large. Actual General Fund receipts of \$798,084,000 were \$13,981,000, or 1.7 percent, below the revised estimate and 0.5 percent below the original prediction made in 1952. At \$473,364,000, special fund receipts ran \$5,839,000, or 1.2 percent, less than the revised forecast, but greatly above the original estimate because of the increase in highway user tax rates.

The business recovery, coupled with receipt of oil royalties mentioned above, has led to a substantial revision of current year figures. The General Fund total is 3 percent above the original estimate and the special fund sum is higher by approximately 12 percent, all representing the oil royalty receipt.

ECONOMIC OUTLOOK

The direct relationship between general business conditions and state tax receipts must be emphasized at the outset of any discussion of the revenue outlook. Under California's tax system, State receipts depend chiefly upon sales volume, corporate profits, personal incomes, and motor vehicle ownership and operation. As the pace of business quickens, tax collections increase, and as business volume lags, State receipts decline. In some levies the reaction is almost immediate, but in others the change in revenue flow may be delayed many months. Consequently, a careful analysis of economic conditions and an appraisal of the short-term business outlook are essential first steps in revenue estimating.

A comparatively mild recession has characterized the national economy since mid-1953. Gross production of goods and services declined from a \$370 billion level in the second quarter of that year to \$355 billion in the third quarter of 1954. As last year drew toward its close there were several indications of economic recovery, and it appears that construction activity and personal consumption expenditures, both pillars under the 1954 economy, will combine to carry the nation a substantial step toward a record breaking output in 1955. The strength provided by these important positive factors will be buttressed by the absence of two elements of weakness operative during 1954—inventory liquidation and a substantial decline in defense expenditures. Indeed, inventory liquidation should change to inventory accumulation, adding another source of strength to the developing economic pattern.

In the following brief analysis, four broad segments of the nation's economy are considered: consumer expenditures; residential construction and business investment in plant and equipment; net foreign trade; and government purchases of goods and services. As in other recent years, governmental expenditures appear to be the most certain of these four

segments. For 1955 at least, they also seem to promise the greatest stability.

The sharp reduction in expenditures for national security has been one of the outstanding recent developments in the nation's economy. From an annual rate of more than \$54 billion at the end of the Korean War, the cost of defense and security will be trimmed to approximately \$43 billion in the current, 1954-55, fiscal year. At this level, security expenditures are probably near the minimum to be expected in 1955, considering continued international tension, West German rearmament, and the possibility of a shifting rather than a net reduction in foreign aid.

Requirements under the flexible farm price support program will be the principal variable in other purchases by the Federal government. For the most part, however, possible changes in these expenditures will occur late in the year and will not influence the 1955 total appreciably. In the aggregate, therefore, non-security items of the Federal government are expected to continue at the current \$7 billion level. Expenditures by state and local agencies will rise further under the pressure of growing population and the need for additions to physical plant, especially educational facilities and modern highways. It is probable the increase in state and local costs will offset most of the drop in defense spending, with the result that expenditures by all units of government in 1955 will total \$77.5 billion, against the \$78 billion last year and \$85.2 billion in 1953. Thus, the government sector will continue to provide tremendous support to the level of economic activity, free from the wide fluctuations of earlier postwar years.

Domestic Investment

National housing legislation and the new Federal Revenue Code will provide sources of substantial strength for the construction and business equipment industries in 1955. Residential building particularly has been stimulated by the liberalized credit provisions in the Housing Act of 1954. Despite several years of record or near record building, home construction is expected to increase 13 percent during 1955, according to the latest joint estimates by the U. S. Departments of Commerce and Labor.* In general, this trend is substantiated by an estimate of a 6 percent increase in home building for eastern states† and by a confidential poll of opinion in California made in connection with the budget revenue forecasts, which indicates a continuation of the present high building volume this year.

The outlook for new nonresidential construction and prospective investment in plant and equipment is less favorable, but relaxation of the provisions governing the amortization of expenditures for new plant and equipment will tend to maintain these investments at a level considerably higher than had been expected previously. In the aggregate, private building activity—residential and nonresidential—in the nation as a whole is expected to increase from a record of \$26.9 billion last year to a new high of \$28.8 billion in 1955, promising strength in an area

of the economy which only recently had been viewed with some apprehension.

Although purchases of producers' equipment should remain large, the general trend is likely to continue the decline marked out earlier. From an investment of \$24.4 billion in 1953 and a little more than \$22 billion last year, the total for 1955 is likely to fall to \$20 billion. However, the decline at this point in the area of business transactions will be more than offset by an improvement in the inventory situation. Business inventories are currently drawing into line with sales after a year of readjustment, and the depressing force of inventory liquidation, an important factor in last year's recession, will be absent during 1955. In contrast, inventory accumulation accompanying general growth and expansion in 1955 should turn this factor into a source of additional strength.

These factors—the building of homes and other residential structures, private nonresidential construction, business investment in plant and equipment, and additions to inventories—are expected to result in expenditures of \$49.8 billion this year, compared with \$45 billion in 1954 and \$51.4 billion in 1953.

Net foreign investment, smallest segment of the economic accounts, is likely to be a positive amount in 1955 due to improvement in conditions abroad. However, this factor is here treated as a neutral item, neither contributing to nor subtracting from the total.

Personal Consumption Expenditures

Largest of the economic accounts, and the most difficult to predict, is the amount to be spent in meeting the personal needs of more than 160 million people. For the most part, purchases of food, clothing, household items, cars, and the like depend upon the volume of current income received by the people, but in any given year expenditures from current receipts may be augmented by the utilization of credit or by withdrawals from savings. Or, if there is apprehension regarding the future, expenditures may be curtailed and a greater share of income may go into savings. Thus, consumption expenditures depend upon the psychological attitude of consumers as well as income. There is, in addition, the effect of governmental fiscal policies, such as the 1954 reduction in the Federal income tax, which achieved a \$3 billion increase in the volume of consumption expenditures with substantially no change in aggregate personal income.

A number of factors point toward a further increase in expenditure volume this year. In the first place, rapid population growth will expand aggregate personal needs for all consumption goods and services. To this normal pressure will be added the demand for durable items generated by increased residential construction and the growing market for replacement of house furnishings, appliances, and equipment necessary in home maintenance. Obsolescence due to the introduction of improved models, restyling, and aggressive salesmanship can play an important part in nourishing potential demand into

* U. S. Department of Commerce, *Construction and Building Materials*, November, 1954.

† F. W. Dodge Corporation, *Postwar Expansion*, November, 1954.

market transactions, as shown clearly in the consumer acceptance of this year's cars.

To become effective, consumer demand must be implemented by an increase in current income, and the necessary stimulus to larger incomes will be found during 1955 in accelerated building construction, the reversal of inventory liquidation which will necessitate production for current need, and in the regenerative effect of increased consumption. Credit volume, near record level, may expand somewhat this year, but the change is not likely to be great. A reduction in savings rate, which has hovered around 8 per cent of disposable income in the last four years, may also contribute to a rise in current consumption, while a fractional dipping into the \$200 billion in bank accounts, savings accumulations, and other liquid assets held by individuals could provide a substantial advance in spending.

In total, personal consumption expenditures for goods and services this year are estimated at \$239 billion, compared with \$233.5 billion indicated for 1954 and \$230.1 billion in 1953. This advance, combined with an increasing gross private investment in the nation's physical plant, will carry gross national production to \$366 billion in 1955 in comparison with \$356 billion estimated for last year and the record annual rate of \$370 billion achieved in the second quarter of 1953.

Implied in this pattern of improvement is an increase in personal income from \$286 billion in 1953 and 1954 to \$292 billion this year. Income after taxes is estimated at \$258 billion, against \$253 billion in 1954 and \$250 billion in 1953. Price levels are expected to remain relatively stable, continuing the plateau which has marked the last two years. Corporate profits before taxes are likely to show a slight decline, due both to liberalized depreciation allowances on recent plant investment and to more intense competition.

California Situation

In several important respects, California appears to have fared slightly better than the nation in the recent economic readjustment. Employment was more stable and a larger proportion of the civilian labor force was employed. Aggregate income of individuals in this State increased slightly, whereas there was virtually no change in total personal income for the nation. California appears to have constructed approximately ten percent more dwelling units last year, against a nationwide gain of six percent. Corporate earnings last year appear to have recorded a gain over the 1953 level, compared with a rather significant drop for the nation as a whole. At the same time, there were a few adverse comparisons in last year's record: retail trade declined slightly while the national total was stable; California's farm income was off more than that of the nation; and power production made a smaller advance.

California undoubtedly will participate in the improved tone of economic conditions this year. In view of the greater stability in 1954, the current advances are likely to be chiefly those accompanying growth, rather than those of economic recovery, and, therefore, may be smaller in degree than those registered for the

country as a whole. For this reason, the national pattern must be interpreted with some caution so far as California is concerned.

Aggregate income of California residents last year is estimated at \$25.2 billion. Under the economic pattern indicated for the current year, this total should rise to a new record of \$25.85 billion. Federal and State income taxes will absorb approximately \$3.3 billion, leaving disposable income of \$22.5 billion. If the people of California save at the same rate as in 1953 and contract a moderate volume of additional short-term consumer debt, the aggregate spending of California civilian residents this year should be approximately \$21.0 billion, compared with \$20.0 billion in 1954 and \$20.5 billion in 1953.

A summary of economic data and population projections underlying the revenue estimates is given in the accompanying table.

ECONOMIC DATA (Dollar amounts in billions)

	1953 Actual	1954 Preliminary	1955 Estimated
Gross national product.....	\$364.9	\$356.0	\$366.0

* Spendable resources include allowances for change in short-term consumer credit and change in liquid asset holdings of individuals, such as money, bank accounts, and savings bonds. Amounts are estimated by the State Department of Finance.

Source: Data for 1953 and 1954 compiled by federal and state agencies; 1955 estimated by State Department of Finance, Division of Budgets and Accounts.

GENERAL FUND REVENUE

California's vigorous growth has contributed to the stability of State tax collections through both of the recent economic readjustments. Rapid population gains and industrial development have broadened the base for such General Fund levies as the sales tax, the personal and corporate income taxes, the insurance tax, and others. As a result, the 1948-49 recession appears on tax records as a slight decline in the rate of increase, but a continuing growth in the total volume of General Fund receipts. Similarly, the business readjustment of 1953-54 resulted in a moderation of the rate of incline, but nonetheless an increase in total collections.

Other factors in this stability have been the diversity of tax levies and the varying periods of lag between changes in business volume and resulting revenue effect. In some instances, such as the sales

and excise taxes, the correlation between business activity and tax receipts is direct and almost immediate; in other cases the effect of economic changes upon tax receipts is delayed more than a year. Thus, there is an averaging process tending to reduce the degree of variation and to prolong the revenue effect of both prosperity and recession. These are important considerations in the General Fund estimates for 1954-55 and 1955-56.

Sales Tax—\$484,750,000

The estimate of sales tax revenue contemplates an increase in expenditures for tangible personal property in line with the anticipated improvement in personal income. The savings rate will be essentially the same as in 1954, but short-term credit may be expanded somewhat, in contrast with an apparent liquidation of consumer debt last year. In total, taxable spending is estimated at \$15,550 million, compared with \$15,164 million last year and \$15,289 million in 1953. Assuming continuation of the business recovery into the opening months of 1956 and a normal volume of revenue from the auditing of tax returns, receipts from this source during 1955-56 are estimated at \$484,750,000. The corresponding estimate for the current fiscal year is \$473,100,000, while actual receipts in 1953-54 were \$465,050,653.

Four important considerations underlie the estimate of sales tax revenue: (1) a high level of building activity; (2) sustained demand for motor vehicles; (3) normal utilization of nondurable goods, such as clothing, household supplies, meals and drinks, and drug items; and (4) a reduction in purchases of certain industrial equipment items.

As indicated above, increased activity in the building field is predicted with a good deal of confidence for the nation this year.* Principal factors in this outlook are the liberalized financing provisions in the Housing Act of 1954, the probability of a strong demand for housing loans by veterans until scheduled termination of the World War II assistance program in 1957, the replacement market in homes, and the backlog of need for commercial buildings incident to the continued trend toward suburban living. The 13 percent increase in the dollar volume of residential construction will be accompanied by corresponding or somewhat smaller increases in commercial and other nonresidential building. Only in the fields of industrial and farm construction are declines indicated. The Commerce-Labor survey forecasts an over-all expansion of 7 percent for the nation.

California has contributed disproportionately to the total volume of building in the last few years, and while the outlook for 1955 is promising, it seems unlikely the dollar volume of construction will exceed that of 1954.

Restyling of several passenger car lines and consumer acceptance of these models has put a new countenance on the motor vehicle outlook. Originally

predicted at 5.0 to 5.3 million units, 1955 production estimates recently have been raised to last year's 5.5 million level, or higher. In terms of demand, the year promises to be as good as 1954 and sales have been estimated on that basis. However, the newly inaugurated practice of absorbing part of the freight charges to distant points will result in lower unit prices in California. This will tend to reduce the volume of taxable sales even though more units are sold with optional equipment at extra cost. This price development, coupled with a continued decline in the volume of replacement parts and supplies per registered vehicle, constitutes grounds for predicting a more modest gain in sales of motor vehicle items—2 percent above 1954 as contrasted with 5 percent gains in some of the other important segments of the sales tax base.

Sales of consumers' nondurable goods—the items needed in day-to-day living—bear a fairly constant relationship to income. The percentage of income spent for nondurables is expected to rise slightly in the current year as it did in 1954. Consequently, the 4.6 percent increase shown in the accompanying table for this group of items is fractionally greater than the growth in total taxable expenditures. In the same way, the ratio of spending for consumers' durable goods is also expected to increase moderately.

Sales of industrial supplies and equipment constitute the most difficult segment of the sales tax base to predict, partly because change can occur rapidly and partly because very little detailed information exists regarding this important part of the tax base. To the extent that the \$2.7 billion spent for taxable industrial goods in 1954 represented supplies, replacement parts, and other items consumed in business operations, there should be an increase in tax receipts this year. To the extent that it represented capital investment in plant and equipment, receipts will probably decline in parallel with the expected drop in plant investment. In total, it is assumed that the two factors will balance and that the volume of taxable transactions will be essentially the same in 1955 as in 1954.

Estimated sales volumes for 1954 and 1955 together with actual amounts for 1953, summarized in six broad groups, are given below:

	(Millions of dollars)			Percent Change 1954-55
	Actual 1953	Estimated* 1954	Estimated 1955	
Nondurable goods...	\$5,951.7	\$6,051.3	\$6,330.0	4.6
Consumer durables†	1,589.4	1,516.0	1,570.0	3.6
Motor vehicles and motor vehicle sup- plies and parts...	3,238.7	3,009.2	3,070.0	2.0
Building materials...	1,675.9	1,735.9	1,750.0	0.8
Producers' equip- ment and sup- plies †	2,710.4	2,720.1	2,700.0	-0.7
Unallocated	122.9	131.5	135.0	2.7
Totals	\$15,289.0	\$15,164.0	\$15,550.0	2.5

* Actual for the first three calendar quarters and estimated for the fourth.

† Other than motor vehicles and building materials.

Receipts from the sales tax audit program are estimated at \$12,000,000 annually, while \$1,800,000 is

* U. S. Dept. of Commerce, *Construction and Building Materials*, November 1954; F. W. Dodge Corporation, *Postwar Expansion: Chapter Ten of a Serial Story*; "The Building Market for 1955," an address by H. E. Riley, Chief, Division of Construction Statistics, Bureau of Labor Statistics, U. S. Dept. of Labor.

expected in connection with the refund of gasoline tax paid on fuel consumed off the highways.*

Franchise Tax—\$131,600,000

Corporate earnings, taxable under the State franchise tax law, are estimated to have increased 1.5 percent in 1954 over 1953, in contrast to a 10 percent reduction in corporate profits before taxes estimated for the nation. This estimate is predicated upon reports of earnings obtained from a sample of corporations and financial institutions subject to the tax. In total, 348 replies were obtained from corporations representing 68 industries and accounting for over 50 percent of the total taxable corporate income in this State.

Replies indicated differences in trend between industries as well as within industries. Overall increased earnings were indicated in mining, oil production, banking, and some of the manufacturing industries such as transportation equipment (primarily aircraft) and stone, clay, and glass products. The service group estimated its earnings at a slightly higher level than 1953, while agricultural establishments indicated no change. Smaller earnings were shown for the remaining industries, with substantial reductions for railroads, motion pictures, and textiles.

On the basis of this sample, total taxable income from California operations in 1954 is estimated at \$2,812,775,000, compared with the \$2,772,451,250 earned in the preceding year. Approximately 58 percent of the tax on 1954 income, plus the second installment from banks, will be received before July 1, 1955, while the remaining 42 percent will be received after that date and will constitute revenue for the next fiscal year.

A number of corporations, in replying to the questionnaire, indicated that a substantial part of earnings reported for 1954 resulted from nonrecurring transactions. This situation should not be counted on to bolster corporate earnings in 1955. It has been assumed that taxable earnings in 1955 in California will parallel the anticipated national trend. Taxable income of financial corporations is expected to increase further in 1955—but at a much lower rate than that reported for 1954. Income of utilities, exclusive of railroads, should increase by about 7.5 percent, generally in line with anticipated population increase and economic conditions. Railroads, after a very poor record in 1954, are expected to increase earnings by about 35 percent.

Collections resulting from the audit program totalled \$7,500,000 during 1954. Collections of this type are expected to decline to \$6,500,000 in 1955.

In total, receipts from the bank and corporation tax† during 1955-56 are estimated at \$131,600,000,

* In preparing revenue estimates, calendar year data are used almost exclusively in order to take full advantage of such related material as census reports, income payments, and other economic data. All estimates include assessments of additional tax, interest, and penalties as a result of the audit programs of tax administering agencies. Calendar year estimates are apportioned to fiscal years on the basis of ratios during recent years.

† The supplementary corporation income tax is combined with the bank and corporation franchise tax for purposes of revenue estimating and reporting in this budget. The two levies are identical in essential features. The corporation income tax is estimated to yield \$1,000,000 in 1955-56 and \$900,000 in the present fiscal year. Actual receipts last year were \$849,200.

compared with \$129,200,000 for the current fiscal period. Actual collections during 1953-54 amounted to \$125,025,800.

Personal Income Tax—\$104,250,000

Revenue receipts from this source for the 1954-55 and 1955-56 fiscal years will depend largely upon income received by Californians during the calendar years 1953, 1954, and 1955. Estimates of revenue have, therefore, been based upon income data for California published by the U. S. Department of Commerce and estimates by the Department of Finance for 1954 and for 1955, in line with the general assumptions outlined earlier. These, with the Commerce figures for the last published year, 1953, are shown in the table below:

	<i>Income Payments (Millions of dollars)</i>		
	1953	1954	1955
Salaries and wages	\$17,177	\$17,295	\$17,690
Proprietors' income	3,447	3,360	3,380
Property income (dividends, interest, rents)	2,785	2,988	3,150
Other income	1,447	1,557	1,630
Totals	\$24,856	\$25,200	\$25,850

Tax receipts attributable to salaries and wages, proprietors' income, dividends, interest, and rents were related to their counterparts in the income payment series for prior years. This was done because income from salaries and wages generally accrues to the lower income groups, proprietors' income to the middle income groups, and property income to the higher income groups. Consequently, the source of income as well as the amount of change is important in determining increase or decrease in revenue receipts. Based on the relationships and the estimates above, projections were made for the tax liability on 1954 and 1955 incomes. Tax generated by capital gains was raised for 1954 and 1955 largely in line with higher security prices. Office assessments were increased by \$1,000,000 for next year because of the newly inaugurated Federal tax comparison program. Neither reduced Federal income taxes nor higher social security taxes will directly affect this revenue since neither is deductible in computing California income tax liability. (If legislation is enacted in California making the personal income tax conform to the changes in Federal income tax law, receipts will be lower than those estimated.)

The personal income tax under existing law has been estimated to produce \$104,250,000 during 1955-56 and \$100,100,000 in 1954-55. These compare with actual receipts in 1953-54 of \$96,168,833.

Insurance Tax—\$39,000,000

Revenue for 1955-56 from the gross premiums tax on insurance companies is expected to increase but slightly over 1954-55 collections.

Since this revenue will be based on premiums written in 1954, 121 major insurers were circularized for a comparison of the total volume of premiums received in 1954 with the 1953 volume in various lines of insurance. Based upon replies, it appears that premiums on life insurance and health and accident insurance were higher in 1954 than in the previous

year. These lines are most sensitive to and should follow the trend in population growth. Declines were apparent in amount of fire, automobile, and workmen's compensation insurance premiums. Lower volume of premiums in the first two can be attributed largely to rate reductions in 1953 and 1954.

After authorized deductions, application of the 2.35 percent tax rate should result in revenue amounting to \$39,000,000 in 1955-56. This is an increase of only 1.3 percent over 1954-55 revenue of \$38,500,922, and a 13.6 percent increase over the \$34,324,894 collected in 1953-54.

Inheritance and Gift Taxes—\$30,500,000

Although inheritance and gift tax receipts depend primarily upon the number and size of bequests and upon the relationship between decedent or donor and the beneficiary, general business conditions and price levels also influence the volume of collections. The higher security values prevailing during recent months are being reflected in current receipts and will continue to exercise an influence for the remainder of the current fiscal year at least. Inheritance tax collections are currently running at an annual rate of more than \$2.25 per capita and, allowing for population growth, it seems reasonable to assume total collections of \$28,500,000 during 1955-56. Inheritance tax collections in 1953-54 were \$22,409,089, but \$1,890,000 which normally would have been received before June 30, did not clear into the treasury until early July of the present fiscal year. This delayed receipt will carry 1954-55 collections to \$28,500,000.

Gift tax receipts have been increasing gradually over the past three years, both in absolute amounts and in relation to population. On either basis, the data point toward total collections of \$1,850,000 in the present year and \$2,000,000 in 1955-56. Comparative receipts in 1953-54 were \$1,702,764.

Alcoholic Beverage Taxes—\$20,220,000

Despite a general downtrend during recent years in the per capita use of alcoholic beverages, total consumption of beer, wine, and distilled spirits has increased and should continue to increase with the growth of California's adult population.

During 1954 the per capita consumption decrease was somewhat more than in prior years, an expression, probably, of consumer tendencies to reduce nonessential expenditures; greater confidence in economic stability together with an anticipated increase in income in 1955 should have a leveling effect upon this decline. For these reasons, revenue from the distilled spirits excise tax is expected to increase from \$15,545,886 in 1953-54 to \$15,750,000 in 1954-55 and to \$16,000,000 in 1955-56. Similar increases are expected in beer and wine excise tax collections, from \$3,989,277 in 1953-54 to \$4,130,000 in 1954-55 and \$4,220,000 in 1955-56.

Private Car Tax—\$1,390,000

Railroad cars owned by companies other than railroads are taxed by the State in lieu of local levies on this type of property. The tax is based upon assessed value and the number of days each unit of equipment is located in California during the year. The rate im-

posed is the average tax on real and personal property throughout the State in the preceding fiscal year. On this basis, an assessment of \$1,300,900 was made for 1954-55, including minor amounts of interest and penalties. Collections during 1953-54 amounted to \$1,221,589. The average values per unit have been rising slowly in the last four years and this slight up-trend will probably continue. The average tax rate will be approximately 20 cents more than last year, and the pattern of higher values at increased rates indicates total receipts of \$1,390,000 in 1955-56.

Other General Fund Revenue—\$33,970,000

For the most part, other revenue to the General Fund represents such nontax items as receipts from the care of patients at State hospitals, oil and mineral royalties, interest income, and departmental charges of various types. In addition, there is included the General Fund shares of liquor license fees,* horse racing revenue, and motor vehicle license fees, shown with major taxes and fees in Schedule 2. These account for \$8,551,625, or approximately one-fourth of the total treated as "other revenue."

Departmental revenue available for general use has shown a gradual increase over the years, and will continue to grow in 1955-56. Miscellaneous receipts have advanced sharply from \$533,080 in 1953-54 to \$1,687,555 expected in 1954-55 and \$2,080,000 in 1955-56. Nearly all of this change can be traced to the additional fines for traffic violations under the law enacted in 1953 in connection with the driver education programs in high schools of California.

The total of \$33,970,535 shown as other General Fund revenue anticipated in 1955-56, may be compared with \$34,594,624 in the current fiscal year, and \$32,644,830 in 1953-54, when investment income alone accounted for nearly \$12,000,000 of General Fund receipts—twice the amount to be expected in the coming year.

SPECIAL FUND REVENUE

Approximately one-third of the State's revenue is restricted as to use by provisions of the Constitution or statutes, and under California's financial procedure this money is separately accounted in various special funds. Three categories of income comprised in the special fund total are: (1) the receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees which must be used for highways and activities related to motor vehicles illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil royalties dedicated to beach and park development are examples of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

With the increase in highway user taxes enacted in 1953 as part of the accelerated highway construction program, motor vehicle taxes gained added importance in the State's tax system. With extension of the higher rates recommended as a means of continuing the

* Chapter 22; Statutes of 1954, First Extraordinary Session.

attack on highway problems, \$453,935,000 * will be derived from levies relating to the ownership or operation of motor vehicles, including the motor vehicle transportation tax and the license fee collected by the State in lieu of local taxes on this type of property.

Fees for regulatory services and charges for special assistance to various sections of industry, business, and the professions are the second largest source of special fund revenue. These are followed in fiscal importance by horse racing license fees, liquor license fees, and miscellaneous dedicated revenue.

Motor Vehicle Fees—\$183,430,000

More than 6,600,000 fee-paid automobiles, trucks, trailers, and motorcycles are expected to be traveling on State highways by December 31, 1956. This is an increase of 245,000 vehicles over the number anticipated by the end of this year and 475,000 more than the 1954 total. Since 1950, two vehicles (cars, trucks, trailers, or motorcycles) have been added to our registry rolls for every three persons added to the State's population and, by year-end 1956, there will be one vehicle for every two persons residing in California.

Average registration fees for automobiles, including interest and penalties, vary little year by year and are estimated at \$8.84 per vehicle. Truck fees appear to be declining and are estimated at \$43.40 per vehicle, or 60 cents less than the 1954 average. Trailer fees, however, are rising and the \$21.75 charge estimated for 1955 is greater than the 1954 average by 55 cents. Motorcycle fees show little fluctuation and are estimated at \$8.80 per vehicle in each year. In total, \$88,330,000 is expected from motor vehicle registration and weight fees in 1955-56, compared with \$84,746,300 in the current fiscal year and actual collections of \$80,987,672 in 1953-54.

Revenues from motor vehicle license fees levied in lieu of local property taxes is expected to amount to \$82,800,000 in the budget year. This money, except for \$5,036,625 used to cover highway bond charges and administrative costs, will be returned to local governments for expenditure. The effect of an increasing number of higher priced vehicles during recent years is clearly evident in the gain to be recorded over the 1954-55 total of \$81,200,000 and the \$77,981,839 in actual receipts from this source in 1953-54.

A summary of actual and estimated revenue to be received by the Department of Motor Vehicles during the period covered by this budget is shown below:

(Millions of dollars)			
	Actual 1953-54	Estimated 1954-55	Estimated 1955-56
Registration and weight fees—	\$81.0	\$84.7	\$88.3
License (in lieu) fees—	78.0	81.2	82.8
Drivers' license fees—	5.8	5.5	5.4
Transfer fees—	4.4	5.6	5.7
Caravan fees—	0.6	0.6	0.6
Other fees—	0.8	0.6	0.6
Totals	\$170.5	\$178.2	\$183.4

Motor Vehicle Fuel Taxes—\$256,200,000

Tax-paid distribution of motor vehicle fuel in California between July 1, 1955 and June 30, 1956 will

* Including \$2,436,625 from the motor vehicle license fee (in lieu tax) credited to the General Fund.

amount to more than four billion gallons, an increase of over 100,000,000 gallons from 1954-55. The six cent motor vehicle fuel tax will, therefore, return \$241,500,000 in 1955-56, compared with \$234,500,000 in the current year—the first year in which the increase in tax rates on motor vehicle fuel had a full-year effect. Collections from this source in 1953-54, when only 10 months' revenue was at the increased rate, amounted to \$222,058,079.

The rising number of two-car families, more efficient motor operation, and the withdrawal of older units from the highways should continue the decline in the number of gallons consumed per vehicle. From the 642 gallons per vehicle used in 1953-54, indications are that 630 gallons will be consumed in 1954-55 and 625 gallons during 1955-56.

Diesel fuel consumption has continued to climb steadily due to increased use of highway transportation and the shift to Diesel powered vehicles for greater economy of operation. Consumption of this fuel is estimated at nearly 200,000,000 gallons in 1954-55 and 210,000,000 gallons in the budget year. Returns from this levy will therefore be \$13,800,000 and \$14,700,000 respectively. Receipts in 1953-54, of which 10 months' revenue was at 7 cents per gallon and 2 months' at 4.5 cents per gallon, amounted to \$12,317,657.

Comparative revenue from the fuel taxes for the years covered by this budget are given below:

(Millions of dollars)			
	Actual 1953-54	Estimated 1954-55	Estimated 1955-56
Gasoline—	\$222.1	\$234.5	\$241.5
Diesel fuel—	12.3	13.8	14.7
Totals	\$234.4	\$248.3	\$256.2

Motor Vehicle Transportation Tax—\$14,285,000

Firms and individuals engaged in the transportation of persons or property for hire by motor vehicle upon the State highways are subject to a tax of 3 percent on gross receipts from such operations. A close relationship exists between total business from these operations and total disposable income of the people of California. With disposable income estimated at \$21.8 billion in 1954 and \$22.5 billion for 1955, gross assessments are estimated at \$16,600,000 during the current year and \$17,500,000 in the budget year. However, one third of the weight fees paid on vehicles used in these operations may be credited against the tax liability. Consequently, the net revenue from this source during 1955-56 will amount to \$14,250,000. In addition, permit fees of \$35,000 will be received. The total of these amounts may be compared with \$13,635,000 this year and \$13,336,514 in 1953-54.

Horse Racing Fees—\$23,602,000

Revenue from horse racing fees is estimated to total \$23,602,000 in 1955-56 based on an expected \$417 million to be wagered during that year at various tracks throughout California. Approximately \$414 million will be wagered during the current year, producing \$23,585,000 in revenue.

Generally, wagering follows the trend of personal income, and the anticipated revenue from parimutuel betting has been based upon income projections. Receipts, particularly those accruing to the General Fund, have been estimated higher than normal in 1954-55 since the racing dates for one major track combine to give 53 days in that fiscal year instead of the normal 50 days.

Receipts from horse racing fees are shown in the table below:

	<i>(Thousands of dollars)</i>		
	<i>Actual 1953-54</i>	<i>Estimated 1954-55</i>	<i>Estimated 1955-56</i>
Tax on parimutuel pools	\$21,041	\$21,971	\$22,030
Breakage	1,185	1,378	1,332
Unclaimed tickets	286	236	240
Totals	\$22,512	\$23,585	\$23,602
General Fund	4,224	5,650	5,600
Fair and Exposition Fund	16,103	16,557	16,670
State College Fund	1,185	1,378	1,332
Wildlife Restoration Fund	1,000	-	-

Liquor License Fees—\$9,420,000

Liquor license fee revenue is estimated at \$9,420,000 for the 1955-56 fiscal year, compared with \$9,500,000 expected in the current year and \$8,586,074 collected in 1953-54. These estimates assume no modifications in fee structure and no further issuance of new on-sale general licenses. Undoubtedly, policy changes in the issuance of licenses will be made by the new Department of Alcoholic Beverage Control influencing this revenue, but the effect of such changes cannot be appraised at this time.

Beginning with the 1954-55 fiscal year, there was a 10 percent increase in statutory fees, the revenue thus obtained accruing to the General Fund. The General Fund share will amount to \$475,000 in 1954-55 and \$515,000 in 1955-56. The remainder of the collections will be apportioned as usual to the cities and counties on the basis of the value of licenses issued in each jurisdiction.

The estimates assume a continuation of the slight decline in revenue from licenses other than general on-sale and graduated off-sale general licenses. Of these exceptions, the former has been assumed to remain at current levels, while a slight increase has been assumed in the latter—generally following the increase in sale of distilled spirits. The slight increase in the General Fund share of license fees in 1955-56, in spite of the general decline expected, can be traced to the fact that some licenses issued in 1954-55 were at the former rates.

Other Special Fund Revenue—\$38,101,000

Revenue for many of the special funds is derived from the regulatory activities of the various State offices; from charges for special services to particular groups of firms and individuals; from oil and mineral royalties which have been dedicated to special uses, such as school support and beach or park development; and from interest on the investment of special fund balances temporarily lying idle. The aggregate of these and similar items in 1955-56 is estimated at \$38,101,307, down \$67,700,412 from the current year

total because of the unusually large volume of oil royalties released to the State this year with return of the tidelands to State ownership. If it were not for this item, miscellaneous special fund receipts would show a slight increase next year. Detailed information on the amounts comprising this class of revenue is shown in Schedule 2 of the budget summary.

TAX TRENDS

Tax trends during recent years are of particular interest in the light of the need for additional revenue to support the increasing expenditure obligations of State government. The direct relationship between economic conditions and revenue yield has been emphasized in connection with the 1955-56 forecasts. It is re-emphasized by a study of business activity and tax collections over the last two decades. The basic structure of California's present tax system was developed in 1933 and 1935. Except for perfecting amendments, liberalized deductions, and the increase in motor vehicle taxes to finance accelerated highway construction programs, the system has not been changed in any important respect since 1935. Yet the taxes which raised less than \$220,000,000 in 1936-37 (the first full year under the present system) are expected to return \$1,300,000,000* in 1955-56.

The six-fold growth in tax revenue during this period is slightly greater than the increase in the income received by individuals in California, with the result that State tax collections per \$100 of individual income rose from \$4.63 in 1936-37 to \$4.89 in 1953-54 and are estimated at \$5.02 in 1955-56. All of the increase can be traced to highway levies, however. General Fund taxes actually absorb less of the aggregate personal income today than at any time except during the period of war and early postwar tax reductions: \$3.11 per \$100 of income in 1953-54 and \$3.17 estimated for next year, compared with \$3.28 in 1936-37 and a prewar average of \$3.43.

Several factors have contributed to the decline in General Fund taxes in relation to total personal income. Principal among these are: (1) the \$1,000 increase in State income tax exemptions for both individuals and families, and the decrease in maximum tax rate from 15 percent on taxable income in excess of \$250,000 to 6 percent above \$25,000; (2) more liberal exemptions and deductions under the personal income tax and the bank and corporation tax; (3) an increase in sales tax exemptions from five when this law was first enacted to some 26 at the present time; and (4) the diversion to special uses, such as highway construction and assistance to local governments, of approximately \$30,000,000 formerly accruing to the General Fund each year. In contrast with the first three, the final factor did not lighten the tax load.

The increase in burden of special fund taxes has been entirely in the motor vehicles levies. In fact, other special fund receipts have dropped slightly in relation to personal incomes. Against an over-all advance of 43 cents per \$100 of personal income, motor vehicle taxes have increased 47 cents—from

* Revenue from major tax sources only; departmental revenue, interest, rents, royalties, and miscellaneous receipts excluded.

\$1.20 in 1936-37 to \$1.67 in 1953-54. As receipts in the latter year did not fully reflect the higher motor vehicle taxes enacted as part of the 1953 highway construction program, further advances are indicated for this year and next. In each of these periods, motor vehicle taxes (including "in lieu" fees) will amount

to approximately \$1.75 per \$100 of income and total special fund levies will reach a ratio of \$1.85.

A summary of income payments to individuals in California, State tax collections, per capita taxes, and tax payments per \$100 of individual income is shown below.

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

Population data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Income of individuals, 1936 through 1953, from United States Department of Commerce estimates, *Survey of Current Business*, Aug. 1953 and 1954. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1954 and 1955 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

Expenditure Requirements, 1955-56

Population growth continues to set the trend for State expenditures in California. It is reflected in the requirements for support of public schools, in the appropriations necessary for State colleges and the University, in the cost of operating mental hospitals and correctional institutions, in the provisions made for public health, and in the construction which must be undertaken immediately to meet the needs of the future. This factor more than any other accounts for the higher expenditure totals in recent years and represents a basic difference between the fiscal program of California and that of many other states.

Expenditures of State government during the fiscal year beginning July 1, 1955 and ending June 30, 1956 are budgeted at \$1,529,768,426. This represents an increase of more than \$56,476,000 (3.8 percent) over the corresponding total of the current year, making this budget—like virtually all of those which have preceded it—the largest in California's financial history. More than half the total will be paid to local governments for education, social welfare, roads and streets, and other functions. Approximately 27 percent of the total will be used for State operations, including support of the Legislature, courts, offices, boards and commissions, and all departments and institutions. A little less than 20 percent will be utilized for highway construction and capital outlay at State institutions and other centers of government. Amounts involved in the program for each of these broad divisions in the coming fiscal year are shown below:

(Millions of dollars)				
	Proposed expenditure	Change from 1954-55 Amount	Percent	Percent of total
State operations —	\$414.5	\$37.9	10.1	27.1
Capital outlay —	292.9	—20.5	—6.5	19.2
Local assistance —	822.4	39.0	5.0	53.7
Totals ———	\$1,529.8	\$56.5	3.8	100.0

Of the increase in State operations, \$16,037,000 represents the cost of a salary increase to State employees, including those employed by the University of California. Provision for this adjustment grows out of the State Personnel Board finding that current salary levels are approximately 5 percent below the scales paid in private industry and in other governmental agencies for work of comparable skill and responsibility. Excluding this adjustment, the increase in State operating expense is 5.8 percent. *In this connection it should be noted that in the 1955-56 expenditure data presented in this statement the appropriation for salary increase has been distributed to the various agencies. In all other budget schedules the salary increase fund is shown separately as a lump sum. The deviation is made at this one point in order to show as accurately as possible the total amount to be spent for each function of government.*

Approximately 68 percent of all expenditures by the State government are mandatory under provisions of the California Constitution or the statutes. Among

other items included in this group are apportionments for school support, interest and redemption payments on bonded debt, aid to the aged, the blind, and needy children, highway expenditures, and revenue shared with cities and counties. Only 32 percent of the total program is subject to executive control in preparing the budget, and this margin is narrowed further by the fact that the Governor cannot control the number of people needing care and treatment at State hospitals, the number committed to correctional institutions, or—in fact—the number meeting the tests for admittance to State colleges and the University. The degree of control exercised over these and many other budget items is extremely small in relation to the pressures of population growth.

A statement of the mandatory expenditures of State government is shown in Schedule 9 of the budget. A summary of the principal items and the estimated amounts required for each purpose is given below.

(Millions of dollars)			
	Fixed expenditures	Change from 1954-55 Amount	Percent
Public schools ———	\$427.5	\$30.0	7.5
State highways ———	239.2	—17.0	—6.6
Social welfare ———	141.1	1.6	1.1
Revenue for local governments ———	176.6	4.1	2.4
All others ———	49.1	0.8	1.6
Totals ———	\$1,033.5	\$19.4	1.9

Expenditures for education account for 39.5 cents out of each dollar budgeted for 1955-56. These include the administrative activities of the Department of Education, support of the State Library, apportionments for public schools and items related to school operation, appropriations for centers of higher education, and the construction of buildings at educational institutions.

Second in order of size are the expenditures for highways and motor vehicle regulation: 24.6 cents of each dollar will be expended on these activities next year. Following in order are social welfare and public health (11.7 cents), mental hygiene and corrections (9.2 cents), conservation of natural resources (4.7 cents), fiscal affairs (1.9 cents), and all others (8.4 cents).

Expenditures for each of these seven functional classifications are outlined in the following paragraphs.

Education—\$603,581,000

In total, more than 2,500,000 individuals—one out of each five persons in California—will attend a publicly supported educational institution next year, establishing new records of attendance for elementary and secondary schools, special centers for the physically handicapped, and State colleges. Only the University of California will operate below peak level and, excluding the supercharged period immediately following World War II, enrollment at the University

will also register a substantial increase over other recent years. Moreover, record attendance at high schools of the State foretells still further expansion of college and University enrollments within the next few years, and provision must be made for this future growth by budgeting in the coming year to build the most urgently needed classrooms, laboratories, and other facilities.

Largest single item in the State budget is the amount required for support of public schools—nearly \$428,500,000. Article IX of the Constitution appropriates each year for current financial support an amount not less than \$180 per pupil in average daily attendance during the preceding fiscal year. With current attendance estimated at a record 2,375,000, apportionments to public schools next year will reach \$427,500,000, an increase of 7.5 percent over the amount required in 1954-55. To this must be added \$1,000,000 for high school courses in automobile driving. Partial repayment to the State of a loan made several years ago will bring apportionments to \$428,482,804, an increase of \$30,289,052 over the total for the current fiscal year and \$61,426,000 above the sum required in 1953-54.

Other elements in the aggregate payments by State government for assistance to local schools include the \$25,585,000 contribution to the teachers' retirement system—up \$2,665,000 over 1954-55; \$8,920,145 for interest and redemption charges on school building bonds—up \$593,640 over the current year; \$354,761 for vocational education—unchanged from the present level; and \$5,728,797 for free textbooks—an increase of \$3,222,287 due chiefly to the adoption of a new series in geography and history, but reflecting as well the sharp growth in school attendance. Provision for State support of child care centers terminates on June 30, 1955, and no funds are included for this activity in the coming year.

In total, expenditures for assistance to local schools in 1955-56 are budgeted at \$469,071,507, compared with \$436,033,912 this year and \$405,276,417 in 1953-54. The importance of this item in determining budget trends is shown by the fact that 50 percent of the growth in General Fund expenditures occurs in this area.

Expenditures for support of special schools reflect the moderate enrollment growth in the older institutions and the scheduled expansion of facilities at the new School for the Deaf in Riverside. Including programs for the blind, the support of special schools will amount to \$3,900,000, up \$433,000 from the currently authorized level. Of this increase, \$203,448 is accounted for in the Riverside expansion. Capital outlay appropriations of \$1,590,277, designed primarily to bring the Riverside School to its maximum enrollment, will result in total expenditures of \$5,490,133, or \$191,000 more than during the current year.

As in the case of public schools, the enrollment pressure upon State colleges this year stands at an all-time high, and additional students are expected in 1955-56 as expanding capacities allow these educational centers to accept their share of the growing number of high school graduates. Enrollments at the 11 State colleges are expected to reach 38,181 full-time students next year, or 3,720 above the current total. In line with this growth, recommended appropriations for

college support are \$26,706,796, an increase of \$4,267,000 above the estimated requirements in the present fiscal year.

A new fee of \$75 a semester for out-of-state students attending the State colleges has been included in the budget in anticipation of legislative enactment during the 1955 General Session. Adoption of this charge will bring the California colleges into line with publicly supported colleges in other states, and will result in an additional reimbursement of \$138,000 a year.

The 1955-56 capital outlay program for the State colleges is designed primarily to assure sufficient housing and instructional areas for enrollments in the fall semester of 1958. To meet the projected growth to that date and alleviate the overcrowding now facing some of these schools, \$18,932,572 is budgeted to provide classrooms and related facilities at all colleges, four cafeterias where new campuses and extended day programs require them, gymnasiums to meet enrollment needs at three schools, and various auxiliary structures for instructional needs. In addition, new sites have been selected and \$2,150,000 has been added to existing funds to provide immediate temporary housing on the two campuses of Los Angeles State College.

Enrollments at the eight campuses of the University of California for 1955-56 are estimated at 36,651, a gain of 2,513 over the current year. The State appropriation for support of the University shows an increase of 9.2 percent—from \$60,100,721 in 1954-55, to \$65,641,896 in 1955-56. These amounts include the State's contributions to the Employees' Retirement Fund on behalf of University personnel, and the salary increase provision, which alone adds \$3,102,744 to the University's expenditure program.

The medical centers at Los Angeles and San Francisco, which will be in full scale operation next year, account for the major increases in budget expenditures. With the exception of air pollution research, no new programs are included in the University's budget. The study of air pollution was started in 1954-55, by means of an allocation from the Emergency Fund and a requested deficiency appropriation. The Survey of Higher Education, underway for two years, will be completed in 1954-55 with a report to the Legislature at the 1955 Regular Session.

The capital outlay program of the University for other than agricultural projects shows a marked increase as the initial step in the five-year program designed to meet the enrollments anticipated by 1960. Expenditures for non-agricultural projects are recommended at \$8,718,000, including buildings at Los Angeles for engineering, physical sciences, and life sciences, and a building to house the physical sciences and mathematics at Berkeley. Capital outlay projects for agricultural activities at the Davis campus, financed from the University's share of the Fair and Exposition Fund, are estimated at \$246,500, while agricultural projects on other campuses total \$1,528,050. In addition, \$1,854,513 from the Fair and Exposition Fund is to be transferred to a reserve for expenditure at a later date as agricultural projects are approved by the Regents.

Including endowment and other funds, the total expenditure program for the University next year will be \$102,032,414, an increase of \$11,986,892 over the sum provided in the present year.

Highways, Streets, Traffic, and Motor Vehicle Regulation—\$376,917,000

Expenditures for highway construction and maintenance, traffic control, and motor vehicle regulation during 1955-56 will total \$376,917,000. Of this amount, \$73,173,000 will be spent for support of State operating agencies—the Highway Patrol, Department of Motor Vehicles, and State Division of Highways, while \$211,448,000 will be used for construction, and \$92,296,000 will be paid to counties and cities in the course of sharing receipts from the gasoline tax and registration fees, and as a grant-in-aid. With the exception of capital outlay for construction on the State highway system, expenditures for each of the principal items will increase during 1955-56 compared with the amounts being spent in the current year. Utilization of highway fund balances carried forward from earlier years and a revision in the method of accounting for depreciation on construction equipment have added to the normal volume of capital expenditures this year, carrying the total to \$228,218,000.

The Governor's recommendation that present highway user tax rates be continued is a key feature in the budget provision for new highway construction. The reduction in rates on July 1, 1955, as contemplated in the 1953 highway legislation, would result in a revenue reduction of approximately \$25,000,000 during the next fiscal year. As the shares going to counties and cities are fixed without regard to this drop in rates, the entire reduction would be borne by the State and would be evident chiefly in a substantially lower volume of highway construction. With a firm level of State revenue and \$40,577,000 in Federal funds, a program of construction and improvement involving 418 miles of State highways can be undertaken.

Painfully slow progress is being made in the campaign to curb highway accidents and traffic deaths. With an increase of 3.5 percent in motor vehicle registrations last year, the number of reportable accidents outside incorporated cities increased 2.4 percent through the end of November. Injury accidents were 3.0 percent greater, but fatalities were 9.5 percent

below the corresponding period of 1953. Notwithstanding this gain, more than 2,000 persons were killed on the rural highways of California last year, over 46,000 were injured, and property damage amounted to millions of dollars. To cope with this situation, the budget provides for 24 additional traffic sergeants and 246 more officers, bringing the total strength to 2,008, or one uniformed officer for each 3,160 registered vehicles. The cost of intensifying the enforcement effort will be \$1,642,850 per year, or less than 26 cents per registration.

It is estimated there will be more than 6,600,000 registered vehicles in the State and 6,850,000 licensed drivers by the end of 1956. More than half the people of California have occasion to contact the Department of Motor Vehicles in connection with their ownership or operation of a motor vehicle. In order to give adequate service to this large segment of the State's population, the budget makes provision for a moderate increase in staff and the establishment of 11 new field offices.

Social and Industrial Welfare, Public Health, and Related Activities—\$179,801,000

Programs of service in the fields of health and welfare have matured during recent years, and after a period of rapid growth are now among the most stable activities of State government. The \$179,801,000 budgeted for expenditure on all social and industrial welfare, public health, and related functions in 1955-56 is actually less than was spent in some of the earlier years. Part of the reduction may be traced to the growing importance of the Federal old age and survivors insurance program in providing retirement pensions, thus alleviating the need for public assistance. Part is due to changes in legal restrictions governing payment of aid to persons in need and to stricter enforcement of these provisions, and part reflects a decrease in capital outlay expenditures from the peak of a few years ago.

Most of the expenditures by the State for social welfare are made through the county governments.

Subventions for these purposes are estimated at \$143,624,000, with old age security—largest of the welfare items both from the viewpoint of the number of persons involved (272,500) and the cost of the program (\$97,446,000)—accounting for two-thirds of the total. During recent years there has been very little change in the number of aged aid recipients, due to the growing effectiveness of the old age and survivors insurance program which now covers approximately 40 percent of persons over 65 years of age. Aid to needy children will require payments aggregating \$36,066,000, and assistance to the blind will amount to \$5,998,000. In addition, hospital care of the aged and blind, inspection of boarding homes for children and aged, and support of the adoption program will amount to \$4,115,000.

The estimated average of: (a) persons to be granted assistance, (b) monthly payments, and (c) the State's share of these monthly amounts for the 1955-56 fiscal year follows:

	<i>Average number of recipients</i>	<i>Average monthly payment</i>	<i>State's share of aid</i>
Old age security-----	272,500	\$67.50	\$29.80
Aid to needy children			
Family groups *-----	190,310	37.75	13.91
Foster homes-----	9,572	62.75	37.80
Aid to the blind-----	12,400	84.50	37.82
Aid to partially self- supporting blind-----	415	89.00	74.30

* Including needy parent.

The State Department of Social Welfare will expend \$2,467,150 during 1955-56 for the administration of the subventions and other current expenses.

Subventions for public health will total \$15,060,000, an increase of \$681,000 over the sum provided in the present year. Virtually all of the change will occur in two programs—aid to crippled children and hospital construction.

Assistance for support of local health departments will follow population growth, while tuberculosis subsidies will drop fractionally from the unusually high level provided in the current year's budget. Principal development in the budget of the State Department of Public Health is the provision of funds for air pollution control and research into this health problem. Provision is also made for continuing the prevention of blindness study, financed entirely from donations. Additional laboratory technicians are provided to increase the effectiveness of the encephalitis warning net initiated during 1954-55.

Budget recommendations for support of the Department of Veterans Affairs have been determined largely by three factors: (1) the anticipated gain of 152 in the membership of the Veterans' Home, bringing the total to 2,058; (2) an increase in the allotment for educational assistance to veterans' dependents; and (3) a drop in enrollments but an increase in average costs under the program of educational assistance to veterans. Expenditures by the State for services to veterans will amount to \$5,740,000, an increase of \$61,000 over the present total, while \$350,000 will be provided for local service offices—the same as during other recent fiscal periods. Major construction for the Veterans' Home includes the third and final unit of the recreation center, replacement of unsafe facilities, and the construction of road and ground improvements. The total cost of

these and certain minor construction items is placed at \$890,000.

The program recommended for the State Department of Industrial Relations, charged with administering the State's labor laws and promoting the welfare of wage earners in California, is continued largely on the basis of expected change in workload, particularly in the areas of agricultural safety and labor law enforcement. The Governor's recommendation for an increase of payments under the workmen's compensation insurance law relates to trust fund operations outside the budget total.

Mental Hygiene and Corrections—\$140,454,000

MENTAL HYGIENE

California's program of active accomplishment in the field of mental hygiene is extended moderately in the budget recommendations for 1955-56. Further improvements in level of service are provided in the increased allowances for medical staff, psychologists, social workers, therapists, and ward personnel for more intensive treatment of mentally ill and mentally retarded patients. The program will be further implemented by the functioning of recently completed receiving and treatment centers at several mental hospitals.

During the next fiscal year, the State will care for an average of 48,462 resident patients in its mental hospitals, an increase of 3,000, or 6.6 percent, over the number in 1954-55. The family care program will be further expanded to permit placement of an additional 100 cases in homes, increasing to 700 the average number of cases to be supported during the year.

Initial services of the Neuropsychiatric Institute will be established in temporary quarters on the Los Angeles campus of the University and will operate in conjunction with the medical school. The small

staff will also assist in planning the permanent unit which will be built as a wing of the Medical Center.

Pursuant to Chapter 22, Statutes of 1954, the Alcoholic Rehabilitation Commission was established to investigate all phases of alcoholic rehabilitation, and report thereon with recommendations not later than October 15, 1956. The program planned for the 1955-56 fiscal year, at a cost of \$539,812, includes two clinical research centers, two exploratory service clinics for alcoholics, and an epidemiological study. In view of the period of time required to complete the medical research phase of the program, it may be necessary to seek an extension of the life of the Commission until 1959.

Recommended expenditures for support of the Department of Mental Hygiene total \$73,460,726, an increase of \$9,666,000 over the amount budgeted for the current year. This gain includes the added cost of \$3,600,000 resulting from the larger patient population, and also \$2,570,000 to cover the proposed adjustment in employee salaries. It reflects as well the provision of better care and treatment through increases in the professional staff and ward personnel.

The construction program for mental hospitals is dictated largely by the current and future growth in number of patients, and by the emphasis being placed upon research, training, and education. A total of \$20,508,613 is budgeted for capital outlay in 1955-56, substantially no change from the present building volume. Projects to be undertaken include a 248-bed unit at the Neuropsychiatric Institute in Los Angeles and an addition to Langley Porter Clinic in San Francisco, a 500-bed receiving and treatment unit at Agnews State Hospital, and ward buildings with a capacity of 1,068 beds at Patton State Hospital. There are, in addition, numerous projects to be undertaken at the several other mental hospitals.

CORRECTIONS

An average of 16,450 adult prisoners is estimated in the 1955-56 program of operations to be undertaken by the Department of Corrections—1,140, or 7.4 percent, more than during the current year. The Youth Authority, in projecting an average of 2,489 cases—215 more than in the present year, is confronted with a 9.5 percent increase. This growth in workload, coupled with the 5 percent salary adjustment, accounts for the 16.2 percent increase in the expenditures proposed for the support of adult facilities and the 13.4 percent advance shown for the Youth Authority.

The State will operate nine prisons during 1955-56—the six permanent institutions, the Medical Facility to be opened at Vacaville replacing Terminal Island and having a greater capacity, a temporary installation at San Luis Obispo, and a prison branch at Tehachapi. The additional personnel required to operate these installations and the expense of feeding, clothing, and caring for the larger number of inmates account for most of the increase in expenditures for support of the Department of Corrections. However, among other elements in the prison program are the provisions to complete the transfer of vocational education from local school district budgets to the State, improvement in the psychiatric program at San Quentin, the inauguration of a two-year pilot study of

inmate counseling at Deuel Vocational Institution, and continuation of the parole study being conducted by the Adult Authority. Support of the Department of Corrections in 1955-56 is budgeted at \$24,568,298, an increase of \$3,421,000 over the corresponding figure for the present year. Capital outlay expenditures, including new units at Soledad and Corona, an expansion of the forestry camp and prison industries programs, and additional or replacement facilities at other prisons, are budgeted at \$8,833,617—an increase of \$588,000 over the present year total.

To a great extent the program of the Youth Authority parallels that described above for adult corrections. Expanded capacity is being placed in operation this year, and there will be small additions during 1955-56. Expenditures of the Youth Authority reflect primarily this increase in capacity and the greater attention to be given to probation, delinquency prevention, and parole supervision. Support of the Youth Authority program during the coming fiscal year is budgeted at \$9,595,013, an increase of \$1,133,000 over the current level. Capital outlay expenditures are placed at \$2,141,810, somewhat below the present year's total. Principal outlay items include replacement of unsafe structures and additions to the physical plant at the Nelles School for Boys, additions to the academic school at Preston School of Industry, and temporary rehabilitation and emergency repairs at the Ventura School for Girls. Smaller projects are planned for other locations.

Conservation and Development of Natural Resources—\$71,738,000

Included in this classification are the activities of the State agencies concerned with the broad field of development, conservation, and protection of our natural resources. This extensive area of operation embraces services to the agricultural and mining industries, conservation and propagation of fish and game, operation of park and beach areas, timber and watershed protection and wildland management, water resource development and conservation, flood control, and support of agricultural fairs. Aggregate expenditures during 1955-56 for the many activities comprised under this general heading will be \$71,738,051, an increase of \$1,299,000 over the current year's total. Factors contributing most heavily to the higher costs are the \$1,359,000 attributable to salary increases and an additional \$2,262,000 required for

local flood control. Excluding these two amounts, expenditures budgeted for 1955-56 are below the current level.

To cope with the conditions created by increasing population and to make reasonable preparation for the immediate future, moderate expansion or intensification of program are proposed for several of these agencies. Among these is provision in the budget of the Department of Fish and Game for the operation of new and enlarged hatchery facilities and a new waterfowl management area. To improve fire detection and to reduce the acreage burned annually, additional fire suppression personnel are recommended for the Division of Forestry and two additional work camps are proposed for inmates of the Department of Corrections. Also recommended is the continuation of the collection and analysis of data on water supply and utilization on the Sacramento River and the Sacramento-San Joaquin Delta to facilitate the settlement of questions regarding rights to these waters.

Other changes embodied in the budget recommendations are: termination of the salinity barrier studies; an increase in the staff of the Soil Conservation Commission to assist local conservation districts and to handle the recently authorized federal program for conservation measures on upstream watersheds; and staffing for the proper operation and maintenance of beaches and parks to accommodate the continually growing attendance, already exceeding 9,000,000 annually.

Programs of the Department of Agriculture are projected at the current level with adjustments only for changes in workload and the proposed continuation of the programs to control vesicular exanthema (a virus disease of swine), to prevent the introduction of Mexican fruit flies into California's important fruit crops, and to eradicate host plants of the beet leafhopper. The Department of Agriculture, in co-operation with other governmental agencies, will conduct research and take other steps to control the recently discovered infestation of the Khapra beetle, which seriously damages stored grain. If study indicates a need for additional funds for this purpose, it may be necessary to amend the budget recommendation accordingly.

Principal projects contributing to the increase in capital outlay expenditures for beaches and parks include provision for additional facilities to increase capacity at 12 inland parks and four beaches and the acquisition of lands adjacent to State parks and beaches to round out existing holdings. The study looking toward possible acquisition of the Central Valley Project will be completed in the current year; hence no appropriation is provided for this purpose in 1955-56.

Payments to local governments for flood control represent reimbursements for expenses or obligations incurred in cooperating with the Federal Government in construction of certain authorized flood control works. State assistance in this field is generally for the costs involved in the acquisition of rights of way, flow-age rights or easements, and relocation or replacement of permanent improvements as necessitated by project construction. Based upon the anticipated work to be undertaken by the Federal Government, proposed allocations to local agencies in the 1955-56 fiscal year

are \$8,902,511, an increase of \$2,262,000 over the current year.

Fiscal Affairs—\$29,478,000

The State of California will spend \$29,477,720 in the management of its business affairs during 1955-56. Approximately two-thirds of this total represents the cost of tax collection and enforcement of the revenue laws, and one-third relates to business management—budget preparation, centralized purchasing, maintenance and operation of buildings, disbursing of funds, auditing, financial reporting, and similar activities. As shown in the accompanying table, tax collection is divided among three agencies, while management duties are assigned to four.

One of the principal recent developments in this field was the removal of liquor control as a function of the State Board of Equalization. With this move, expenditures by the Board of Equalization now relate entirely to tax matters. In order to afford an accurate comparison of Board expenditures budgeted for 1955-56 with those of the other years shown in the accompanying table, the cost of liquor control activities during 1953-54 and in the July-December period of the 1954-55 fiscal year has been eliminated.

At \$28,782,935, expenditures for support of the several fiscal agencies in 1955-56 will be \$1,841,000 more than the total for the present year. Recommended salary adjustments account for \$1,224,000 of this amount, and the remainder represents chiefly greater attention to tax auditing and increases in service activities such as the maintenance of buildings and grounds and the purchasing of supplies and equipment.

Capital outlay for office buildings and other improvements will decline from \$3,027,830 in the current year to \$694,785 for 1955-56. Several office buildings have been authorized for construction by the investment of trust funds, with repayment from the rentals to be paid by State agencies. These investments are not included in the budget totals, but the expenditures for rents and interest will be included in future budgets after the projects are completed.

Other Expenditures—\$127,799,000

A number of the expenditure items contained in the 1955-56 budget program cannot be classified satisfactorily in any of the six groups summarized above. There are, for example, the services of the Legislature, the courts, and the Governor's office which apply equally to education, highways, and any of the other broad governmental functions. Other principal items include the regulatory agencies of State government, debt service, unallocated funds available to meet emergencies and unforeseen contingencies, and several miscellaneous subventions to local governments.

The Department of Alcoholic Beverage Control is a new agency included for the first time under the classification of regulatory agencies. Responsibility for alcoholic beverage licensing and enforcement was with the Board of Equalization until January 1, 1955 and therefore the cost of this activity has previously been included with expenditures for fiscal affairs. Amendment of Section 22 of Article XX of the State Constitution transferred responsibility for alcoholic beverage control to the new Department and also made provision for the establishment of the Alcoholic Beverage Control Appeals Board. For comparative purposes the expenditures for liquor control in 1953-54 and the period July 1, 1954 through December 31, 1954 have been summarized in this section with other regulatory agencies, although the detail is shown with the budget for the Board of Equalization for the time that responsibility was with that agency. Since the Appeals Board is being created effective January 1, 1955, there are no previous expenditures and thus a portion of the increase is attributable to this new activity.

Amounts proposed for expenditure during 1955-56, together with corresponding totals for the current year and 1953-54, are shown in the following table.

EXPENDITURE TRENDS

State expenditures have risen steadily during the last two decades, except for a short period during World War II when functions were carried on with a curtailed staff and construction was pared to a bare minimum. The increase was particularly rapid after the war due primarily to four factors: (1) the surge in population growth; (2) the rise in the general price level; (3) the tremendous construction backlog which confronted the State; and (4) the improved levels of service as compared with prewar standards.

From \$219 million in 1936-37 to \$1,530 million proposed for 1955-56, total expenditures have increased almost seven fold. During the same period the number of people residing in California doubled and the income of California residents increased almost 5.5 times. Consequently, expenditures budgeted for next year amount to \$117 per capita compared with \$34 in 1936-37 and a \$39 average during the five years immediately preceding World War II. In terms of income, expenditure in 1955-56 will represent \$5.92 per \$100 received by the people of California, against a \$5.19 prewar average—an increase of 73 cents.

Day-to-day operations of State government cost \$62.1 million in 1936-37, excluding \$21.3 million for unemployment relief. The comparable total in the 1955-56 budget is \$414.5 million. The number of persons in State hospitals and correctional institutions has just about kept pace with the general population growth in California. Enrollments in State colleges, however, have far outstripped this general trend. Three new State colleges have been added and facilities of the older institutions have been expanded tremendously to provide education for more than 38,000 students compared to a little more than one-fifth that number in 1936-37. The University now enrolls 36,650 compared with 24,500 two decades ago.

A virtual revolution has taken place in the operation of mental hospitals: from mere custodial care,

the emphasis has shifted to remedial treatment with a goal of returning patients to useful, normal lives. Such treatment is costly, but it effects a long-term saving in human resources.

Many new correctional institutions have been added: facilities in the Youth Authority now total 11 compared with 3 two decades ago, and 5 more prisons are operated by the Department of Corrections.

The increase in capital expenditures has been even greater than that for state operations. Compared with a mere \$1 million spent in 1936-37 on construction other than highways, \$81.4 million has been budgeted for next year. Capital outlay for highways has risen from \$20.8 million to \$211.4 million in the course of these two decades. Highway user taxes and fees have been raised twice to provide the funds necessary to finance an accelerated highway building program for more than 6 million vehicles.

Expenditures by the State for assistance to local units of government were \$111.7 million in 1936-37—one-eighth of the \$820 million to be provided next year. Principal factors contributing to this growth include: the 2,375,000 average daily attendance of

pupils in public schools this year, compared with 1,000,000 in 1936-37; the state contribution of \$180 per unit of attendance against \$60 for elementary grades and \$90 for high school and junior college students in the earlier year; and average payments to aged of \$67 per month compared with \$32 in 1936-37.

Many new subventions have been added during this past 20-year period, particularly in the field of public health and social welfare. The State now returns to local units of government all liquor license fees collected and most of the motor vehicle license fees (withholding only those amounts needed for highway bond interest and redemption and for collection costs). In 1936-37 only half the liquor fees and 37.5 percent of the vehicle license fee revenue were returned to cities and counties.

A summary of State expenditures—total, per capita and per \$100 of income to individuals—is shown in the table below. Careful distinction should be made between the amounts shown in this tabulation and data in the corresponding analysis of tax receipts presented in the statement on revenue estimates.

STATE EXPENDITURE TRENDS AND RELATIONSHIP TO POPULATION AND INCOME

NET BONDED DEBT.....						\$659,422,592	-----

1 There is \$271,496 in the Sacramento State Building Interest and Sinking Fund in excess of the amount necessary to retire all outstanding bonds.

2 Money was transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the principal and interest on these issues to final maturity; however, \$5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the bonds.

3 Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount to meet the annual interest and redemption payments.

4 Money was transferred to the School Board Retirement Fund to pay part of the annual redemption requirements on the School Building Bonds. In addition, repayments from school districts and interest earned on the bond funds is available to pay part of the interest and redemption payments.

5 The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund and the Veterans Farm and Home Building Fund; however, in the last analysis they are general obligation bonds.

6 Callable on or after January 2, 1951, in the amount available in the sinking fund.

7 Callable on or after January 2, 1955, in the amount available in the sinking fund.

8 \$500,000 callable on or after March 1, 1971.

9 Callable on or after January 2, 1941, in the amount available in the sinking fund.

Salaries and Wages

Position Titles

In the detailed departmental and agency budgets, positions included in the state civil service have been set forth under the official class titles established herefor by the Personnel Board. Positions exempt from civil service have been listed by their departmental titles, as set forth on the official roster of employees maintained by the Personnel Board, or as maintained by the State Controller under the central pay installation.

Positions Now Authorized

In general, the positions included under this heading are those which were established as of July 1, 1954, together with those for which funds were provided in the 1954-55 Fiscal Year Budget or otherwise authorized as of that date. Amounts shown for positions now authorized represent actual salary payments for 1953-54 and estimated salary payments during 1954-55 and 1955-56, assuming full-year employment, unless the position is estimated to be established materially later than July 1st. In such cases only the cost from date of establishment is shown and the positions are so noted.

Replacement of positions at a higher level either (a) upon completion of a training period or (b) after temporarily "down grading" are included under this heading. Such transactions are indicated by showing both class titles on the same line, with a salary range of the minimum salary of the lower class and the maximum of the higher class. Examples: (a) administrative trainee-junior staff analyst, \$310-415, (b) junior-intermediate clerk, \$200-281.

Continuation during 1955-56 of positions authorized temporarily until June 30, 1955, are included under "Positions Now Authorized." These positions may be identified by an explanation in parentheses indicating the extent of the continuation, such as: (extended to December 31, 1955) or (extended to permanent).

Proposed New Positions

Proposed positions for the budget year which have not yet been established or authorized have been listed under this heading. Proposed increases in time of part-time positions are also listed under this heading, if the increase amounts to one-half time or more; otherwise the position is shown under "Positions Now Authorized" on the increased time basis.

Proposed new positions include upward replacement of positions only to extent that they involve major organizational changes.

Estimated Salary Savings

Unless indicated to the contrary by experience and anticipated conditions, a lump sum deduction is made

from each group total of salaries and wages in anticipation of savings which are estimated to accrue because of temporarily vacant positions, and the lower entrance rates of salary at which replacement personnel are paid.

The amounts of such estimated savings may not correspond to the number of positions deducted because of adjustments to the latter for positions authorized to start after July 1st. The amounts shown opposite such positions are for the estimated costs for the period of occupancy only and, therefore, there is no money savings to be anticipated.

Number of Positions

Filled positions in 1953-54 are counted to the nearest tenth of full-time and full-year employment, except for members of boards and commissions, temporary help, etc.

Authorized positions for 1954-55 and 1955-56 are counted to the nearest tenth of full time. Full-time positions authorized to start later than July 1st are counted as full positions, but the totals are adjusted for the unused time by a deduction under estimated salary savings.

All items enclosed in parentheses in the number of positions columns are excluded from position totals.

Salary Range

Rates of pay listed under this heading represent salary ranges established by the State Personnel Board for civil service, state college, and Maritime Academy classifications, or fixed by statute or by the appointing authority and approved by the Director of Finance for other exempt positions.

The amounts shown indicate (1) the minimum rate and (2) the maximum rate. The minimum of the range serves as the normal entrance rate for new appointees to any position in a class and represents the lowest rate to be paid to any employee who is considered qualified for appointment to or retention in a position. The maximum of the range represents the highest rate payable to an employee who occupies any position in the class.

Under the revised pay plan adopted by the State Personnel Board on July 25, 1947, the intermediate steps in each salary range have been fixed at a uniform percentage interval of 5 percent, except that no interval is less than \$10. This plan is used also for most salaries fixed for exempt positions. A table of salary ranges in the state service is included at the end of this section. Thus, \$220-268 indicates a monthly salary range having steps of \$220-\$231-\$243-\$255-\$268. Salary ranges for instructional positions in the state colleges and in other state agencies are set forth below.

Schedule of Usual Salary Ranges in the State Service *

Range No.	Steps					Range No.	Steps				
9	\$140	\$150	\$160	\$170	—	30	\$415	\$436	\$458	\$481	\$505

Principal Instructor, C. P. C. and Fresno ^b	—	—	—	6,672—8,940	6,672—8,940	

EXTENT OF PROFESSIONAL PREPARATION

- CLASS I** Persons whose academic or professional preparation is deemed equivalent to four years beyond high school graduation or holders of recognized bachelor's degrees.
- CLASS II** Persons whose academic or professional preparation is deemed equivalent to five years beyond high school graduation or holders of recognized master's degrees.
- CLASS III** Persons whose academic or professional preparation is deemed equivalent to six years beyond high school graduation.
- CLASS IV** Persons whose academic or professional preparation is deemed equivalent to seven years beyond high school graduation or holders of recognized doctor's degrees.

^a Based on salaries effective October 1, 1953.

^b The positions for C. P. C. (California Polytechnic College) and the Agriculture Division of Fresno State College receive, in addition to the above schedule, three steps, or approximately 15 percent, if employed for 12 months instead of the normal 10-month teaching period.

Salary Schedule for Instructional Positions—Other State Agencies

(Ranges and Criteria of Application for Teachers)

Range	Steps				
A	\$341	\$358	\$376	\$395	\$415
B	358	376	395	415	436
C	376	395	415	436	458
D	395	415	436	458	481
E	415	436	458	481	505
F	436	458	481	505	530

CRITERIA FOR RANGE DETERMINATION

Range A Provisional or special credential, without bachelor's degree.

Range B Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential.

Range C Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 12 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential.

Range D Bachelor's degree or regular elementary, junior high, or kindergarten-primary credential; plus 24 upper division or graduate units which were not counted toward degree or which were taken subsequent to obtaining credential or regular secondary credential.

ACADEMIC (Preparation)

VOCATIONAL (Preparation)

Three years' experience as journeyman craftsman.

Qualification for special secondary vocational Class A Credential in T and I and PS Education.

Ranges

E and F Used only for "incentive increases" when a teacher receiving less than Range F completes at least six units in college level courses approved by his department and taken after appointment. He shall then be entitled to advance to the corresponding step in the next higher salary range for the class, and such an advance shall be known as an "incentive increase."

Merit Salary Adjustments

Subject to availability of funds, Section 18854 of the Government Code requires that each employee in the civil service receive an increase of one intermediate step in his salary range during each year in a position in which his service rating is equal to or above a reasonable minimum, which has been fixed by the Personnel Board as "Standard."

Employees in salary ranges with a maximum step of \$415 and below and who have received permanent appointments may receive an increase from the first step to the second step of their salary range upon completing six months of qualifying service as defined by Personnel Board rules. In addition, employees in salary ranges with a maximum step of \$243 may receive a further increase from the second step to the third step upon satisfactorily completing the second six months of continuous employment.

Provision for the salary adjustments to which present employees will become entitled during the balance of the current year and in the budget year has been included in the amounts shown opposite each position or group of like positions. Inasmuch as turnover of personnel generally results in replacement at a lower step in the salary range, the amount budgeted for salary adjustment opposite each position is offset by a lump sum deduction for downward adjustments included in the deduction for "estimated salary savings."

Similar amounts for salary adjustments have been provided for exempt positions, where requested by the agency. Such adjustments have been computed in accordance with the salary schedule in effect for the respective positions.

Salary Range Adjustments

In determining the appropriate salary level for a class, a number of factors are taken into consideration by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work, and pay differentials based on differences in the kind, difficulty, and responsibility of the work.
3. Conditions of work in the class.
4. The adequacy of existing appropriations which may be used for salary increase purposes.

The rates of pay of a group of approximately 1,500 laborers, tradesmen, and mechanics in the state service are established at the hourly wage rates negotiated by unions with private employers in the county in which they are employed. They receive all the collateral benefits, such as premium pay for night work, travel time, and overtime received by employees in private industry and, in addition, they receive the added state benefits of vacation and sick leave with pay, plus 5 cents and 10 cents an hour increase after one and two years' employment with the State.

The salary ranges shown are those in effect on December 1, 1954, and salaries and wages expenditures for both the 1954-55 and 1955-56 Fiscal Years reflect rates of pay then in effect. Statutory salaries are provided for at rates inclusive of enactment by the 1953 Legislature (Chapter 1613, Statutes of 1951, Statutory Salary Equalization Plan, and other special enactments).

19					
20	GENERAL ANALYSIS				
21					
22	Number of positions-----	47.3	47	47	-
23					
24	The decrease in total expenditures results principally to the decrease in the number of days during which the Legislature will be in session. Expenditures are more comparable to those of the 1953-54 Fiscal Year. Generally, provision is made to render the same level of service as that provided in the 1953-54 Fiscal Year with no major items of increase.

GENERAL ANALYSIS

Provision is made for attendance of the commissioners at meetings of the national conference and California's contribution to that conference. The proposed Uniform Commercial Code will be submitted to the Legislature at the 1955 Session and the services of the counsel as well as related expenses will no longer be required after adjournment.

JUDICIAL COUNCIL

The Judicial Council surveys the condition of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.

Governor's Office

OFFICE OF CIVIL DEFENSE

Pursuant to Chapter 1, Division 7, Military and Veterans Code, as amended (Civil Defense Act of 1950) the Governor has assigned the duties thereunder to personnel in his office, known and referred to as the Office of Civil Defense. This office is responsible for coordinating the plan and program for the civil defense of the State.

GENERAL ANALYSIS

Number of positions----- 121 116.1 120.6 4.5

The principal increase involves the proposed extension of the present radiological services for disaster preparedness to include responsibilities with respect to peacetime radiation protection. The budget provides for increasing the present staff of 13.5 positions to 18 to implement recommendations of a special study committee to the Senate Special Committee on Governmental Administration transmitted October 1, 1954.

Provision is also made for relocation of stockpiled supplies and equipment; maintenance of the headquarters building under a contract with the California Highway Patrol; and additional costs for maintaining equipment being acquired during the current year.

1	RADIATION PROTECTION SERVICE						
4	This unit is currently charged with responsibility to develop plans and an organization for minimizing radiation hazards incident to and following atomic attack.						
6	The proposed budget reflects the extension of this service to include responsibilities with respect to peacetime radiation protection. The new activities would include establishment of practices in the transport, storage, use and disposal of sources of ionizing radiation which will afford maximum protection to health, safety and welfare; establish and maintain a registration of radioactive sources throughout the State; and to coordinate radiation protection programs of federal, state, and local agencies within the State.

^a Composed of savings in salaries and wages, \$777; operating expenses, \$639; and equipment, \$90.

^b Composed of savings in salaries and wages, \$1,284.

^c Salary increased by Chapter 1613, Statute of 1951. Effective date delayed until January 3, 1955, by Section 22, Art. V of the Constitution.

STATE EMPLOYEES' RETIREMENT SYSTEM

Administers the State Employees' Retirement System and the Legislators' Retirement System. This involves determination of membership, computation, collection, and recording of employer contributions and member contributions, service and compensation; the computation and payment of withdrawals of member contributions and death and retirement benefits, including retirement for service, ordinary and industrial disability and industrial death; the investment of funds; the preparation of periodic and special valuations, the preparation of annual and special reports.

Members of the State Employees' Retirement System consist of state employees (including most university employees) and employees of approximately 330 local governmental jurisdictions participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

The Board of Administration has been charged with the recording of pay roll deductions for state employees who request deductions for the purchase of United States Defense Savings Bonds; and the registering and issuance of bonds so purchased, to state employees.

Office at Sacramento

19	TOTAL EXPENDITURES FOR SUPPORT	\$284,768	\$324,430	\$292,780	
20	GENERAL ANALYSIS				
21	Number of positions	126.4	130.7	133.2	2.5
22	Provision is made for increasing work load with the addition of two clerical positions. Adjustments have been made in 1954-55 to provide for an unanticipated increase in membership. A change in procedure for processing United States Savings Bonds was effective December 1, 1954.				
23	A reduction in estimated reimbursements is the result of the reduced unit cost per member from \$5.25 to \$5.				
24	The estimated growth of the agency is indicated by data in the following table:				
25	WORK LOAD				
26	Membership (end of year):	ACTUAL	ACTUAL	ACTUAL	ESTIMATED
27	State members	1951-52	1952-53	1953-54	1954-55
28	Contracting agency members	62,848	66,335	72,185	77,885
29	Subtotal Membership	50,970	56,523	63,681	67,115
30	Retired members (end of year)	113,818	122,858	135,866	145,000
31	Total Members and Retired Members	6,639	7,720	9,011	10,871
32	Memberships terminated (by withdrawal)	120,457	130,578	144,877	155,871
33	Deaths	17,346	18,349	17,138	18,000
34		474	485	526	576
35					616

^a Composed of savings in salaries and wages, \$4,775; operating expenses, \$3,299; equipment, \$6; and excess reimbursements, \$4,511.

^b Composed of savings in salaries and wages.

PERSONNEL BOARD

Administers the State Civil Service Act and prescribes and enforces rules thereunder. Examines and certifies qualified applicants for appointment to the State Civil Service. Creates, classifies and adjusts classes of positions and adopts suitable pay rates. Maintains records on approximately 60,000 state employees. Assists state agencies in training employees. Performs services for state agencies excepted from civil service and for political subdivisions of the State on a reimbursable basis. Establishes standards of health and safety in state agencies.

GENERAL ANALYSIS

13	Number of positions-----	322.6	337.4	338.7	1.3
14	Provision is made for continuing the existing level of service. Two technical positions have been added to absorb the increased work load. It is anticipated that the Sacramento offices will move from the present leased location to the new state office building at 801 Capitol Avenue during 1954-55.				
15	The budget also reflects a major change in organization effective July 1, 1954. The new organization provides for an Operations Division to handle classification, pay, and examinations on a generalist basis in lieu of three separate divisions, each specializing in its respective field for day-to-day activities. A Standards and Surveys Division will handle the detailed classification and pay surveys. The examination unit will conduct oral interviews and establish examination standards and techniques.

1							
2	CLASSIFICATION						
3							
4	This division, which formerly had the responsibility of classifying positions in accordance with duties performed and maintaining a						
5	roster of all state employees, was abolished July 1, 1954. Under the departmental reorganization of that date the responsibilities						
6	named above were split and transferred to the Standards and Surveys Division, Operations Division, Office Services Division						
7	and Training, Safety and Medical Services Division.						
8							
9	Analysis						
10							
11	SALARIES AND WAGES: One senior personnel analyst, four associate personnel analysts and one assistant personnel analyst were						
12	transferred to Operations Division. The nurses were transferred to Training, Safety and Medical Services Division. The roster						
13	personnel were transferred to Office Services Division. Balance of personnel were transferred to Standards and Surveys Division.						
14							
15	OPERATING EXPENSES: Office and Printing have been transferred to Office Services and the balance are transferred to Stand-						
16	ards and Surveys Division.

29							
30	EXAMINING AND RECRUITING						
31							
32	This division recruits and conducts certification activities for civil service employees and is responsible for conducting the oral examination program, the development of written examination materials and the maintenance of quality standards in examination work.						
33							
34							
35	Analysis						
36							
37	The increase is due primarily to a new position which was added to handle the increased interviewing work load. A small reduction in rent will result when examination rooms become available in the new building.						
38							
39

14	Totals, Training, Safety, and Medical Services				\$43,349	\$81,838	\$82,606
17	COOPERATIVE PERSONNEL SERVICES						
19	The operations of this division are governed by requests of local agencies for personnel services which are performed on a contract basis by which cost is to be reimbursed and therefore no increase in the net appropriation is required for this function.						
23	Analysis						
24	OPERATING EXPENSES: Increase due to increased rental cost with agency moving into larger quarters in the new building.						
27	SALARIES AND WAGES

SECRETARY OF STATE—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	ADMINISTRATION						
2	Analysis						
3							
4							
5							
6	SALARIES AND WAGES: The increase is due primarily to three new positions added during 1954-55 and included for the full						
7	year in 1955-56. This is partially offset by a reduction in temporary help.						
8							
9	OPERATING EXPENSES: The decrease is due to the elimination of election materials and a reduction in the amount of photostat						
10	work received from other state agencies.						
11							
12	EQUIPMENT: The principal item is the replacement of an automobile at a cost of \$4,250.						
13							
14	SALARIES AND WAGES				SALARY RANGE		
15	Secretary of State	1	1	1	\$1,167	\$13,000 ^a	\$14,000

DEPARTMENT OF AGRICULTURE

Administers and enforces the provisions of the Agricultural Code and related statutes. These laws call for regulatory and service activities dealing with the protection of plantings and livestock from infectious diseases, pest animals, weeds and injurious insects, and with aids to insure the marketing of quality agricultural products. In this broad field of activity the department cooperates extensively with the United States Department of Agriculture on the one hand and with county agricultural service on the other. The General Fund finances activities which are of general public benefit and the Department of Agriculture Fund finances other activities for which the beneficiaries are charged.

59					
60	Number of positions—General Fund	743	773.8	779.3	5.5
61	Number of positions—Department of Agriculture Fund	473.4	483.8	486.3	2.5
62					
63	The programs and activities of the Department of Agriculture are projected at the current year level with adjustments for work				
64	load changes and to provide for continuation of the vesicular exanthema and Mexican fruit fly control programs. In most func-				
65	tions increased rental cost reflects the adjustment of this item of expense for space assigned in the department's new quarters				
66	in Sacramento.				
67					
68	^a Extension of availability proposed in Budget Act of 1955.				
69	^b Available until September 8, 1956.				
70	^c Composed of savings in salaries and wages, \$103,257; operating expense, \$55,504; equipment, \$26,545; and decrease in reim-				
71	bursements, \$3,568.				
72	^d Composed of savings in salaries and wages, \$54,882; equipment, \$18,395; and decrease in reimbursements, \$3,500.

49	CHERRY FRUIT FLY ERADICATION						
50	Analysis						
51	The cherry fruit fly infestation is at present restricted to Siskiyou County. The close of the current season completes the series of treatments of the major area of the project, however, in midseason another area was brought in because of the discovery of an infestation of cherry fruit fly in the City of Yreka. The new infested area will require less insecticides because of the reduced number of host trees to be treated. The reduction in over-all cost in the budget year is due to reduced personnel requirements for operations in the Yreka area. The operations in the original major infested area will continue with intensive trapping and field inspection.

67	MEXICAN FRUIT FLY SURVEY AND TREATMENT						
68							
69	Analysis						
70							
71	To continue surveys and control measures near the Mexican border in San Diego and Imperial Counties to prevent the introduction						
72	of the Mexican fruit fly. This program was undertaken during the current fiscal year because of the discovery of infestations ad-						
73	ja-cent to California's border and the subsequent trapping of a specimen within the State. The fly species involved is a major						
74	pest of grapefruit, oranges, apples, peaches, pears, and plums on the mainland of Mexico, and its establishment in California						
75	would pose a serious threat to California agriculture.

31	BUREAU OF PLANT QUARANTINE						
32							
33	Analysis						
34							
35	This bureau is charged with the enforcement of the provisions of the Agricultural Code, regulations of the Director of Agriculture and the U. S. Department of Agriculture pertaining to plant quarantine. In addition to directing the plant quarantine activities of the 53 county agricultural commissioners' offices and supplying them with the necessary forms, seals, and similar material, to carry out such activities, this bureau maintains 17 border stations on the interstate highways entering California, three maritime port stations at San Francisco, San Pedro, and San Diego, and the headquarters office at Sacramento. Maritime shipping and airplane arrivals have increased slightly during the past year over the previous year; border travel has shown an 11.3% increase during this period. The program is projected at the same level during the current and budget years.

40	BUREAU OF PLANT PATHOLOGY						
41	Analysis						
42	The work of the Bureau of Plant Pathology is concerned with the infectious and contagious diseases of plants, such as those caused						
43	by bacteria, fungi, viruses, and plant parasitic nematodes, as distinguished from insect pests. It includes the prevention of the						
44	introduction and spread of serious and destructive new diseases, their detection when they become introduced, and their sup-						
45	pression and eradication when outbreaks occur. The bureau cooperates with the county agricultural commissioners and the						
46	United States Department of Agriculture in these functions. The program for this function in the budget year is planned on						
47	substantially the same basis as for the current year.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1							
2	BUREAU OF LIVESTOCK DISEASE CONTROL						
3							
4	This function is concerned with the control of infectious and contagious diseases of livestock and poultry; the operation of the state-						
5	wide bovine brucellosis, bovine tuberculosis and vesicular exanthema control programs; and the operation of diagnostic						
6	laboratories at Sacramento, San Gabriel, Petaluma, Turlock, Fresno, and Lancaster.						
7							
8	Analysis						
9							
10	A program for eradication of vesicular exanthema, a virus disease of swine, was begun under a state regulation which became						
11	effective on March 19, 1954. The first phase resulted in the release of the northern 21 counties from the federal quarantine and						
12	on October 1, 1954, the program was expanded to include the remaining 37 counties in the nonquarantined area. This program						
13	will require the continuation of five positions of livestock inspectors and two intermediate typist-clerks in the 1955-56 year.						
14	A position of supervisor of laboratories is proposed to direct and coordinate the activities of the diagnostic laboratories. It is recom-						
15	mended that this position be established by reclassification of a veterinarian III position and that the latter position be						
16	replaced with a position of veterinarian I. Also proposed is one intermediate stenographer-clerk for clerical assistance to the						
17	new supervisor of laboratories.						
18

21	GENERAL MARKETING SERVICE						
22							
23	Analysis						
24							
25	This service consists of: assistance in the solution of marketing problems of agricultural groups which are not organized under						
26	formal marketing laws; assistance to new industries in formulating and obtaining marketing programs under the general						
27	marketing laws; and administration of the marketing programs formulated under general marketing laws.						
28	The General Fund is reimbursed for all expenditures for the latter two types of the services from deposits received and assessments						
29	collected. This program is projected at the current level in the current and budget years, although, on the basis of information						
30	available, it seems certain that a number of new marketing programs will be developed during this period.

21	BUREAU OF MARKET NEWS						
22							
23	Analysis						
24							
25	The Bureau of Market News operates in California under a cooperative agreement with the United States Department of Agriculture						
26	under the title of Federal-State Market News Service. The costs are borne so far as practicable on an approximate fifty-fifty						
27	basis. Daily reports are published on the marketing of agricultural commodities in intrastate, interstate, and foreign markets.						
28	These reports contain current data on prices, market conditions, demand, supply, truck and carlot movements inbound and out-						
29	bound, daily truck unloads in terminal markets, cold storage holdings and other related information. Commodity groups included						
30	in this service are fresh fruits and vegetables; livestock and dressed meat; dairy and poultry products; hay, grain and feedstuffs;						
31	dried fruits; olive oil; bulk wine movement in carlots interstate, winery prices to growers, and a current census of grape crush						
32	tonnage; honey; dried edible beans; hops; rice; and other miscellaneous products. Provision is made in the 1954-55 and 1955-56						
33	years for one assistant marketing specialist and one intermediate typist-clerk to continue at the South San Francisco stockyards						
34	a market news service authorized in 1953-54 by Chapter 1520, Statutes of 1953.						
35	Provision is also made in the 1954-55 and 1955-56 years for one senior marketing specialist, one intermediate typist-clerk and one radio-						
36	telegraph operator, Grade I, for the operation of a new fruit and vegetable market news office at Stockton established pursuant to						
37	a legislative augmentation of the budget for the 1955-56 Fiscal Year.						
38	One new assistant marketing specialist position is recommended to relieve the chief and assistant chief of routine, technical duties						
39	which they have had to perform as a result of substantial increases in activities during the past several years but for which						
40	no additional personnel has been provided in the bureau's headquarters office.

51	BUREAU OF LIVESTOCK IDENTIFICATION						
52	Analysis						
53	This bureau registers livestock brands; inspects cattle and hides for protection of cattle owners against theft; licenses and regulates public cattle salesyards and slaughterhouses; issues horse transportation licenses; cooperates with county and state law enforcement agencies in collecting evidence and prosecuting violators of the Hide and Brand Law; issues weekly bulletins on lost, strayed or stolen animals; seizes and sells estrays as provided in the Estray Law. One additional intermediate stenographer-clerk is recommended for increased volume of work due to increase in number of brands, brand imprint records, and correspondence.

49	BUREAU OF MILK CONTROL						
50	Analysis						
51	The Bureau of Milk Control administers and enforces the California milk control statutes relating to the establishment of minimum						
52	prices for fluid milk and fluid cream and fair trade practices in the marketing of milk and other dairy products. The bureau also						
53	administers the Dairy Produce Exchange Act and the California Dairy Industry Advisory Board Act.						
54	The California Milk Control Act provides for the establishment of milk marketing areas, and today there are 37 separate areas						
55	where minimum producer and minimum resale prices are established. The bureau is also required to license market milk distribu-						
56	tors and secure bonds guaranteeing payment to producers. It is proposed to continue the advertising and trade stimulation pro-						
57	grams for the Sacramento and the Alameda-Contra Costa marketing areas, the cost being defrayed from additional assessments						
58	levied in these areas.						
59	Additional personnel approved for the current year accounts for the major portion of the current and budget year increase over the						
60	past year.

67	BUREAU OF SHIPPING POINT INSPECTION						
68							
69	Analysis						
70							
71	This bureau in cooperation with the U. S. Department of Agriculture, makes inspections and issues federal-state certificates covering pack, size, quality, condition and grade of fruits, nuts, and vegetables based on U. S. standards or other recognized standards. This service is optional, self-supporting, and is furnished at request of shippers, growers or other financially interested parties. It is also required by certain marketing control boards, to show compliance with established standards. The income and expenditures are governed by the volume of products offered for inspection. It is expected that the volume of work will continue at approximately the same level as in the current year.

Department of Agriculture

CALIFORNIA DAIRY INDUSTRY ADVISORY BOARD

The California Dairy Industry Advisory Board, made up of industry representatives, provides the means for the dairy industry to develop, maintain, and expand markets for California dairy products. The board acts in an advisory capacity to the Director of the Department of Agriculture, who is the administrative and enforcement officer. The program is supported by assessments on producers and processors of dairy products. This assessment is made at a uniform rate for each pound of milkfat produced or processed.

GENERAL ANALYSIS

Number of positions ----- 11 9.8 12.8 3

The 1955-56 program is based on continuation of the random sample egg laying test with 50 entries competing. The random sample chicken meat production test will continue with 25 entries, and will increase from 100 to 200 birds. The standard net income test was discontinued as of September 15, 1954. A cage plant is proposed to supplement the floor managed birds in the random laying test beginning July 1, 1955. Operating expenses and revenues have been adjusted to reflect the revised testing program. The budget anticipates that the random sample turkey test site will be obtained in the near future and the positions authorized for this test will be established January 1, 1956.

DEPARTMENT OF CORRECTIONS

The department has been established to integrate and correlate the correctional activities of the State. It is responsible for administrative control and operation of all state institutions for adult felons. The department also inspects prisons and jails and makes recommendations on plans and specifications of facilities.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS

The 1955-56 budget is based upon an average institutional population of 16,450, an increase of 7.4 percent over the 1954-55 revised population and a 1955-56 average active parole population of 6,716, an increase of 9.4 percent.

Increased capacities planned during 1955-56 include expansion of the Temporary Facility—California Men's Colony at San Luis Obispo to 1,000, the Medical Facility at Vacaville to 1,350, and the Institution for Men Branch Unit at Tehachapi operating 12 months at 500 capacity.

The total increase of \$2,689,359 or 12.7 percent over 1954-55 is largely the result of increased personnel to operate expanded facilities and population increase. Other additional positions are needed to complete the transfer of education instructors, most of which are vocational, to the support budget from the school district pay rolls. The 1955-56 budget also proposes the installation of a uniform inmate clothing ration at San Quentin, Soledad, and Deuel Vocational Institution. The 1955-56 budget proposes 246.2 new positions amounting to \$1,001,001. 128 of these are in the medical facility (Vacaville) and the men's colony (San Luis Obispo). New position and other proposals are discussed under individual agencies with the exception of the following COMPLEMENT POSITIONS and proposals which are common to several institutions and are discussed below:

A. 29 ADDITIONAL EDUCATION POSITIONS.....\$154,716

These positions are proposed to complete the transfer of vocational instructors from the school district pay rolls to the prison support budgets, to provide a minimum instructional staff at new facilities such as the Tehachapi branch of Chino and the California Men's Colony at San Luis Obispo, and to provide instructors in behavior adjustment in the Reception-Guidance Centers for the orientation of new inmates in acceptable prison life. Salaries budgeted from transfer instructors are generally comparable to those received under the local school districts.

In 1955-56, as in 1954-55, this transfer plan will cost the State more than the state salary of the instructors, inasmuch as the State, under Chapter 1510, Statutes of 1953, must also pay the school districts on the basis of actual average daily attendance during 1954-55. After the transfer has been completed and has been in operation for more than one year, the State will save money, inasmuch as only the actual salary of the instructor will be paid rather than \$180 per average daily attendance, of which a maximum of \$148 is paid to the local school district and \$32 remains in the State School Fund to be expended as equalization aid. Furthermore, an integrated vocational education program under the prison warden would coordinate better with the prison work day and maintenance program and would prepare the inmates for earlier and better parole job placement.

4 Instructor in behavior adjustment..... 20,928

These transfer positions for the Reception-Guidance Centers at Chino and Folsom are proposed in addition to the vocational positions to provide an orientation program for new inmates in order to effect a better behavior personality adjustment to prison life through guided class discussion groups. Position requirements are computed as follows:

	Chino	San Quentin
Annual intake	2,750	2,950
Total hours—group sessions	30 ^a	30 ^a
Total man-hours	82,500	82,500
Inmates per class	25	25
Class hours	3,300	3,300
Annual hours per instructor	1,824	1,824
Instructors required	1.81 or 2	1.94 or 2

25 Vocational instructor

A comparison of costs on the requested vocational positions is as follows:

	Proposed Budget Cost	Estimated A.D.A. Cost	Estimated Future Annual Savings
Medical Facility			
1 Vocational instructor	\$5,232	\$7,200	\$1,968
Institution for Men			
2 Vocational instructor	9,480	14,400	4,920
1 Vocational instructor (Reception-Guidance center)	4,740	7,200	2,460
1 Vocational instructor (Tehachapi Branch Unit)	4,740	7,200	2,460
Folsom			
7 Vocational instructor	36,132	50,400	14,268
San Quentin			
13 Vocational instructor	73,464	112,450	38,986
Totals, Vocational Instructors	\$133,788	\$198,850	\$65,062
4 Instructor in Behavior Adjustment	20,928	28,800	7,872
Totals, Educational Positions	\$154,716	\$227,650	\$72,934

As indicated in the above comparison, the 1955-56 budget will involve a total cost of \$382,366 with future annual estimated savings of \$72,934 in 1956-57 and thereafter.

^a Equivalent hours of 3-unit college course (3 hours per week for 10 weeks.)

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

- B. 3 Correctional sergeant (relief for instructor in physical education) \$12,888

One for Temporary Facility—California Men's Colony, one for Soledad, and one for the Deuel Vocational Institution. These positions are proposed to provide regular days off, vacation, and sick leave relief on a post assignment basis, for institutions having only one such instructor position, except Institution for Women.

The recreation and physical education function involves both planning and instruction in intramural and extramural sports as well as other recreational activities for a large number of inmates of various treatment groups. The program is often conducted 12 hours per day, seven days per week, and still contemplates the use of inmates as group leaders. The program is a strong element in the rehabilitation of inmates.

- C. 15 ADDITIONAL CLASSIFICATION AND PAROLE POSITIONS 40,800

These additional positions are proposed in accordance with the work load survey completed in December, 1953, and approved in the 1954-55 budget. The one additional parole officer I for Deuel is proposed on the basis of estimated increase in intake plus releases of from 2,776 in 1954-55 to 3,090 in 1955-56, an increase of 11 percent.

The proposed new positions will be allocated as follows:

Parole officer I (one each at the California Men's Colony, Medical Facility, San Quentin, and Deuel Vocational Institution.
Intermediate typist-clerks (four at California Men's Colony, one at Folsom, three at Medical Facility, two at San Quentin, and one at Soledad.

- D. 3 Additional Reception-Guidance Center positions 10,956

The following positions are proposed for increased total annual intake in accordance with the work load table outlined below:

1 Senior sociologist at San Quentin	\$4,980
1 Intermediate typist-clerk at San Quentin	2,988
1 Intermediate typist-clerk at Chino	2,988

The comparative annual intake is as follows:

	Actual 1953-54	Revised 1954-55	Budget 1955-56
Chino	2,388	2,647	2,750
San Quentin	2,728 ^b	2,869 ^b	2,950 ^b
Deuel	517	1,080	1,100
	5,633	(6,596)	(6,800)

Additional requested		1		1		—	

- E. PROPOSED INMATE CLOTHING RATION 72,554

It is proposed for 1955-56 to place into effect a standardized inmate clothing ration in three institutions, San Quentin, Soledad, and Deuel, to effect a more economical and complete clothing distribution in these institutions, as well to provide an improved method of expenditure and budget control. Separate rations will be effected on the basis of inmate classification and work assignment comprising eight issues in all. In the past, clothing inventories have been seriously depleted in times of population increase.

The changes in cost for the three institutions are as follows:

	Present clothing budget 1955-56	Clothing ration 1955-56	Difference
San Quentin	\$194,334	\$259,600	\$65,266
Soledad	100,353	129,766	29,413
Deuel	79,502	57,377	—22,125
Total	\$374,189	\$446,743	\$72,554

^a This one clerical position above case work load, approved in the 1954-55 Budget, is required for reports of psychiatrists and for correspondence with about 47 individual northern counties in order to secure necessary legal information.

^b Includes parole violators received.

44	TOTAL EXPENDITURES-----	\$649,130	\$728,969	\$760,134	\$31,165
45					
46	GENERAL ANALYSIS				
47					
48					
49	Number of positions-----	64	67.8	69.3	1.5
50					
51	The administrative staff supervises and coordinates the following functions: (1) Accounting, budgeting and business management;				
52	(2) personnel and in-service training of employees; (3) maintenance and upkeep of plant and constructions; (4) feeding and				
53	nutrition; (5) custody and treatment; (6) prison industries; (7) compilation and dissemination of crime study data.				
54					
55	SALARIES AND WAGES: The increase of \$18,422 is principally due to full-year cost of authorized positions, merit salary ad-				
56	justments, and the following new positions:				
57	1 Senior account clerk (business office)-----				\$3,456
58	This position is proposed to meet the increased work load in the budget section of the business office.				
59	1 Intermediate clerk (records office)-----				2,844
60	One additional position is proposed to meet the 9% increase in work load specifically affecting the central				
61	inmate files.				
62					
63	OPERATING EXPENSES, EQUIPMENT: The increase in the current year is primarily due to printing the biennial report of				
64	the department at a cost of \$2,000. The continued high cost of printing provides for follow-up reports on the crime commis-				
65	sion and the five-year summary of California prisoners.				
66					
67	OTHER CURRENT EXPENSES: Transportation of inmates: The increase is due to a 25% increase over the past year in the				
68	receiving of inmates and an estimated increase in costs due to Board of Control amendment to Rule No. 646, which has the				
69	effect of adjusting 1930 rates to 1953 level.				
70	Returning fugitives from justice from outside the State: The increase is due to an estimated increase in inmate and parole popu-				
71	lation.				
72					
73	^a Composed of savings in salaries and wages, \$2,038; operating expenses, \$959; and equipment, \$46.				
74	^b Composed of savings in salaries and wages, \$5,733; and operating expenses, \$3,075.				
75	^c The amounts allocated are reflected as expenditures in the several institutions.

Department of Corrections

MEDICAL FACILITY

This institution cares for and treats inmates who are mentally ill, including psychopaths and sex offenders, and those suffering from chronic diseases.

Located Near Vacaville, Solano County

30					
31					
32	GENERAL ANALYSIS				
33					
34	Number of positions-----	206.6	277	337.5	60.5
35					
36	POPULATION AND UNIT COSTS				
37	Average inmate population-----	1,088	960	1,185	225
38					(23.4%)
39	End of year population-----	(1,116)	(700)	(1,350)	(650)
40	Cost per inmate-----	\$1,356	\$1,729	\$1,963	\$234
41					(13.5%)
42					
43	Most of the increased cost is due to additional positions to staff the new institution and full year cost of new 1954-55 positions.				
44	The present staffing was mainly based on information obtained from blueprints. Now that the actual structures are virtually				
45	completed, it appears necessary to make substantial changes in the staffing pattern. Two new units of 120 capacity each will				
46	be activated in 1955-56.				
47	The new Medical Facility at Vacaville will be available for occupancy about March 1, 1955. This will result in occupying the new				
48	quarters before they are entirely completed. By the fourth quarter of 1955-56, facilities to house about 1,350 are expected to be				
49	available. The new institution has been constructed more along the lines of a hospital than a typical prison. Instead of tier-type				
50	construction in the cell blocks, solid floors separate the three-story structures. This factor and other architectural features nec-				
51	essary in a hospital, complicate the custodial coverage, and more custodial positions than are normally expected are necessary.				
52	Also, the new institution covers a great deal more area than does the facility now in use at Terminal Island.				
53					
54	SALARIES AND WAGES: The increase of \$415,593 is mostly due to 61.5 new positions to staff the Vacaville facility, and the full-				
55	year cost of salary range increases. Complement positions are discussed under the general analysis in the departmental summary.				
56	The 56.5 miscellaneous positions are explained below:				
57					
58	1 Institution food administrator I (dietitian)-----				\$4,296
59	The 240 special diets at Terminal Island are expected to increase to 448 at Vacaville. One position				
60	is proposed to organize and supervise the large special diet program in a hospital institution of				
61	this size.				
62	1 Supervising cook I-----				3,810
63	This is proposed to furnish some relief for the above position and complete the relief for the present				
64	staff.				
65					
66	^a Composed of savings in salaries and wages, \$8,679; operating expenses, \$3,186; equipment, \$2,149; inmate pay-work projects, \$436;				
67	and loss in reimbursements, \$7,261.				
68	^b Composed of savings in salaries and wages.

MEDICAL FACILITY—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5	1 Butcher and meat cutter II				\$3,810
6	This position is proposed to provide full-time meat-cutting service and supervision for an institution				
7	increasing to 1,350 inmates.				
8	38 Correctional officers				128,589
9					
10	1 Position for Control Office				
11		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
12	Sergeant (Control Office)	1	1	1	
13	Correctional officer (Control Office)	—	1	1 ^a	
14					
15	This will allow for one sergeant and one correctional officer to be stationed in the control room, for				
16	16 hours per day. This is the nerve center of the institution, controlling and recording all inmate				
17	movements, counts, security reports from all posts. It controls entrance and exit through the main				
18	sally port and the visiting room which are adjacent to the control office.				
19					
20	1 Position for Kitchen and Mess Hall				
21					
22			Shifts		
23		6 a.m.-2 p.m.	11 a.m.-7 p.m.		
24	Sergeant	—	1	1	
25	Correctional officer	—	1	1	
26				1 ^a	
27					
28	This proposed additional position would allow two officers for each of the two shifts and one sergeant				
29	who would overlap the two officer shifts for over-all supervision. This plan has been effective in the				
30	other institutions, and would require the downgrading of one sergeant post to that of a correctional				
31	officer and adding one more correctional officer post.				
32	1 Position for the Inmate Visiting Room				
33	The present post assignment includes one correctional sergeant for the visiting room. However, due				
34	to the design of the visiting area in the new institution it is necessary to have one position in the				
35	visiting waiting room for proper supervision of visiting, shakedown, and inspection before and after				
36	the visit. This position will also serve the visiting room for the Reception-Guidance Center when				
37	activated.				
38	2 Positions for first floor corridor control				
39					
40			Shifts		
41		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
42	First floor corridor control	1	1	2	
43	First floor corridor control	—	2 ^a	—	
44					
45	The main sally port and the main corridor gate officer located at opposite ends of the long (890-foot)				
46	first-floor main corridor, together with the one corridor officer now established, cannot provide the				
47	coverage needed during the day watch, which involves much inmate traffic due to visiting, exercise periods				
48	of tubercular and psychiatric patients. This additional post is proposed to provide adequate coverage.				
49	1 Position, service corridor and sally port.				
50	A right angle (480-foot) corridor extends south from the main first floor corridor. This corridor serves				
51	the service entrance to the kitchen, commissary, laundry, clothing, the chapels, maintenance and vocational				
52	shops and rear sally port. The main sally port officer's duties prohibit him leaving his post				
53	for extended periods. This officer will control the entrance and exit from these several areas, the control				
54	of all inmate movement to and from these areas and the supervision of the rear sally port five				
55	days per week.				
56	5 Positions, increase in coverage in housing to Units L, M, and Q.				
57					
58			Shifts		
59		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
60	Building L, all floors	1	1	1	
61	Building M, all floors	1	1	1	
62	Building Q, all floors	1	1	1	
63					
64	The above indicates that nine positions plus 5.4 positions have been allowed for coverage in buildings				
65	L, M, and Q. The proposed coverage would be as follows:				
66					
67			Shifts		
68		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
69	Building L and M, first floor	1	1	1	
70	Building L and M, second floor	1	1	1	
71	Building L and M, third floor	1	1	1	
72	Building Q, first floor	1	2	2	
73	Building Q, second floor	1	2	2	
74	Building Q, third floor	1	2	2	
75					
76	Subtotal	4	5	5	
77	Less posts provided	—3	—3	—3	
78

MEDICAL FACILITY—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5	Originally it was planned to supervise each of the buildings L, M, N, P, and Q with one correctional				
6	officer on each watch for all three floors, i.e., (one officer to cover the total building working up and				
7	down the stairs on all three solid floors).				
8	A much more feasible and workable plan of operation resulting in better supervision and custody and				
9	working within the scope of one officer's span of control is to have each officer cover two wings on the				
10	same floor, working back and forth across the corridor in wings L and M, and N and P on all watches.				
11	Wing Q being a close custody operation would use two officers on three floors on the second and third				
12	watch but may be handled by one officer for all three floors during the first watch.				
13	This will change the coverage by each officer in wings L, M, N, and P from 120 patients to 80 patients				
14	and in wing Q on the second and third watches to 60 close custody patients per officer.				
15	9 Positions for new housing Units N and P (effective October 1, 1955).

MEDICAL FACILITY—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5	4 Medical technical assistants.....				\$15,240
6	These four additional positions are proposed to provide adequate relief on a post assignment basis for				
7	existing posts.				
8	1 Psychiatrist II (effective October 1, 1955).....				6,390
9	1 Senior clinical psychologist (effective October 1, 1955).....				4,329
10	These two additional positions are proposed to provide established level of individual and group psycho-				
11	therapy to the increased population estimated for 1955-56. Present experience is that 64 percent of the				
12	1,100 population, or 700, are in therapy under seven therapists (three psychiatrists, two psychologists,				
13	and two sociologists). Results achieved to date are promising. These two additional positions would				
14	provide similar service for the same percentage of the increased population.				
15	1 Intermediate stenographer-clerk.....				2,988
16	This position will provide stenographic service to the additional professional medical positions proposed.				
17	1 Correctional sergeant (fire chief and sanitarian).....				4,296
18	This position is proposed to provide the new state-owned facility at Vacaville with service similar to				
19	that provided in other state institutions. In order to protect the inmates, employees, and state prop-				
20	erty, it is essential that adequate fire protection be provided. The fire chief would supervise and instruct				
21	eight employees who serve as part-time fire fighters and 25 inmates assigned full or part-time fire				
22	duties. Training would be given in fire fighting techniques, first aid, etc. This employee would also				
23	make periodic inspection and report on sanitary conditions. At times, crews of officers and inmates				
24	will be supervised while engaged in sanitary inspections or the elimination of sanitary hazards.				

OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The increase in operating expenses of \$180,660 is due mainly to the increase in inmate population and the expense of pre-establishment activities of the new institution. Changes in inmate pay, equipment, and reimbursements are negligible.

34					
35	This temporary institution to house older and chronically infirm inmates is located near San Luis Obispo. The first occupant arrived				
36	in early October, 1954, and it is planned to have about 600 inmates in residence by June 30, 1955. Population is estimated				
37	to increase to 1,000 by January 1, 1956. The inmates are housed in barracks of the former hospital section of Camp San Luis				
38	Obispo. The increase in expenditures is due mainly to the increased population. Most of the new positions are to provide staff				
39	for the 1,000-man institution.				
40					
41					
42	SALARIES AND WAGES: The increase of 66.5 new positions amounting to \$263,650 is necessary to operate an institution of				
43	1,000-inmate population. The balance of the increase is mainly due to full-year cost of positions established during the 1954-55				
44	year and the cost of merit salary adjustments. Proposed new complement positions are discussed in the general analysis in the				
45	departmental summary. 60.5 new miscellaneous positions are explained below:				
46	1 Commissary manager I-----				\$4,740
47	To assume the direct responsibility for the purchasing, storing, and distributing of all materials, sup-				
48	plies, and equipment for the institution; to have general supervision over the institution laundry, shoe				
49	shop, and the issuing and repairing of all institution inmate wearing apparel; and general supervision				
50	over the inmate canteen.				
51	1 Senior account clerk-----				3,456
52	To relieve the present accounting technician who has direct supervision for the maintaining of the stores				
53	activities, revolving fund, accounts receivable records, all financial transactions of inmates being				
54	released on parole or discharge, supervision of the inmate clerks auditing the invoices and preparing				
55	claims for payments.				
56	1 Senior typist-clerk (personnel)-----				3,456
57	To act as personnel clerk for the institution; maintain general supervision of the personnel office;				
58	handle all personnel functions for the institution.				
59	1 Food manager-----				5,232
60	To supervise four cooks, a butcher and baker, to plan and coordinate the feeding operations in several				
61	dining rooms and two kitchens, located in scattered areas about the institution.				
62	1 Supervising cook I-----				3,810
63	To provide seven-day coverage in the kitchen. The kitchen is in operation from 4 a.m. to 7 p.m. daily,				
64	requiring two shifts. At the present time the staffing for this operation includes one supervising cook				
65	II and two supervising cook I. With the increase in population, it necessitates operating another mess				
66	hall, thereby increasing the work load and responsibilities of the mess personnel.				
67	1 Baker II-----				3,810
68	To prepare, supervise, and instruct in the baking of bread and pastries for an institution of 1,000 in-				
69	mates.				
70	1 Butcher-meat cutter II-----				4,194
71	To prepare, supervise, and instruct in the cutting of meat.				
72	1 Storekeeper II (clothing)-----				4,194
73	To be in charge of the clothing room of the institution in which all bedding and items of inmate				
74	wearing apparel will be handled, and the issuing and distributing of wearing apparel throughout the				
75	facility.				

^a Composed of savings in salaries and wages.

The above 15 posts are to provide coverage for the listed dormitories to be activated July 1, 1955, due to the increase in population from 600 to 1,000. Dormitory T 309 is the staff mess and will require custodial supervision.

6 Correctional officer (present dormitories).

	Population	Shifts		
		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.
Dormitory T 324-25-26 -----	72	1	1	1
Dormitory T 330-31-32 -----	92	1	1	1
Totals -----	164	2	2	2

Posts for the correctional officer positions now authorized have been rearranged in order to fit in with the buildings actually used and posts found to be needed upon occupancy of the institution. These six posts plus are proposed to provide coverage for the above listed dormitories. It has been necessary to activate all except one of these dormitories in the current year to meet the demand for 600-bed capacity.

2 Correctional officer (Mess Hall No. 2).

	Population	Shifts		
		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.
Mess Hall No. 2 -----		1 a	1 a	-

Two posts are to provide custodial coverage for Mess Hall No. 2, to be activated to accommodate the increase in population from 600 to 1,000. Each mess hall will seat approximately 280 inmates at one time.

1 Correctional officer (recreation hall and yard).

	Population	Shifts		
		12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.
Recreation hall and yard -----		-	1	1
Recreation hall and yard -----		-	1 a	-

To supervise an additional yard that will be activated when the population is increased from 600 to 1,000.

15 Correctional officer (relief).

Fifteen positions are proposed to furnish relief for the above 24 posts.

1 Chief psychiatrist ----- 11,400

To act as chief medical officer and to meet a present need for services of this nature.

0.5 Senior dentist (increase from half-time to full-time) ----- 3,380

Because of the increase to 1,000 population the services of a full-time dentist will be necessary.

1 Senior sociologist (to June 30, 1956) ----- 6,060

This position was authorized July 1, 1953, at Medical Facility, for one year and extended to June 30, 1954, at the Men's Colony, to determine whether a program of geriatrics would make it possible to rehabilitate many of the older type inmates and make possible their parole or discharge. Because of the transfer of these inmates and this position from Terminal Island to San Luis Obispo in 1954-55, the results achieved by this program were somewhat delayed. It is proposed that this position be continued to June 30, 1954, in order that the San Luis Obispo Facility and the department may continue to evaluate the results of this program.

1 Occupational therapist ----- 4,296

To conduct a number of varied occupational activities which will provide beneficial experience for groups of inmates made up mainly from the older inmates.

a Proposed new positions.

Department of Corrections
INSTITUTION FOR MEN, CHINO

A minimum custody institution for adult offenders. A reception-guidance center processes new offenders from Southern California. The institution also operates a branch facility at Tehachapi.

Located Near Chino, San Bernardino County

16	State Forestry Camp Operations:				
17	Average inmate population	187	225	240	15
18	Cost per inmate	\$1,287	\$1,337	\$1,332	—\$5
19					(—0.4%)
20	The institution population is estimated to remain the same in both the current and budget years. The former women's institution at Tehachapi is now being rehabilitated and will be operated as a branch institution by this institution, with the first inmates scheduled to move in in January, 1955. The fourth quarter average population will be 400 with a 1955-56 average population of 500.				
21	SALARIES AND WAGES: The increase of \$321,012 is mainly due to 13 new positions and the full year cost of positions to operate the Tehachapi branch unit. Complement positions are discussed under the general analysis in the departmental summary. Six miscellaneous positions are explained below:				
22	1 Senior dentist				\$8,112
23	This position is proposed for the main institution. There are three dentists at the present time, two of which are assigned to the Reception-Guidance Center to care for the 2,750 received annually, the other one at the main institution. The regular institution population, including camps that require dental care, is over 1,800, plus normal turnover of 1,000 inmates per year.				
24	Two dentists are needed to handle the main institution work load.				
25	1 Medical technical assistant				3,810
26	This position is proposed as a combined clinical laboratory and X-ray technician. The present staff provides five nurses for 24-hour in-patient hospital coverage and two medical technical assistants for the out-patient clinics at the Reception-Guidance Center and one at the institution.				
27	It is no longer possible for the three doctors to adequately care for all of the patients and to attempt to train several times each year, those inmates who are required to operate such departments as the operating room, X-ray laboratory, pharmacy and clinical laboratory. A considerable amount of time is spent training inmates because of the short stay of the inmates.				
28	This position will be a skilled technician as well as offering training to inmates.				
29	1 Water and sewage plant supervisor				4,296
30	This position is again proposed for the 1955-56 Budget. This institution is the only major prison that does not have such a position. The sewage disposal system and the water system is a necessity from both a sanitation and health standpoint, not only for the institution proper, but for the adjacent populated areas by reason of the fact that the outlet for the sewage unit flows into the Chino Creek. The industrial operations also present problems such as following: (1) slaughterhouse operations cause problems in maintaining an appropriate balance in the system; (2) complications of the drainage from the milk processing room; (3) the operation of the cannery increases the sewage load from 50 percent to 100 percent. In order to adequately operate the water system and to maintain proper control, a technically trained free person is required.				
31	TEHACHAPI BRANCH UNIT				
32	1 Intermediate account clerk				2,844
33	This position is again proposed for 1955-56, to prepare claim schedules, receipting for trust accounts, the handling of withdrawals for canteen and paroles, discharges, filing, pricing, and stock received reports; and to assist in checking vendors' invoices. Only one position has been budgeted to handle these operations which must be done locally. Two positions are needed for these operations in a 500-man institution.				
34	1 Supervising cook I				3,810
35	This position is also again proposed for 1955-56. The normal kitchen operations call for coverage by a supervising cook I or II, eight-hour shifts, seven days a week. One cook is to be assigned the morning eight-hour shift, five days per week, one is to be assigned the afternoon eight-hour shift, five days per week, and the third cook now being requested is to work relief for the above posts for a total of 32 hours per week. The remaining eight hours are to be used in giving partial relief for holidays, sick leaves, and vacations. The supervising cook II will not have the extra time to relieve these positions. In addition to over-all supervision of the feeding program, he will supervise the meat cutting, the bakery, the personnel dining room, plan the menus, prepare estimates for all food requirements and culinary supplies.				
36	Correctional lieutenant (overtime)				1,900
37	This overtime position is required as an in-service training officer as adequate training program is recognized to be important both as to morale of personnel and for proper functioning of an institution. The staff at Tehachapi, including correctional industries, will total approximately 100 employees.				
38	0.5 Chaplain, Protestant (half time)				2,616
39	0.5 Chaplain, Catholic (half time)				2,616
40	It is proposed that these chaplains will provide regular Sunday services and religious abstract for each inmate in an institution of 500 inmates. This will be used by the classification committee and other institution officials in treatment, case work services, and psychological study. They will also interview the inmates and counsel with relatives and friends concerning inmates.

1					
2					
3					
4	GENERAL ANALYSIS—Continued				
5	OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The increase of \$174,880 in operating				
6	expenses is mainly due to the increased population of 350 at the Tehachapi Branch. The increase in equipment is due to				
7	more replacement items budgeted than has been necessary in the past few years. Inmate pay increase of \$6,623 is mainly due				
8	to the increased population at the Tehachapi Branch. Increased reimbursements reflect the full year operation of the Tehachapi				
9	Branch and increased population in the state forestry camps.

60	Federal Forestry Camp Operations:				
61	Average inmate population	42	45	45	—
62	Cost per inmate	\$1,996	\$2,153	\$2,205	\$52
63					(2.4%)
64	State Forestry Camps:				
65	Average inmate population	124	120	120	—
66	Cost per inmate	\$1,356	\$1,501	\$1,531	\$30
67					(2%)
68	Analysis				
69					
70	The institution population is estimated to remain the same in the current and budget years. Most of the increase in 1955-56 is due to				
71	the additional positions proposed.				
72					
73	SALARIES AND WAGES: The increase of \$87,796 is due to 18 proposed new positions, which include seven vocational instructors transferred from the local school district, and the increased cost of merit salary adjustments.				
74					
75	^a Composed of savings in salaries and wages, \$8,394; operating expenses, \$6,787; equipment, \$4,475; inmate pay-work projects				
76	\$237; and loss in reimbursements, \$6,807.

STATE PRISON AT FOLSOM—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5	Complement positions affecting several institutions are discussed under the general analysis in the departmental summary. Ten pro-				
6	posed new miscellaneous positions are discussed below:				
7	1 Storekeeper II -----				\$4,194
8	This position is proposed for the inside commissary storeroom which is in accordance with recommended				
9	standard staffing pattern.				
10	3 Correctional officers (segregation unit) -----				11,430
11	Three positions are proposed for the three-floor, No. 4 Building, 138 capacity (segregation). This is to				
12	provide coverage for each floor 24 hours a day, instead of two officers for three floors. It is felt these				
13	additional officers are required due to the necessity of providing constant and thorough surveillance of				
14	the inmates confined in the area who are all chronic disciplinary cases, trouble makers, aggressive homo-				
15	sexuals, and others difficult to handle. These officers will also supervise inmate feeding, exercise periods,				
16	and other necessary movement.				
17	Post assignment of the 138-capacity, three-floor segregation unit would then be:				
18					
19					
20					
21	Correctional Officers:	Shifts			
22	Segregation unit, floor -----	12m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
23	Segregation unit, floor -----	2	2	2	
24		1a	1a	1a	
25	2 Correctional officers (former canal) -----				7,620
26	Two positions for Post 6 are proposed for extension until June 30, 1956. They were approved in the				
27	1954-55 Budget until June 30, 1955, on the basis that construction of Folsom Dam had eliminated the				
28	custody barrier on the west side of the institution by virtue of diminished water in the canal. Plans				
29	are presently being formulated to provide an additional barrier which, when completed, will eliminate				
30	the need for 24-hour coverage on Post 8 and that coverage can then be transferred to Post 6. However,				
31	until such time as this barrier is completed, these positions are required for adequate coverage of this post.				
32					
33					
34					
35	Post No. 6 -----	12m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.	
36		1a	1	1a	
37	4 Correctional officers -----				15,240
38	To provide necessary relief for the above new posts and the existing custodial staff on a post assignment				
39	basis.				
40	OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: Small changes in these categories are				
41	mainly due to emergency forest fire expenditures and reimbursements.				
42					
43

^b Composed of savings in salaries and wages.

^c These inmates are fed, housed, and otherwise cared for at San Quentin Prison.

^d Excluding cost of operating Reception-Guidance Center.

Department of Corrections

STATE PRISON AT SAN QUENTIN—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2	Analysis				
3	The average estimated institutional population for 1955-56 is only slightly lower than the current year. However, the current year				
4	estimate is about 4.2 percent over the original 1954-55 budget figure of 4,269. Parole violators will still be processed in the San				
5	Quentin Reception-Guidance Center.				
6	The institution will operate four seasonal federal forestry camps, two state forestry camps, and two road camps. One of the				
7	state forestry camps will be increased from sixty men to eighty-five men.				
8	The new cotton mill is expected to open about July, 1955, and will furnish work for some 500 inmates, thereby reducing the				
9	idleness problem that now exists at this large institution.				
10	SALARIES AND WAGES: The increase of \$187,970 is largely the result of 34 proposed new positions, which include the				
11	transfer of 15 educational positions from the school district payroll and eight new positions for the psychiatric unit of the				
12	prison hospital as a result of a recent staffing survey. Complement positions affecting the several institutions are discussed				
13	under the General Analysis in the departmental summary.				
14	The 14 miscellaneous positions are explained as follows:				
15	1 Correctional sergeant			\$4,296	
16					
17					
18					
19					
20					
21					
22					
23					
24	South building				
25	One sergeant is proposed for assignment to the south building and the hospital, during the first watch,				
26	12 midnight to 8 a.m. He would supervise correctional officers assigned there and indirectly supervise				
27	2,000 inmates housed in double-celled barracks in the area, approximately 50 percent of whom are maxi-				
28	mum security cases. The early morning activities such as breakfast line occur on this shift.				
29	1 Correctional officer—No. 11 wall post			3,810	
30	This position, for the No. 11 wall post, requires one officer eight hours a day for five days a week on the				
31	day shift to observe the new industrial area situated at the east end of the cotton textile mill, which will				
32	employ an additional 550 inmates in this area.				
33	2 Correctional officer—old prison segregation unit			7,620	
34					
35					
36	Old prison—segregation unit				
37	These positions are proposed to provide minimum coverage 24 hours a day, seven days a week, in the				
38	old prison building, segregation unit, housing 80 inmates.				
39	2 Correction officer (relief)			7,620	
40	These positions are proposed to provide regular day off, vacation, and sick leave relief for the above pro-				
41	posed new positions.				
42	Psychiatric Care				
43	Evaluation of a survey of the psychiatric care at this institution necessitates the following additional				
44	positions:				
45	4 Medical technical assistant			15,240	
46	To provide complete 24-hour, seven-day coverage by a medical technical assistant, nurse, or correctional				
47	officer for all four floors of the hospital, which includes the 110 psychiatric beds located on the second,				
48	third, and fourth floors, plus one position for X-ray services, one for laboratory technician services, and				
49	one for outpatients on the first floor.				
50	2 Senior sociologist			9,960	
51	These positions are proposed because of the backlog of cases on the Adult Authority calendar for San				
52	Quentin. The average monthly calendar consists of 251 cases. Review of the case load and projection to				
53	a yearly work load is as follows:				
54					
55					
56					
57					
58					
59					
60					
61					
62					
63					
64					
65					
66					
67					
68					
69					
70					
71

^a Proposed new positions.

^b Law and Policy—required by Penal Code Section 288.1 and Adult Authority Resolution No. 184.

Department of Corrections

STATE PRISON AT SAN QUENTIN—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
------	--------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

At present, there are the following professional positions for psychiatric care:

- 1—Chief psychiatrist
- 2—Psychiatrist
- 2—Psychiatric resident } 2 assigned to 3 psychiatric hospital wards full time.
- 2—Psychologist
- 2—Sociologist

It is proposed to allow three hours interview time per year for the 1,476 cases under (2) and (3) above and one hour per year interview time for the 1,128 cases under (4) above. This would total 694 man-days of interview time required. The above nine position have 290 man-days of time available for interviews after considering their other duties. These two positions are proposed to overcome the 304 man-days short in interview time. This still would leave a very minimum time for group psychotherapy and other psychiatric treatment.

- 2 Intermediate stenographer-clerk ----- \$5,688
- These additional positions are to give clerical assistance to the additional professional positions and help overcome the present deficient recording system of information obtained.

OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The increase in operating expenses is largely due to the installation of the clothing ration discussed in the general analysis and to the increase in state forestry camp population by the enlargement of one camp from a capacity of 60 to 85 inmates. Equipment expenditures have increased \$15,974 but are within the normal expenditure pattern for this institution. Inmate pay and reimbursements reflect the increased camp populations. Reimbursements for services to correctional industries have increased due to the opening of the cotton mill.

Teletype and telegraph -----				355	390	390

c To realize a continuity of operation and retain clerically qualified personnel for timekeeping, this position was reclassified from a correctional officer position three years ago. Other large prisons now have correctional officers as timekeepers on their custodial staff. This position was erroneously counted as a personnel position and deleted on a ratio basis in 1953-54 Fiscal Year. It has since been filled on a temporary basis and is needed permanently.

d One-half position transferred to Correctional Industries Revolving Fund.

GENERAL ANALYSIS—Continued

Analysis

The increase in the budget year over the current year is mainly due to the proposed staffing pattern in the farm barracks unit, a satellite institution to the main institution, which has been increased from 450 to 700 population by double-decking, and will house both minimum and medium security inmates. The population increase of 25 in the budget year is due to the full year effect of this expansion.

SALARIES AND WAGES: The increase of \$146,710 is partially due to 16.2 proposed new positions. Complement positions affecting several institutions are discussed in the General Analysis in the departmental summary. 14.2 miscellaneous positions are discussed below.

1 Accounting technician II (barracks area)-----	\$3,456
This position is proposed to be in charge of the sub-storeroom for feeding, personal care, maintenance, and other items stocked at the barracks to provide a working supply. It will also handle inmate trust funds and accounts, canteen accounts, handicraft accounts and requisition of supplies from the main stores for the barracks area. The present storekeeper at the barracks is needed full-time as clothing distribution officer.	
1 Supervising cook II (barracks area)-----	4,296
This position is proposed to be in charge of the barracks area feeding program as well as to carry a shift. The feeding operation for over 700 persons, in 3 sittings, covers 15 hours, 7 days per week. At present there is one supervising cook I, plus relief assigned to the barracks area.	
1 Correctional officer (laundry)-----	3,810
This position is proposed to provide a second free person to assist the laundry supervisor in the handling of 60 inmates.	

FARM BARRACKS UNIT—700 INMATES

1 Associate warden-----	8,112
This proposed position, under the warden, will be in charge of the entire operation of the barracks area. All staff assigned to the barracks area will be ultimately responsible to this person although they may have a staff responsibility to other positions in the main institution. A correctional lieutenant will be reclassified to correctional captain to act as custodial head.	
3 Correctional sergeant-----	12,888
One position is proposed for relief for the revised staffing in the farm barracks unit, and two are proposed for a current shortage in relief for approved supervisory posts.	
6 Correctional officers-----	22,860
These positions are proposed to provide four additional posts plus two relief for the revised custodial staffing for the farm barracks unit.	
The revised custodial staffing for the farm barracks unit is as follows:	
1 Correctional captain—This position will plan and direct the custodial work and be the watch officer in charge of the second shift.	
5 Correctional lieutenant—One will be in charge of the first shift, one in charge of the third shift and one will supervise the farm work crew operation. Two positions will provide relief for these three posts and for the correctional captain position.	
9 Correctional sergeant—To be assigned as follows:	

	Shifts		
	12 m.-8 a.m.	8 a.m.-4 p.m.	4 p.m.-12 m.

STATE PRISON AT SOLEDAD—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5					
6	Farm Barracks Unit—Continued				
7	0.2 Chaplain—Jewish (part time)-----				\$1,048
8	This position is proposed to provide some religious services and religious guidance for the inmates who				
9	could be classified as actively interested in the Jewish religion. This position will provide for the serv-				
10	ices uniform with other large institutions of the department.				
11	Overtime (night school area)-----				790
12	Overtime pay for correctional officer service is proposed to provide custodial coverage for the evening				
13	educational program and to supervise the night cleanup inmate crew in the educational building. Present				
14	corridor coverage has proved inadequate.				
15	1 Chief of institution maintenance I (farm barracks unit)-----				5,232
16	This position is proposed to have one position responsible full time for the maintenance of the barracks				
17	area, which was originally constructed as a temporary institution in 1946-47. Most of the plumbing, util-				
18	ities, and equipment are requiring more maintenance for continued use. The present part-time services				
19	of the main institution maintenance staff is inadequate to service this area.				
20					
21	OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The increase in operating expenses is				
22	primarily due to the full year operation of the third state forestry camp, which was activated in the latter part of the 1953-54				
23	Fiscal Year, and the establishment of a standard clothing ration in the 1955-56 Fiscal Year. The increase in equipment is				
24	mainly due to the need for replacing some items of the original complement purchased in 1951. Changes in inmate pay and				
25	reimbursements are negligible.

GENERAL ANALYSIS

Number of positions	284.3	322	336.9	14.9
POPULATION AND UNIT COSTS				
Average Inmate Population:				
Institution	847	1,075	1,075	
Reception-Guidance Center ^c	79	100	100	
Totals	926	1,175	1,175	—
Cost per inmate ^d	\$1,999	\$1,877	\$1,971	\$94 (5%)

The new institution, located near Tracy, was occupied in August, 1953. The population is estimated to remain at 1,175 in the budget year, and is composed of 685 youths, 390 adult felons and 100 youths in the Reception-Guidance Center. The latter operation is conducted in one of the cell blocks of the main institution. A new inmate counseling unit, a two-year pilot program, is proposed in the 1955-56 budget.

^a Composed of savings in salaries and wages, \$2,243; operating expenses, \$27,728; equipment, \$5,791; inmate pay-work projects, \$952; and excess reimbursements, \$1,324.

^b Composed of savings in salaries and wages.

^c These inmates are fed, housed, and otherwise cared for by the prison.

^d Excluding cost of operating Reception-Guidance Center.

------	--------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

SALARIES AND WAGES: The increased cost of \$99,013 is partially due to the 11 new positions and to salary adjustments. Two complement positions effecting several institutions are discussed in the general analysis in the departmental summary. Nin miscellaneous positions are explained below:

1 Correctional officer ----- \$3,810

This position is proposed to provide custodial supervision over the minimum security outside visiting area which operates on Saturdays and Sundays when the heavy visiting cannot be accommodated in the regular inside visiting facilities. The position detects the passing of contraband and unruly behavior or improper conduct between inmates and visitors; 40 percent of the position would be for this week-end function; the balance for its own relief and relief of other custodial officers on a post-assignment basis.

Inmate Counseling Unit:

1 Supervising parole officer ----- 5,496

4 Parole officer II ----- 18,960

2 Intermediate stenographer-clerk ----- 5,688

These positions are proposed to institute a two-year, planned and controlled pilot program to determine whether skilled counselors can reduce some of the negative factors which produce antisocial inmate behavior. Relative performance of counseled and noncounseled groups will be measured and compared and periodic reports rendered. At any one time there will be 455 (325 youths and 130 young adults) in the counseled group; a like amount would be in the noncounseled group. The above staff would provide approximately eight hours interview time per inmate. \$1,500 is also proposed in operating expenses for traveling and consultant services for pre-operational training.

1 Intermediate typist-clerk (adjustment unit) ----- 2,844

This position is proposed to provide clerical help for the Adjustment Unit, which is composed of three professional personnel authorized in the 1954-55 Fiscal Year.

OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The decrease of \$9,625 in operating expenses reflects a full year of experience in the new institution. The increase of \$15,493 in equipment is mainly due to equipment for the new positions, and replacement of existing equipment. Changes in other categories are negligible.

33	Cost per inmate -----	\$1,396	\$1,477	\$1,537	\$60
34					(4.1%)
35					
36	Analysis				
37					
38	The major part of the increase in expenditures is due to the cost of the new positions proposed. The new institution has only				
39	been in operation two years, and the positions are needed on the basis of experience gained. The fourth 100-inmate cottage was				
40	occupied in April, 1954, bringing the total rated bed capacity of the new institution to 453. With an estimated yearend popu-				
41	lation of 550 in the budget year, there will be overcrowding to the extent of 97 beds.				
42					
43	SALARIES AND WAGES:				
44	The increased cost of \$72,830 is due to 11 proposed new positions, cost of salary range increases, and salary adjustments. The 11				
45	miscellaneous positions are explained below:				
46	1 Supervisor counselor I (laundry and clothing) -----				\$3,810
47	This position is proposed to provide a part time clothing distribution officer working with the instruc-				
48	tor in garment making and a part time assistant to the instructor in laundry and dry cleaning. The				
49	institution population is estimated to increase by 50 from the 1954-55 estimate, and the Riverside Deaf				
50	School population from 215 to 311 students, for whom Corona performs laundry service nine months of				
51	the year. The resultant increased laundry work is more than can be supervised by one position.				
52	3 Supervisor counselor II -----				12,888
53	These positions are again proposed, together with the existing supervisor counselor III and the one				
54	supervisor counselor II to provide supervisorial coverage on a 24-hour basis plus full relief. Corona				
55	each year is becoming a larger institution with additional problems to control, and a supervisory cus-				
56	todial staffing pattern more akin to a men's institution is needed.				
57	2 Supervisor counselor I -----				7,620

^a Composed of savings in salaries and wages, \$12,931; equipment, \$1,491; inmate pay-work projects, \$445; and loss in reimbursements, \$4,849.

^b Composed of savings in salaries and wages.

^c Proposed new positions.

One position plus relief is proposed for the third shift in the Receiving and Detention area. Night shift coverage for this unit is necessitated by its physical arrangement, the overcrowding (39 capacity compared to approximately 70 population), the fact that the nurse on duty at night is occasionally not available, and by a temporary custody problem created by the death sentence case. This post will complete one post, 24-hour coverage in this unit.

EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
--------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

- 2 Supervisor counselor (expires June 30, 1956) \$7,620
 Two positions are proposed to provide special guards for an inmate with a death sentence commitment. Presently, she is confined in one of the psychiatric detention rooms in the hospital wing. Without the use of these positions, it is impossible to provide proper supervision in accordance with established condemned procedure. These positions have to be used to provide custody over the inmate's exercise (because she cannot be allowed to associate with other inmates), bathing and for interviews or visitors. It is necessary to continue these special custody positions until some disposition is made of the case.
- 1 Correctional officer 3,810

	Shifts		
	6 a.m.-2 p.m.	2 p.m.-10 p.m.	10 p.m.-6 a.m.
Correctional officer:			
Fence guard duty	1	1	2
Fence guard duty		8 a.m.-4 p.m.	1 ^a

This position is recognized as necessary during the daytime hours.

It is not practical for the maintenance men to be responsible for the gate operations. Their duties take them all over the institution and many times it will be necessary for delivery trucks to wait for long periods of time before someone is able to clear the trucks through. These maintenance men are not trained for the required custodial checking of vehicles before entering and leaving the institution. There is an average of 15 trucks handled daily, taking from 10 to 60 minutes to handle each truck.

- 1 Graduate nurse 3,630
 The present nurse staff consists of one supervising nurse, one surgical nurse, and four graduate nurses. With the increasing population and intake and Corona handling its own surgical cases, one additional nurse is needed to handle the increased outpatient clinic work.
- 1 Senior stenographer-clerk 3,456
 This position is proposed to provide clerical assistance to the supervisor of prison education and provide some relief for the excess clerical load throughout the institution on several different assignments.
- 7 Institution fire fighters (part time) 2,856
 These seven additional part time positions are proposed to provide fire protection during the night and maintain the fire fighting equipment. At the present time this function is only partially covered by one part time man, leaving the post completely unprotected when he takes time off or leaves the institution in the evenings. This will provide for eight men to be used on a rotating basis in this growing institution.

OPERATING EXPENSES, EQUIPMENT, INMATE PAY, AND REIMBURSEMENTS: The decrease of \$2,540 in operating expenses is primarily due to a decrease in medical contractual service caused by the rebudgeting of two professional medical positions under salaries and wages, in lieu of contractual service. This more than offsets the normal increase for an additional population of thirty inmates. The increase of \$3,456 in equipment reflects the increase in replacement of items purchased from original complements. The increase in reimbursements is due to additional laundry services for the School for the Deaf, whose population is estimated to increase.

Department of Corrections

ADULT AUTHORITY

This is the paroling agency for adult male prisoners of the State. As such, it issues and revokes paroles, fixes and refixes terms of imprisonment, and determines punishment of prisoners. The Division of Adult Paroles supervises all adult male parolees within the State.

In the 1953-54 Fiscal Year a new Special Intensive Parole Unit and a Parole Outpatient Clinic were approved as pilot programs to permit early release of certain prisoners and to offer psychotherapy to certain parolees, respectively.

55	Cost per parolee processed	\$168	\$180	\$185	\$5
56					(2.8%)
57					
58	Analysis				
59					
60	The 1955-56 budget reflects an increase in total average parolees under supervision of from 5,730 to 6,246, an increase of 516 or 9 percent, and additional staff based on existing work load standards to handle the increase. The budget also provides for the continuation until June 30, 1956, of the two pilot units, inaugurated in the 1953-54 budget, namely the Special Intensive Parole Unit and the Parole Outpatient Clinic. These two units were late getting under way and progress reports rendered to date are inconclusive but further experimentation with a small adequate sample (800 cases per year) seems warranted to determine if more intensive parole supervision (smaller case loads) will reduce the number of parole violations and possibly reduce the long range prison building program. The Parole Outpatient Clinic would aid in achieving the same result.				
61					
62	^a Composed of savings in salaries and wages, \$4,558; operating expenses, \$32,140; equipment, \$1,717; and loss in reimbursements, \$10,263.				
63	^b Composed of savings in operating expenses.

ADULT AUTHORITY—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES: The increase of \$89,269 is largely due to additional positions for increased case load as follows:				
5	1 Supervising parole officer (effective July 1, 1955)-----				\$5,496
6	1 Parole officer II (effective November 1, 1955)-----				3,160
7	6 Parole officer I (one effective September 1, 1955; one effective October 1, 1955; one February 1, 1956; one March 1, 1956; one May 1, 1956; and one June 1, 1956)-----				11,656
8	3 Intermediate stenographer-clerk (one effective September 1, 1955; one effective February 1, 1956; and one June 1, 1956)-----				3,936
9	These additional positions are proposed on the basis of the approved over-all ratio of 60 parolees per officer, and upon accepted ratios of parole officers to clerical personnel.				
10	1 Assistant research technician (Special Intensive Parole Unit)-----				4,980
11	This position is proposed to perform difficult technical research, including the development of procedures for reporting progress on results achieved by the intensive parole unit in regard to rates of recidivism by types of offenses and length of term of parolees.				
12					
13	OPERATING EXPENSES, EQUIPMENT, AND REIMBURSEMENTS: The increase of \$15,645 in operating expenses is largely due to the increased parole population, the additional staff necessary, and increased rental in new offices. Equipment items are mainly for the additional staff. Reimbursements reflect a lower repayment of a smaller estimate of advances to intensive parolees as a result of actual experience.

GENERAL ANALYSIS

21	Number of positions-----	9	12	13	1
22					
23	PAROLE RATIOS				
24	Average number of parolees supervised-----	366	409	470	61 (14.9%)
25					
26	Average number of parole officers-----	5	7	7.9	0.9 (12.9%)
27					
28	Average case load per parole officer-----	73.2	58.4	59.5	1.1 (1.9%)

The increase in expenditures is due to the continuing increase in parole case load, with an expansion in parole officer staff based on existing work load ratio of parolees to parole officers, and other expenses related thereto.

SALARIES AND WAGES: The increase of \$7,227 is primarily due to the following:

Proposed New Positions:

- 1 Women's parole officer II (effective October 1, 1955). This position will provide supervision for the seven parole officers I and will carry one-half case load. Temporary help (\$1,630) to provide the equivalent of seven months clerical service to reduce the existing backlog of typing on chronological files.

OPERATING EXPENSES: The increase of \$4,120 is due to increased case load and additional staff related thereto. Rental expenditures were further increased by the necessity of changing the location of the Los Angeles office.

EQUIPMENT: The total of \$3,782 includes one replacement automobile, and one automobile and office equipment for the new parole officer.

DEPARTMENT OF THE YOUTH AUTHORITY

This department has the responsibility for classification, segregation, rehabilitation, and parole of all young offenders committed to it. It exercises over-all supervision of the two reception centers and various correctional facilities for youths including custody and rehabilitation. It also administers the parole program. Consultant services are provided to judges, probation officers, juvenile halls, and law enforcement bureaus. Inspections of county-operated camps are made and standards set for payment of subsidies. Advisory services are rendered to community agencies interested in youth welfare and delinquency prevention.

GENERAL ANALYSIS

The significant increases budgeted for the 1955-56 Fiscal Year include the following:

INCREASED CAPACITIES AND POPULATION

Institution Population—The total average population is estimated to increase 215 to 2,489, an increase of 9.5%.

Southern California Reception Center and Clinic—This institution opened in September, 1954. The annual average population will increase 61 wards to a total of 270 for the 1955-56 Fiscal Year.

Fred C. Nelles School for Boys—Completion of a 50-boy restricted-detention building in November, 1955, will result in a population increase of 15 to a total of 320. This building replaces an existing 20-boy unit; however, other adjustments within the institution result in a net increase of 15.

Paso Robles School for Boys—This facility is increasing in population from 235 to 330 during the 1954-55 Fiscal Year with an annual average of 311. The higher level of population will be maintained during the budget year resulting in an average population of 330.

Preston School of Industry—The population of this institution is estimated to increase from 600 to 675 during the 1955-56 Fiscal Year with an average population of 650. The increase is due to one additional 50-boy dormitory and the replacement of three dormitories, the new 50-boy units being of larger capacity than the replaced buildings.

Los Guilucos School for Girls—The number of girls at this facility is estimated to gradually increase from 135 to 240 during the 1955-56 Fiscal Year. This is due to completion of three dormitories and other permanent facilities at the end of the 1954-55 Fiscal Year.

Parole Case Load—The parole case load is estimated to increase 856 parolees during the budget year. This increase is related to the continued growth of the Youth Authority, increased direct paroles from the reception centers, and increased paroles of Youth Authority wards from the Deuel Vocational Institution.

Proposed New Positions:

69.1 new positions are proposed including the following significant items:

13 Additional Education Positions—These positions are budgeted on the basis of the following ratios of pupils (average daily attendance) to teachers and wards to teachers:

Academic teachers	15 A. D. A. to 1
Vocational teachers	15 A. D. A. to 1
Recreation and physical education teachers	150 wards to 1
Music teachers	300 wards to 1

Five of these positions were included in the 1954-55 Governor's Budget but were denied by the Legislature in the absence of published standards. A careful study has been made and the above ratios have been established as budget standards. The following positions are budgeted pursuant to these ratios based on estimated average daily attendance and institution populations:

Paso Robles School for Boys:

2 Youth Authority teacher	\$9,024
1 Arts and crafts teacher	4,512
1 Recreation and physical education teacher	4,512

^a Part of the expenditures reimbursed by and included in Division of Forestry budget.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

FACILITY OR FUNCTION	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
----------------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

INCREASED CAPACITIES AND POPULATION—Continued

Preston School of Industry:				
2 Youth Authority teacher				\$9,024
2 Instructor in general shop				9,024
Los Guilucos School for Girls:				
3 Youth Authority teacher (effective various dates)				6,820
1 Recreation and physical education teacher (effective January 1, 1956)				2,148
1 Music teacher (effective October 1, 1955)				3,276

3 Assistant Head Group Supervisors—Additional assistant head group supervisors are proposed to provide 24-hour coverage at all facilities except Fricot Ranch School for Boys where, because of its smaller size, 16-hour per day coverage is proposed. Full 24-hour per day coverage (requiring five positions) is now provided for three of the six correctional schools. Supervisory custodial staffing now authorized and proposed is as follows:

	Fricot	Fred C. Nelles	Paso Robles	Preston	Los Guilucos	Ventura
Head group supervisor	1	1	1	2 ^a	1	1 ^a
Assistant Head Group Supervisor:						
Now authorized	2	4	4	6 ^b	5	5
Proposed	1	1	1	—	—	—
Totals	3	5	5	6	5	5

At the three institutions for which these positions are proposed, it has been necessary for the head group supervisor to provide some of the coverage required to maintain a satisfactory level of supervisory custodial coverage. This has resulted in considerable overtime and the neglect of some of the head group supervisor's duties. The proposed positions are as follows:

Fricot Ranch School for Boys:						
1 Assistant head group supervisor						\$4,512
Fred C. Nelles School for Boys:						
1 Assistant head group supervisor						4,512
Paso Robles School for Boys:						
1 Assistant head group supervisor						4,512

In addition the following positions are proposed:

- 18 Parole case load increase.
- 6 Increased facilities (excluding education positions).
- 29.1 Miscellaneous positions.

^a Includes one assistant superintendent.

^b Includes one position for in-service training.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Department of the Youth Authority

DEPARTMENTAL ADMINISTRATION

Departmental Administration includes a number of divisions supervising or exercising centralized control over all phases of the Youth Authority program. Included are Youth Authority Board in which is budgeted the expenses of four members of the five-member board, the chairman (who is the director) being included in the Division of Administration. The Division of Administration provides central control and unified business management of the several divisions and facilities, maintains central case files, and handles deportations. The Bureau of Probation and Delinquency Prevention Services functions in direct contact with community agencies interested in youth welfare and delinquency prevention and includes the expenses of the interstate probation compact. The Bureau of Paroles provides parole supervision of wards released on parole from the reception centers or after a training period in the various schools and camps. The Division of Diagnosis and Treatment supervises the operation of the reception centers, schools, and camps and is responsible for the continuing re-evaluation and development of their programs and provides transportation of wards between the Youth Authority facilities.

23					
24					
25	GENERAL ANALYSIS				
26					
27	The increases in support are primarily due to increased paroles and institutional population and full-year cost of positions established in the 1954-55 Fiscal Year.				
28					
29					
30	Number of positions-----	197.4	215.2	238.6	23..
31					
32	PAROLE RATIOS AND UNIT COSTS				
33	Number of parolees supervised end of year-----	4,993	5,460	6,316	856
34					(15.7%)
35	Number of parole officers end of year-----	79	85	98	13
36					(15.3%)
37	Ratios of parolees to parole officers-----	63	64	64	—
38	Average number of parolees supervised-----	5,064	5,284	5,781	497
39					(9.4%)
40	Cost per parolee-----	\$137	\$143	\$148	\$5
41					(3.5%)
42					
43					
44	SALARIES AND WAGES: The increase of \$131,855 is primarily due to full-year cost of positions established during the 1954-55 Fiscal Year, merit salary increases partially offset by increased salary savings, and the following:				
45	Proposed New Positions:				
46	1 Intermediate stenographer-clerk-----				\$2,988
47	This position will provide additional clerical assistance in the offices of the director and the assistant to the director to help meet the increasing work load due to the growth in the department and the State as a whole.				
48	1 Intermediate clerk-----				2,844
49	This position will be assigned to the mail-supply room. It will increase the present mail-supply room staff of one and one-half positions to two since a half position now working in this area will be used to provide an increase in clerical staff available to the deputy director, business services staff, from one and one-half positions to two.				
50	1 Assistant deputy clerk-----				4,512
51	This position is to provide additional staff to meet increased work load in the clerk's office, as well as to provide sufficient deputy clerk staff to cover several board meetings at the same time.				
52	1 Accounting officer II-----				5,106
53	This position is required to meet the increased work load resulting from the expansion and growth of the Youth Authority. This accounting office is responsible for the detailed budgeting and accounting work of Departmental Administration, two institutions, and three forestry camps in addition to supervision of this work in six other institutions. One accounting officer II will be assigned supervision of the central office accounting staff and one will act as departmental budget officer. The accounting officer III will supervise these positions and provide them with assistance and relief as necessary as well as provide technical supervision of the institutional accounting offices.				
54	1 Intermediate stenographer-clerk-----				2,988
55	This position, together with the position now authorized, will provide clerical assistance to the three accounting officers as well as help meet the increasing clerical work load in the accounting office.				
56	1 Intermediate account clerk-----				2,844
57	This position is required to meet the increasing work load due to the increased number of parolees, foster home placements, and state-subsidized county juvenile camps.				
58	2 Field representative-----				10,464
59	These positions will meet increasing work load due to increasing delinquency rates, the expanding state population, and larger numbers of local personnel in the law enforcement, probation, and juvenile halls and camps fields. There has been no increase in field representative staff since 1947.

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2					
3					
4	SALARIES AND WAGES—Continued				
5	1 Intermediate stenographer-clerk				\$2,988
6	This position will provide clerical assistance to the proposed field representatives.				
7	1 Supervising placement officer (effective March 1, 1956)				1,832
8	3 Placement officer II (various effective dates)				6,715
9	9 Placement officer I (various effective dates)				21,428
10	5 Intermediate stenographer-clerk (various effective dates)				7,844
11	These positions are required on an over-all ratio basis of 64 parolees per placement officer to meet the				
12	increasing parole case load. The regional supervisor of paroles will supervise the parole activities in				
13	Northern California under the supervision of the assistant chief, placement, who headquarters in Los				
14	Angeles. This position is counted in computing placement officer requirements on the ratio basis.				
15					
16	OPERATING EXPENSES: The increase of \$33,956 is primarily due to the increased parole caseload and the expanding insti-				
17	tutions.				
18					
19	EQUIPMENT: The total of \$51,118 represents a decrease of \$10,169 from the 1954-55 Fiscal Year. Major items include replacement				
20	automobiles, \$16,610, and equipment for additional placement officers, \$21,963.

DEPARTMENT OF THE YOUTH AUTHORITY

NORTHERN CALIFORNIA RECEPTION CENTER AND CLINIC

A reception center for boys and girls received from Northern California.

Located near Sacramento

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	SUMMARY AND				
2	RECONCILIATION WITH APPROPRIATIONS				
3					
4	SUPPORT				
5	Budget Act appropriation-----	\$199,920	\$619,487	\$687,846	
6	Allocations from Salary Increase Fund-----	10,697	—	—	
7	Transfer from another institution-----	5,440	23,117	—	
8	Transfer to Emergency Fund-----	—353	—	—	
9	Transfer to other institutions-----	—69,646	—	—	
10					
11	Total Available-----	\$146,058	\$642,604	\$687,846	
12	Unexpended balance, estimated savings-----	—39,344 a	—	—	
13					
14	TOTALS, SUPPORT-----	\$106,714	\$642,604	\$687,846	\$45,242
15					(7%)
16	Contributions to State Employees' Retirement Fund-----	4,989	34,900	39,700	4,800
17					
18	TOTAL EXPENDITURES FOR SUPPORT-----	\$111,703	\$677,504	\$727,546	\$50,042
19					(7.4%)
20	OTHER CURRENT EXPENSES				
21	Initial Inventory and Supplies and Employees' Moving Expenses:				
22	Budget Act appropriation-----	\$16,000	\$12,270	—	—\$12,270
23	Unexpended balance, estimated savings-----	—1,487	—	—	—
24					
25	Total Expenditures for Initial Inventory and Supplies and				
26	Employees' Moving Expenses-----	\$14,513	\$12,270	—	—\$12,270
27					
28	TOTAL EXPENDITURES-----	\$126,216	\$689,774	\$727,546	\$37,772
29					(5.5%)
30					
31	GENERAL ANALYSIS				
32					
33	Number of positions-----	18.4	108.5	116	7.5
34					
35	WARDS PROCESSED AND UNIT COSTS				
36	Average population-----	6	135	135	—
37	Total wards processed-----	—	1,115	1,115	—
38	Cost per ward processed-----	—	\$576	\$617	\$41
39					(7.1%)
40					
41	The increased cost per ward processed is due to proposed new positions and fewer vacant positions with complete activation of the institution.				
42					
43	SALARIES AND WAGES: The increase of \$44,427 is due to decreased salary savings and the following:				
44	Proposed New Positions:				
45	1 Cook-----				\$3,456
46	This position, together with existing positions, will provide one cook on each of two overlapping shifts plus supervising cook coverage on a full seven day per week basis.				
47	1 Food service assistant-----				2,580
48	This position, together with the two existing positions, will provide sufficient staff for one food service assistant on each shift plus relief.				
49	1 Graduate nurse-----				3,630
50	This position, together with existing positions, will provide one 24-hour post in the hospital, plus three positions who will provide the equivalent of two 8-hour posts to cover surgery and post-operative care, pharmacy, hydrotherapy, physical examinations, and sick call, give assistance to contractual specialists, maintain medical records, and the central supply room.				
51	1 Group supervisor-----				3,810
52	This position will provide full relief for the two receiving and distribution posts plus a small excess to cover overtime necessitated by the arrival and departure times of the bus.				
53					
54	OPERATING EXPENSES: The decrease of \$835 is due to complete activation of the new institution for a full year offset by reductions in feeding and clothing.				
55					
56	EQUIPMENT: The total of \$2,150 represents an increase of \$1,650 over the 1954-55 Fiscal Year. Included are miscellaneous equipment items, books and records.				
57					
58	a Composed of savings in salaries and wages, \$32,319; operating expenses, \$7,196; and loss in reimbursements, \$171.

GENERAL ANALYSIS

Number of positions 4.8 162 174 12

WARDS PROCESSED, AND UNIT COSTS

Average population	-	209	270	61
				(29.2%)
Total wards processed	-	1,494	2,215	721
				(48.3%)
Cost per ward processed	-	\$585	\$493	-\$92
				(-15.7%)

The decreased cost per ward processed is primarily due to the increased number of wards processed during the first full year of operation. The first wards were received in September, 1954.

SALARIES AND WAGES: The increase of \$161,696 is due to the full-year cost of positions established in the 1954-55 Fiscal Year, reduced estimated salary savings, and the following:

Proposed New Positions:

- | | |
|--|---------|
| 1 Cook | \$3,456 |
| This position, together with existing positions, will provide one cook on each of two overlapping shifts plus supervising cook coverage on a full seven-day per week basis. | |
| 1 Graduate nurse | 3,630 |
| This position, together with authorized positions, will provide one 24-hour post in the hospital, plus four positions who will provide the equivalent of 2.5 eight-hour posts to cover surgery and post-operative care, pharmacy, hydrotherapy, physical examinations and sick call, give assistance to contractual specialists, maintain medical records and the central supply room. | |
| 3 Group supervisor | 11,430 |
| These positions will provide two receiving and distribution posts in addition to the one now authorized. Two posts will be on the day shift and one on the afternoon and evening shift. These posts handle the receiving and departure of wards and the movement of wards to and from various clinical functions. | |

OPERATING EXPENSES: The increase of \$44,315 is due to full-year operation and the increased number of wards processed.

EQUIPMENT: The total of \$2,150 represents an increase of \$1,650 over the 1954-55 Fiscal Year. Included are miscellaneous equipment items and books.

^a Composed of savings in salaries and wages, \$20,507; and operating expenses, \$8,218.

^b Composed of savings in salaries and wages, \$46,380; and operating expenses, \$17,691.

42	POPULATION AND UNIT COSTS				
43	Average Inmate Population:				
44	Pine Grove Camp -----	83	90	90	-
45	Coarsegold Camp -----	111	105	105	-
46	Ben Lomond Camp -----	64	70	70	-
47					
48	TOTALS, ALL CAMPS -----	258	265	265	-
49					
50	Average Cost Per Inmate (Excluding Inmate Pay) -----	\$2,062	\$2,053	\$2,034	—\$19
51					
52	The decrease in per capita cost is due to reduced operating expenses and equipment partially offset by increased salaries and wages.				
53					
54	SALARIES AND WAGES: The increase of \$3,460 is due to merit salary adjustments partially offset by increased salary savings.				
55					
56	OPERATING EXPENSES: The decrease of \$4,587 is primarily due to a reduction in feeding offset in part by other miscellaneous				
57	adjustments.				
58					
59	EQUIPMENT: The total of \$5,370 represents a decrease of \$4,587 from the 1954-55 Fiscal Year. Major items include replacement				
60	of a laundry tumbler, \$1,200, and replacement of feeding and housekeeping equipment, \$1,341.

FRICOT RANCH SCHOOL FOR BOYS

A minimum security correctional school for boys in the 8 to 13 age group.

Located 11 miles east of San Andreas, Calaveras County

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55

GENERAL ANALYSIS

Number of positions ----- 56.7 60.8 63.7 2.9

POPULATION AND UNIT COSTS

Average pupil population ----- 144 145 145 -
 Average institutional cost for pupil ----- \$2,594 \$2,805 \$2,885 \$80
 (2.9%)

The increase in per capita cost is primarily due to new positions, merit salary increases, and increased equipment, partially offset by reduced operating expenses.

SALARIES AND WAGES: The increase of \$16,741 is due to merit salary increases partially offset by increased salary savings^a and the following:

Proposed New Positions:

0.4 Junior-intermediate clerk (part time) ----- \$984
 This will provide week-end telephone-receptionist coverage which cannot be provided by the present clerical staff.
 1 Assistant head group supervisor ----- 4,512
 This position, together with existing staff, will provide 16-hour assistant head group supervisor coverage with full relief. It has been necessary for the head group supervisor and other administrative staff to assist in providing this coverage taking them from other administrative duties as well as requiring the accumulation of considerable overtime.
 1.5 Hospital aid (intermittent) ----- 2,955
 These intermittent positions, together with positions now authorized, will provide sufficient staff to operate the hospital on a two-shift per day basis, thus providing single coverage during the hours the boys are awake. In addition, all night coverage will be afforded when ordered by the doctor. Experience shows that the hospital must remain open 24 hours per day 81.5 percent of the time. The cost indicated above is \$1,104 below the cost of the intermittent positions because a nurse position is reclassified to hospital aid to help finance the necessary hospital coverage.
 (0.1) Institution fire fighter (intermittent) ----- 408
 This position will increase the fire fighter staff to seven—the institution standard.

OPERATING EXPENSES AND EQUIPMENT: The total for these two categories is \$120,399, a decrease of \$6,277 from 1954-55. Significant items of equipment include three television sets, antenna, and distribution system, \$1,195; and the replacement of a carryall, \$1,860.

FRED C. NELLES SCHOOL FOR BOYS

A correctional school for boys under 16 years of age, located at Whittier, Los Angeles County.

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	SUMMARY AND				
2	RECONCILIATION WITH APPROPRIATIONS				
3					
4					
5	SUPPORT				
6	Budget Act appropriation-----	\$787,325	\$835,023	\$849,561	
7	Allocations from Salary Increase Fund-----	35,883	-	-	
8	Transferred to Emergency Fund-----	6,200	-	-	
9	Transferred from another institution-----	5,700	-	-	
10	Total Available-----	\$822,708	\$835,023	\$849,561	
11	Unexpended balance, estimated savings-----	8,867 ^a	3,949 ^b	-	
12					
13					
14	TOTALS, SUPPORT -----	\$813,841	\$831,074	\$849,561	\$18,487
15	Contributions to State Employees' Retirement Fund-----	46,072	47,300	48,300	1,000
16					
17	TOTAL EXPENDITURES FOR SUPPORT -----	\$859,913	\$878,374	\$897,861	\$19,487 (2.2%)
18					
19					
20	GENERAL ANALYSIS				
21					
22	Number of positions-----	140.8	142.8	145	2.2
23					
24					
25	POPULATION AND UNIT COSTS				
26	Population:				
27	Average pupil population-----	289	305	314	9 (3.0%)
28					
29	End of year pupil population-----	306	305	320	15 (4.9%)
30					
31	Average cost per pupil-----	\$2,988	\$2,880	\$2,859	\$21 (-0.7%)
32					
33					
34	The decrease in per capita cost is primarily due to the increased population resulting from completion of the new 50-boy restricted-				
35	detention building. This building replaces an existing 20-boy unit; however, other adjustments within the institution result in a				
36	net increase of 15 boys.				
37					
38	SALARIES AND WAGES: The increase of \$13,704 results primarily from the following:				
39	Proposed New Positions:				
40	1 Assistant head group supervisor-----				\$4,626
41	To provide sufficient staff to give 24-hour assistant head group supervisor coverage. It has been necessary				
42	for the head group supervisor to provide the equivalent of 0.8 position relief in order to maintain 24-hour				
43	supervisory coverage. This is no longer practical because of the many other duties of the head group super-				
44	visor.				
45	1 Group supervisor (effective November 1, 1955)-----				2,510
46	To staff the 50-boy restricted-detention building, together with positions from the discontinued unit, on the				
47	following post assignment basis:				
48					
49					
50					
51					
52					
53					
54					
55

PASO ROBLES SCHOOL FOR BOYS

A correctional school for boys in the 14 to 17 age group.

Located near Paso Robles, San Luis Obispo County

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	SUMMARY AND RECONCILIATION				
2	WITH APPROPRIATIONS				
3					
4					
5	General Fund				
6	SUPPORT				
7	Budget Act appropriation-----	\$504,567	\$756,257	\$804,876	
8	Allocations from Salary Increase Fund-----	12,032	-	-	
9	Transfer to Emergency Fund-----	4,880	-	-	
10	Transfer to another institution-----	2,201	-	-	
11					
12	Total Available-----	\$509,518	\$756,257	\$804,876	
13	Unexpended balance, estimated savings-----	33,563 a	38,832 b	-	
14					
15	TOTALS, SUPPORT -----	\$475,955	\$717,425	\$804,876	\$87,451
16	Contributions to State Employees' Retirement Fund-----	19,138	36,400	43,400	7,000
17					
18	TOTAL EXPENDITURES FOR SUPPORT -----	\$495,093	\$753,825	\$848,276	\$94,451
19					(12.5%)
20					

GENERAL ANALYSIS**POPULATION AND UNIT COSTS**

Average pupil population-----	152	311	330	19
				(6.1%)
Cost per pupil-----	\$3,082	\$2,307	\$2,439	\$132
				(5.7%)

The increase in per capita cost is primarily due to proposed new positions.

SALARIES AND WAGES: The increase of \$57,721 is due to merit salary adjustments partially offset by increased salary savings, and the following:

Proposed New Positions:

1 Assistant head group supervisor-----	\$4,512
This position, together with existing positions, provides full 24-hour per day assistant head group supervisor coverage.	
3 Boys' group supervisor-----	11,430
These positions will provide 16-hour (4 p.m.-8 a.m.) per day control post-security sound system coverage.	
2 Youth Authority teacher-----	9,024
1 Arts and crafts teacher-----	4,512
1 Recreation and physical education teacher-----	4,512
These positions will provide staff on the basis of 15 pupils per academic teacher and 150 wards per recreation and physical education teacher.	
1 Stationary fireman-----	3,720
This position, together with two stationary firemen and one stationary engineer now authorized, will provide sufficient staff for boiler coverage 16 hours per day seven months per year and 21-hour coverage five months per year plus the equivalent of one position two days per week for steamfitter work.	

OPERATING EXPENSES: The increase of \$27,101 is primarily due to increased population and increases in the education and arts and crafts programs.

EQUIPMENT: The total of \$8,703 represents an increase of \$2,129 over the 1954-55 Fiscal Year. Significant items include eight television sets and aerials, \$2,680; replacement of an automobile, \$1,050; an additional automobile, \$1,200; and replacement of hogs, \$1,200.

PRESTON SCHOOL OF INDUSTRY

A school for boys in the 16 to 21 age group.

Located near Ione, Amador County

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	SUMMARY AND				
2	RECONCILIATION WITH APPROPRIATIONS				
3					
4					
5	General Fund				
6	SUPPORT				
7	Budget Act appropriation-----	\$1,471,766	\$1,486,893	\$1,554,093	
8	Allocation from Salary Increase Fund-----	79,113	-	-	
9	Transfer from other institutions-----	26,939	-	-	
10	Transfer to Emergency Fund-----	-25,841	-	-	
11					
12	Total Available-----	\$1,551,977	\$1,486,893	\$1,554,093	
13	Unexpended balance, estimated savings-----	-6,104 ^a	-11,177 ^b	-	
14					
15	TOTALS, SUPPORT -----	\$1,545,873	\$1,475,716	\$1,554,093	\$78,377
16					(5.3%)
17	Contributions to State Employees' Retirement Fund-----	87,707	88,000	93,500	5,500
18					
19	TOTAL EXPENDITURES FOR SUPPORT -----	\$1,633,580	\$1,563,716	\$1,647,593	\$83,877
20					(5.4%)
21					
22	GENERAL ANALYSIS				
23					
24					
25	Number of positions-----	263.2	257.6	266.1	-
26					
27	POPULATION AND UNIT COSTS				
28	Average Pupil Population:				
29	School-----	527	585	650	65
30	Diagnostic clinic ^c -----	128	9	-	-9
31					
32	Totals-----	655	594	650	56
33					(9.4%)
34	Average institutional cost per pupil ^d -----	\$2,511	\$2,633	\$2,535	-\$98
35					(-3.7%)
36					
37	The decrease in per capita cost is primarily due to the increase in population. Occupancy of seven dormitories during the 1955-56				
38	Fiscal Year permits replacement of six dormitories and adds one additional unit. The diagnostic clinic was discontinued in				
39	August, 1954.				
40					
41	SALARIES AND WAGES: The increase of \$57,538 is due to merit salary increases partially offset by increased salary savings plus				
42	the following proposed new positions:				
43	1 Senior group supervisor (effective December 1, 1955)-----				\$2,387
44	4 Group supervisor (effective December 1, 1955)-----				8,740
45	These positions staff an additional dormitory on a one post per shift basis.				
46	2 Youth Authority teacher-----				9,024
47	2 Instructor in general shop-----				9,024
48	These positions are required on the basis of a pupil-teacher ratio of 15 to 1.				
49	1 Automotive equipment operator-----				3,456
50	This position will drive the truck delivering farm products to Fricot, Pine Grove, and the Northern California Reception Center and Clinic three times per week. In addition to the training value of increased				
51	farm production, the price savings on pork, eggs, bread, and milk for these three facilities are estimated				
52	at \$7,370.				
53					
54					
55	OPERATING EXPENSES: The increase of \$24,190 is primarily due to increased population partially offset by a reduction in the				
56	food ration.				
57					
58	EQUIPMENT: The total of \$26,921 is an increase of \$2,289 over the 1954-55 Fiscal Year. Significant items include replacement				
59	of three presses, \$1,500; hot water heaters, \$1,085; chickens, \$1,140; steers, \$3,000; additional equipment for two classroom				
60	\$2,169; and a television set and aerial, \$300.				
61					
62	REIMBURSEMENTS: Surplus products sales is increased \$6,000 because of the sale of farm products to other Youth Authority				
63	facilities.				
64					
65	^a Composed of savings in salaries and wages, \$5,641; operating expenses, \$478; equipment, \$985; and loss in reimbursements, \$1,000.				
66	^b Composed of savings in salaries and wages, \$4,714; operating expenses, \$1,773; equipment, \$1,500; and excess in reimbursement				
67	\$3,190.				
68	^c These boys have been fed, housed, and otherwise cared for at Preston School of Industry.				
69	^d Excluding cost of operating the diagnostic clinic, expenditures for which are included in the Departmental Administration Budget				
70

25	GENERAL ANALYSIS				
26	Number of positions.....	79.7	95.2	117.2	22
27	POPULATION AND UNIT COSTS				
28	Population:				
29	Average pupil population.....	107	135	205	70
30					(51.9%)
31	End of year pupil population.....	138	135	240	105
32					(77.8%)
33	Average cost per pupil.....	\$4,279	\$4,126	\$3,482	—\$644
34					(—15.6%)
35					

The decrease in per capita cost is due to increased population. All permanent capacity facilities will be completed in May, 1955.

SALARIES AND WAGES: The increase of \$90,440 is due to full-year cost of positions established in May, 1955, decreased salary savings, merit salary adjustments, and the following:

Proposed New Positions:

1 Intermediate typist-clerk	\$2,844
This position, together with the position now authorized, will provide two positions for switchboard-infor-	
mation desk coverage on approximately a 10-hour per day basis.	
(0.1) Temporary help (psychiatric service).....	1,000
To provide emergency psychiatric treatment for the more emotionally disturbed girls.	
3 Youth Authority teacher (one effective December 1, 1955, and two January 1, 1956).....	6,820
1 Recreation and physical education teacher (effective January 1, 1956).....	2,148
1 Music teacher (effective October 1, 1955).....	3,276
The teaching positions are proposed on the basis of a pupil-teacher ratio of 15 to 1, a ward-recreation and	
physical education teacher ratio of 150 to 1, and a ward-music teacher of 300 to 1.	
Positions to Be Abolished:	
0.5 Graduate nurse (half time).....	—1,905

OPERATING EXPENSES: The increase of \$54,995 is primarily due to increased population.

EQUIPMENT: The total of \$7,569 is an increase of \$5,329 over the 1954-55 Fiscal Year. Major items include four television sets, \$800, and a paint spray booth, \$2,000.

GENERAL ANALYSIS

24	Number of positions	102.9	107.5	110.7	3.2
25					
26	POPULATION AND UNIT COSTS				
27	Average pupil population	172	175	175	-
28	Cost per pupil	\$3,746	\$3,872	\$4,156	\$284 (7.3%)

The increase in per capita cost is primarily due to proposed new positions and increased equipment.

SALARIES AND WAGES: The increase of \$20,460 is due to merit salary adjustments partially offset by increased salary savings and the following proposed new positions:

Proposed New Positions:

37	0.2 Psychiatrist (part time)				\$1,728
38	To provide one day per week psychiatric service for the emotionally disturbed girls.				
39	1 Vocational counselor				4,980
40	1 Intermediate stenographer-clerk				2,988
41	To provide vocational testing, guidance, and counseling. The development of suitable vocational goals will not only aid while on parole but will stimulate the girls toward greater educational achievement while at the institution. A vocational counselor has been provided since early 1954 by private funds. The success of activities in this field will be evaluated at the end of two years. The clerical position is to provide necessary clerical assistance to the vocational counselor and to help alleviate the general clerical shortage at this institution as time permits.				
47	1 Automotive equipment operator				3,456
48	This position will handle most of the institution's truck driving, thus relieving the small maintenance staff of this function, to allow them more time for maintenance work. The equivalent of more than one position has been diverted from maintenance work for this in the past.				

OPERATING EXPENSES: The increase of \$3,314 is due to two special repairs projects, \$3,600; a reduction in feeding, \$1,876; and other minor adjustments.

EQUIPMENT: The increase of \$24,454 is primarily due to the replacement of equipment which has been deferred for several years already, pending occupancy of the new institution. Major items include replacement of feeding equipment, \$1,550; housekeeping equipment, \$7,444; laundry, \$3,047; and additional rugs and lamps, \$1,320; seven television sets and antenna, \$2,340; and industrial sewing machines, \$6,514.

24	School Planning						
25	Assists and advises school districts in regard to acquisition of sites and construction of school buildings.						
26							
27	Analysis						
28	No change in program level is expected for this bureau. The decrease from 1953-54 expenditures is due to the transfer of three positions						
29	to the Administrative Unit, Division of State Colleges and Teacher Education.						
30	This budget embodies for the first time the concept that services provided incident to the school building aid program shall be						
31	supported from building program funds. This is effected through the inclusion of a reimbursement to this program.

SURVEY OF HIGHER EDUCATION

Provides for a study of the structure and objectives of higher education. The study is being conducted by the Department of Education and the University of California, jointly.

Analysis

The Department of Education's portion of this study will be completed by the end of the current year.

Department of Education

VOCATIONAL EDUCATION

The California program for vocational education is based upon a cooperative plan between the local school districts, the State Department of Education, and the U. S. Office of Education. The program is administered through the Bureaus of Agriculture Education, Business Education, Homemaking Education, and Industrial Education, under the Division of Instruction in the Department of Education. Funds are made available for the operation of the total program by the local school districts, the State of California, and the Federal Government. These funds are expended for state-level supervision and teacher training, and for reimbursement to local school districts which meet standards of the California Plan for Vocational Education, such reimbursement based upon the extent of excess costs entailed in meeting the prescribed standards.

The Smith-Hughes Act provides for agricultural education, industrial education, and homemaking education, while the George Barden Act covers agricultural education, industrial education, and business education. Each of these federal acts requires that expenditures from federal funds be matched by at least an equal amount of state and local expenditures. The George-Barden Act is somewhat broader in its provisions in that it allows reimbursement for travel and instructional equipment while the Smith-Hughes Act does not.

^a Does not include reimbursements to school districts maintaining approved vocational instruction. See Local Assistance budget.

^b Neither federal aid revenues, nor expenditures therefrom, are included in the over-all budget totals.

^c These state appropriations, together with all federal grants, are deposited in the Vocational Education Fund, from which expenditures are made.

^d Appropriations for these programs included in single Budget Act Item for Vocational Education.

^e Distribution of these funds by program shown in Local Assistance budget.

Department of Education

VOCATIONAL EDUCATION—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS				
2					
3					
4	Number of positions-----	86.7	85	85	-
5					
6	The programs for Supervision and Teacher Training, Agriculture On-Farm Training, Fire Training, and Instructional Materials for Apprentices have been included as budgetary units within the Vocational Education program and as such have been consolidated into a single appropriation in the Budget Act.				
7					
8	Supervision and Teacher Training, Agriculture On-Farm Training, and the Fire Training programs have been budgeted at the current year's level of services.				
9					
10	The Instructional Materials for Apprentices program proposes about the same expenditure for 1955-56 as in the current year, however sales of materials will decline about 11 percent. Due to the integration of this activity into the Vocational Education budget, deficits in this program will be financed through a reduction of reimbursements to school districts.				
11

1							
2	INSTRUCTIONAL MATERIALS FOR APPRENTICES						
3							
4	This program develops instructional materials for apprentices registered in the state apprenticeship program administered by the						
5	Division of Apprenticeship Standards in the Department of Industrial Relations. These publications are used by the indi-						
6	vidual apprentice in conjunction with the required related classroom instruction of 144 hours annually and are sold to the						
7	apprentice at a price calculated to recover direct costs.						
8							
9	Analysis						
10							
11	This program is budgeted at the current year's level of activities. In 1955-56, however, sales will decline. The deficit will be absorbed						
12	within the Vocational Education program.						
13

GENERAL ANALYSIS

Number of positions -----	198.6	200	226	26
				(13%)

The budget continues the same level of program as in the current year as approved in conjunction with passage of Chapter 1647, Statutes of 1953, which recognized the State's primary responsibilities in the area of vocational rehabilitation. The program is to accept only those cases which come within the priority categories below but because of the backlog of accepted cases, it was not possible to shift immediately the entire program in the direction indicated.

- (1) Those applicants most clearly in need of rehabilitation service. Need here is broadly defined in terms of severity of disability, extent of vocational handicap, as well as financial problems.
- (2) Those cases most clearly representing a social and economical liability. Included in this category will be all types of public assistance cases for whose rehabilitation the State has a strong obligation.
- (3) The industrially injured, as required by statute.
- (4) Clients with dependents.

Operating within these priorities the characteristics of the cases accepted for service in 1953-54 were as follows:

Source of support or Referral		Number	Percent
Total intake for 1953-1954 -----		2,981	100
Public Welfare -----		1,551	52
Industrial Accident Commission -----		300	10.1
Mental Hospital -----		300	10.1
Unemployment insurance, private relief, family, O.A.S.I., savings, and other -----		1,030	34.5
By Disability Diagnosis		Number	Percent
Total intake for 1953-1954 -----		2,981	100
Blind -----		210	7
Tuberculosis -----		450	15.1
Psychotics -----		100	3.4
Severely disabled -----		1,400	47
Other -----		821	27.5

The intent of this budget is to provide for: (a) the continuation of the level of services established by the Legislature in 1953-54 and (b) the continuation of the priority system of case selection with allocation of staff time to program areas as recited above.

Fourteen rehabilitation officers and related staff have been added of which six and related staff are for the purpose of continuing the established level of services. The remaining eight rehabilitation officers and related staff are included in the 1955-56 budget due to need, worth of the program, and favorable federal-state financing ratios.

Effective July 1, 1954, federal-state financing relationships are governed by a new federal act, Public Law 565, Eighty-third Congress which amends Public Law 113 in effect since 1943. This budget effectuates those provisions of Public Law 565 providing for a base program supported by 59 federal dollars to 41 state dollars and an extension and improvements program supported by 75 federal dollars to 25 state dollars. All of the new positions in this budget will be supported as extension and improvements for three years after which the base program ratios will apply.

One business enterprise officer and one clerk have been included on a work load basis for the state-supported vending stand program.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56

Department of Education

DIVISION OF LIBRARIES

Provides library facilities for state legislators, employees and agencies. Maintains state-wide library services for the blind, including loans of talking-book machines. Assists in establishing public libraries in those parts of the State without such service. Lends books not available locally and does reference work requiring materials not in smaller libraries. Collects library statistics, acts as a clearinghouse for library information and supervises, inspects, and advises county libraries.

GENERAL ANALYSIS

28					
29	<i>Number of positions</i>	99	102	105	3
30					
31	Provision is made for an extension of reference services through a transfer of one librarian to the reference section made possible by the addition of a senior typist to the order section. An intermediate typist is proposed for the periodicals section primarily on a work load basis, however, in part this new position is related to the transfer of the librarian mentioned.				
32	One additional senior clerk is proposed for the documents section for increasing work load and to assume responsibility for supervision of the clerical operation thus relieving professional time for other duties in the section.

Department of Education

STATE COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

STATE COLLEGES

The primary function of state colleges is the training of teachers. They may also offer courses appropriate for a general or liberal arts education; offer vocational training in such fields as business, industry, public service, homemaking, and social service; and offer the preprofessional courses needed by students who plan to transfer to universities for advanced professional study. The 1949 Legislature authorized the colleges to grant the master's degree. At present, such degrees are being limited to individuals who meet the State's requirement for one of the various teaching credentials, except for those students who are preparing to teach in a foreign country, those students who hold a license to teach in another state, or students preparing to teach in institutions not requiring teaching credentials.

Three technical schools are administered by the Department of Education: California State Polytechnic College, which offers occupational training in agriculture, engineering and industry, plus limited courses in the liberal arts; Fresno State College Division of Agriculture, patterned after the agricultural instruction program at California State Polytechnic College, but specializing in problems affecting the central valleys; and the California Maritime Academy, which trains officers for the Merchant Marine and the Naval Reserve. Because of their vocational nature, instructional costs of these schools are normally greater than at the liberal arts type state colleges.

Analysis

In view of the growing teacher shortage now facing California's public schools, the state colleges must continue to emphasize and encourage teacher training as their most important function. Major factors of change influencing the colleges during 1955-56 are:

1. Growth of regular session enrollment to an all-time peak of 38,181 full-time equivalent students represents an increase of 3,721 students over the 34,460 F.T.E. for 1954-55, predicated on actual fall semester experience. As the three new state colleges attain additional permanent facilities, growth will be almost automatic from these newly-tapped population centers. State-wide long range forecasts based on birth rate and immigration factors indicate continued heavy growth in both high school graduates and attendance at higher education institutions. In addition, the drop in World War II veteran enrollment is offset by Korean veterans attending school under Public Law 550, who are influenced into enrolling at public colleges and universities because of the financial incentive of low tuition fees. For these reasons, enrollment increases are anticipated to be moderate at colleges in the rural areas, and heavy at San Diego and the new schools at Long Beach, Los Angeles, and Sacramento. In general, budgets for all colleges have been based on admissions standards and rules established by the Board of Education, and upon available capacity at existing plants.
2. A new fee for out-of-state students attending the state colleges has been included in the budget in anticipation of legislative approval during the 1955 General Session. The amount of such fee has been computed at \$75 per semester, in addition to the present materials and service fee of \$20 per semester for regular students. It is conservatively estimated to result in \$138,000 in additional reimbursements. The new fee would bring the state colleges more in line with the fee policies existing in other state-supported colleges. All but six of the states maintaining state colleges charge a higher fee to nonresident than to resident students. In the major industrial states, these nonresident fees range from \$150 per year up. The same policy has been followed in the major state universities, including the University of California.
3. The budget proposes the addition of 256.1 new faculty positions upon the basis of a teacher-staffing formula which was presented to the Legislature for the first time in the 1953-54 budget. Recognizing the shortcomings of the ratio approach, the State Department of Finance, the State Department of Education, and the colleges developed this new staffing formula. The basic idea of the formula is that it allows staff in relation to the total work load of the college, which is the number of units of course work which the college offers. The total work load is then divided by the work load per individual instructor in order to determine the number of teaching positions necessary for a college. The work load per individual instructor is based on a work week of 45 hours which includes 36 hours of instructional work and nine hours in advising students, work on college committees, and work on student activities.
4. Professional and administrative staffing has been augmented in the budget by a total of 39.6 positions. Those include 21.7 positions for the student personnel functions of student counseling, student activities, student placement, student admissions and student health services. Counselors, physicians, and placement officers are required in proportion to the increase in enrollment. The remaining 17.9 positions are division chairmen and curriculum specialists for the instructional divisions. Their need is determined by the number of teachers provided.
5. Additional facilities provided by the present college construction program will be occupied at nearly all colleges during 1955-56. These facilities result in the provision for 70 additional maintenance positions.
6. State college libraries, like instructional positions, have not been budgeted in past years in accordance with any accepted work measurement. After thorough study, a library staffing formula was adopted in 1953-54 to permit measurement of work load in the staffing areas of administration, technical services, public services, clerical services, and student assistant coverage. In addition to this formula, an organizational pattern is recognized to permit subdivision of work into logical functions, patterned in part from the new organizational structure of the State Library. Application of this new staffing pattern results in the addition of 34 professional and clerical positions, caused almost entirely from additional demands on public service points resulting from increased enrollments and new library buildings.
7. Clerical and technical staffing is necessarily provided in conjunction with professional positions and new building operations, resulting in 106 new positions during 1955-56. Of these allowances, the majority are provided for instructional assistance and student personnel needs. Several stock clerks have also been added for operation of new buildings.

In addition to the above factors, individual allowances in positions, specialized operations, and equipment needs are provided at each school to meet special problems and substandard conditions. Over-all expenditures also include programs for summer sessions and extension, which are wholly offset by student fees for such purposes.

Department of Education

STATE COLLEGES, SPECIAL SCHOOLS, AND BLIND CENTERS—Continued

SPECIAL SCHOOLS FOR PHYSICALLY HANDICAPPED CHILDREN

Five special schools for the education of blind, deaf, and cerebral palsied children will be in operation during 1955-56; the School for the Blind, Schools for the Deaf at Berkeley and Riverside, and the Schools for the Cerebral Palsied at San Francisco and Altadena. Residential care and treatment needed for the proper training of these handicapped children is provided in addition to formal academic instruction. The two schools for the deaf and the school for the blind provide educational facilities from the primary grades through high school. The schools for the deaf also give extensive prevocational training. Education and medical treatment is provided for children afflicted with cerebral palsy at the two cerebral palsy schools. The student is usually enrolled for a period of 3 to 18 months of education and observation, after which he is returned to the local district to receive continued medical supervision and treatment and to enroll at special classes where possible to do so. Diagnostic and treatment clinics are operated in conjunction with these two state cerebral palsy schools for children who are not residents of the schools.

Analysis

The budget for the School for the Deaf at Berkeley includes provision for an increase in enrollment of 28 students and program expansion in the field of vocational education through the addition of one instructor for a course in business and typing. The School for the Deaf at Riverside includes provision for an enrollment increase of 100 students. The additional enrollment is predicated on the completion of three dormitories and a classroom unit. Costs attributable to the enrollment increase are found in all phases of the school's operations. The Schools for Cerebral Palsied Children and the School for the Blind are budgeted at the current program level. The School for Cerebral Palsied Children at Redwood City will move to its new location at the San Francisco State College campus during the current year. Additional positions have been included to provide adequate maintenance at the new location. The 1955-56 budget for this school reflects a transfer of positions to the operating staff that were formerly financed through a contract with the University of California.

ORIENTATION CENTER FOR THE ADULT BLIND

The Oakland Orientation Center admits blind persons as residents and trainees in an intensive program designed to assist blind persons in becoming more self-sufficient, and in cases where feasible, partially prepare them for useful and remunerative work in trades, professions, private business, private industry, or public service. The program of the orientation center is closely coordinated with the services of the Bureau of Vocational Rehabilitation, with the home teacher and field service programs, and with programs for training teachers and other personnel directed toward serving the blind.

Analysis

The program is effectuated through a curriculum made up of the following courses:

- (a) Travel training,
- (b) Communication skills—Braille and typing,
- (c) Habits of daily living,
- (d) Counseling and guidance,
- (e) Business practices,
- (f) Physical education,
- (g) Shop.

The 1955-56 budget includes an additional traveling instructor due to an anticipated increase in the enrollment to 30 students.

CALIFORNIA INDUSTRIES FOR THE BLIND

The California Industries for the Blind consist of three subsidized production centers located at Los Angeles, Oakland, and San Diego. These centers, previously known as workshops, supply sheltered factory employment to blind and partially sighted persons. Such items as brooms, mops, pillowcases, surgical drapes and wrappers, aprons, rugs, brushes, rubber mats, and leather goods are manufactured in addition to fabrication and assembly of many products on a subcontract basis.

The administrative and related expenses are a direct charge against the General Fund, and the manufacturing activities are financed from working capital supplied by the Workshops for the Blind Manufacturing Fund into which the proceeds of sales of products are deposited.

Analysis

For many years these shops have been considered as separate entities with little direct central administration of the program. The goal is now toward development of a central administration with administrative control over the program effected through the Division of Special Schools and Services of the Department of Education.

The sales program is directed by a state sales manager located at San Francisco assisted by a district representative at Los Angeles and Oakland. A research engineer position was filled during the current year to initiate a program of research and development for better production methods, and to develop new products for production at the shops. During the 1953-54 Fiscal Year, approximately 356 blind or otherwise physically handicapped persons were given employment at the three centers. Sales for the three centers amounted to \$2,200,000 and the cost of goods sold was approximately \$2,100,000. Sales are estimated at a lower level for 1955-56.

During 1953-54 approximately 25.6 percent of the persons given employment received Aid to Needy Blind payments and 35.7 percent received Aid to the Partially Self-Supporting Blind. The comparable figures for 1952-53 were 17.7 percent and 35.7 percent respectively.

The General Fund budget provides the same level of support in 1955-56 as in the current year.

Department of Education

CHICO STATE COLLEGE

A four-year liberal arts college with a primary function of teacher training.

This college serves the northeastern section of the State and provides some courses of a terminal nature to meet the junior college needs of the Chico area.

25	Cost per student-----	\$867	\$792	\$829	\$37
26					(4.7%)

An unexpected enrollment increase of 275 students over the 1954-55 base of 1,300 has placed an overload on instructional facilities which has been partially met during the current year by addition of one teaching position and related expenses from excess student fees. This added enrollment, plus a further anticipated increase of 100 students in the 1955-56 year, thus will create a total increase of 375 students, or 28.9 percent, in 1955 over the current base. To meet these enrollment needs, and to operate new campus facilities, the following budgetary changes are proposed:

SALARIES AND WAGES: An increase of \$122,869, or 10.9 percent over 1954-55, is caused primarily by 15 teachers and six clerical positions to handle added enrollments. Six maintenance positions are included for a new gymnasium, some smaller instructional buildings, and ground areas now being developed. Two part-time administrative positions are also required for student placement and for supervision of growing summer session and extension programs.

OPERATING EXPENSES: A minor increase of \$6,719, or 4.3 percent over 1954-55, is caused by instructional expense needs for added enrollments and maintenance costs for new facilities.

EQUIPMENT: The total of \$59,114, an increase of \$1,790 over 1954-55, contains \$35,000 for new instructional equipment and \$14,000 for library books to meet additional student requirements.

REIMBURSEMENTS: A decrease of \$1,873, or 1.1 percent under 1954-55, consists of a continued decrease in federal payments for veteran students of \$15,805, almost entirely offset by increased collection of regular student fees and the inclusion of a new out-of-state student fee at all colleges.

Department of Education

FRESNO STATE COLLEGE

A four-year liberal arts college with a primary function of teacher training. May offer courses appropriate for a general or liberal arts education; offer vocational training in such fields as business, industry, public service, homemaking and social service; and offer the preprofessional courses needed by students who plan to transfer to universities for advanced professional study. The 1949 Legislature authorized the colleges to grant the Master's degree. At present, such degrees are being limited to individuals who meet the State's requirement for one of the various teacher's credentials.

In addition, a Division of Agriculture is operated at this school under authority of Chapters 1477 and 1490, Statutes of 1947, supported by Horse Racing Board breakage revenues deposited in the State College Fund.

Located at Fresno

------	--------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS—Continued

General and Professional Divisions

These divisions of Fresno State College correspond to the other liberal arts type state colleges, as compared with the Division of Agriculture which more nearly resembles the instructional program at California State Polytechnic College. In common with other colleges, 1954 fall semester enrollments have exceeded budget estimates substantially. This excess of 350 students, plus an anticipated 275 additional enrollment in the 1955 school year will result in an increase of 625 students, or 20 percent over the 1954-55 budget program. Pressure of current year excess enrollments has been met in part by the addition of four teaching positions from additional student fees. In the budget year, this continuing enrollment problem plus the operation of several new buildings at the new campus will result in an increase of \$239,137, or 12.1 percent over 1954-55 as follows:

SALARIES AND WAGES: An increase of \$228,247, or 11.3 percent includes 20.2 new teachers and 10.5 clerks to meet enrollment needs, 3.4 administrative positions required in a college of over 3,000 students, 4.5 added library positions to staff the new library, and 12 maintenance people to operate both campuses of this college during its period of transition to its new site.

OPERATING EXPENSES: An increase of \$32,965, or 12 percent, consists of \$20,000 in moving costs and operation of new facilities and \$10,000 for instructional expenses of added students.

EQUIPMENT: The total of \$58,047, a decrease of \$8,467, or 12.7 percent, includes \$35,000 for instructional equipment and \$15,000 for library books.

REIMBURSEMENTS: An increase of \$13,608, or 3.4 percent is composed of \$23,606 of regular student fees and a new charge for out-of-state students of \$12,750, offset in part by the continued decline in federal payments for veterans' tuition of \$22,838.

Division of Agriculture

Continued growth of the agricultural program at Fresno has seen completion of many instructional and project units at the new campus, and gradual removal of many parts of the program from Hammer Field. The 1955-56 budget contains an \$8,508 increase for an additional instructor and two maintenance men for new buildings and heavy agricultural equipment.

HUMBOLDT STATE COLLEGE

A four-year liberal arts college specializing in teacher training curricula. This college serves the northwestern section of the State, and provides some courses of a terminal nature to meet the junior college needs of the Eureka area.

Located at Arcata

24					
25	ENROLLMENT AND UNIT COSTS				
26	Enrollment (full-time equivalent students)-----	632	790	900	110
27					(14.0%)
28	Cost per student-----	\$1,410	\$1,243	\$1,268	\$25
29					(2%)

An unexpected increase of 140 students in 1954 over the number budgeted for the current school year, plus an additional 110 students projected for 1955, results in an increase in the enrollment base of 250 students, or 38.4 percent over the approved budget for 1954-55, relieved in only slight measure by the addition of a half-time teacher from increased student fees during the current year. This sharp upswing in enrollments, plus completion of the first two units of the Wildlife Management Building, creates an increase of \$159,458 in operating funds for this college in 1955-56 as follows:

SALARIES AND WAGES: An increase of \$151,173, or 18.4 percent over 1954-55, includes 17.5 teachers and seven clerks based on student loads, 2.6 administrative professional positions required by growth, and two maintenance positions for additional campus facilities.

OPERATING EXPENSES: An increase of \$12,630, or 9.9 percent over 1954-55, consists of \$8,500 for maintenance of new campus facilities, \$2,000 for instructional supplies, and \$2,000 for additional physical examinations, test scoring, and price increases.

EQUIPMENT: The total of \$56,255, a decrease of \$2,122, or 2.8 percent under 1954-55, includes \$25,000 in additional instructional equipment and \$13,000 in library books to meet enrollment demands.

REIMBURSEMENTS: An increase of \$10,840, or 14.6 percent over 1954-55, is composed of \$6,778 of regular student fees and a new item of \$3,000 for out-of-state student fees, offset by a continued decline in collections from the Federal Government for veteran students.

Department of Education

LONG BEACH STATE COLLEGE

A four-year liberal arts college with a primary function of teacher training. This school was established in the fall of 1949 in temporary quarters near the City of Long Beach. On June 7, 1950, the Director of Education accepted a gift of 316 acres of land from the City of Long Beach for a permanent campus site. The college is now being operated at that new location in temporary facilities, but will complete its move into its first permanent buildings in 1955-56. During the first four years of its existence the college was limited to a two-year upper division curriculum. However, the college now offers work in all four years and one graduate year of its liberal arts program.

Located at Long Beach

15	GENERAL ANALYSIS				
16	Number of positions	190.5	260.1	319.2	59.1
17	ENROLLMENT AND UNIT COSTS				
18	Enrollment (full-time equivalent students)	1,706	2,300	2,800	500 (21.7%)
19	Cost per student	\$657	\$634	\$661	\$27 (4.3%)

An unexpected enrollment increase of 300 students in fall, 1954, over the 2,000 budgeted for 1954-55 has placed an overload on the existing staff which has been met partially during the current year by addition of 7½ teachers and related expenses from excess student fees. This added enrollment, plus a further anticipated increase of 500 students in 1955-56, thus will create a total increase of 800 students, or 40 percent over the current base. Budgeting for maintenance of additional permanent facilities and the larger enrollment results in an increase of \$392,617 over 1954-55, as follows:

SALARIES AND WAGES: An increase of \$341,665, or 25.2 percent, includes 4.8 administrative, 13.5 clerical, and 28.3 faculty positions for expanded enrollments and increasing activities resulting therefrom. Also required are seven positions to operate the new library and six custodial positions to staff and maintain new buildings to be completed in 1955-56.

OPERATING EXPENSES: An increase of \$43,585, or 21.4 percent, includes \$21,400 for administrative and instructional costs incident to expanded enrollment, and \$18,950 for increased maintenance costs pertinent to a full year's operation of the expanded campus and its new facilities.

EQUIPMENT: The total, \$84,150, a decrease of \$1,875, or 2.2 percent under 1954-55, consists primarily of \$64,326 for additional instructional equipment and books to provide for the expanded enrollment.

REIMBURSEMENTS: An increase of \$14,132, or 5.1 percent, consists of \$48,268 in additional fees caused by expanded enrollment, partly offset by a \$39,686 decrease in charges to the Veterans Administration due to a drop in enrollment of World War II veterans. Also included is a new out-of-state student fee resulting in an additional \$5,550.

Department of Education

LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES

A two-year upper division college with two primary functions: First, the training of students for gainful occupations in arts and sciences as related to business and industry; and second, the training of students for teaching in the public schools. Courses appropriate for a liberal arts education are also offered in fields normally given at other state colleges. The college is at present temporarily located on the campus of the Los Angeles City College under rental agreement with the Los Angeles City School District. However, two sites are being acquired for this college, one within a short distance of downtown Los Angeles and the other in the San Fernando Valley. Preliminary plans are now being formulated for construction of permanent facilities at the new sites.

GENERAL ANALYSIS

17	Number of positions-----	283.7	327.6	387.8	60.2
18					
19	ENROLLMENT AND UNIT COSTS				
20	Enrollment (full-time equivalent students)-----	3,075	3,750	4,500	750
21					(20%)
22	Cost per student-----	\$584	\$605	\$625	\$20
23					(3.3%)

An unanticipated increase of 250 students in fall, 1954, over the 1954-55 budget base of 3,500 has placed an overload on the existing staff which has been met partially during the current school year by addition of five teaching positions and related expenses from excess student fees. This added enrollment, plus a further anticipated increase of 750 students in 1955-56, thus will create a total increase of 1,000 students, or 28.6 percent, over the 1954-55 budget base. The additional staff and rented quarters necessary to accommodate this expanded enrollment creates an increase of \$543,919 over 1954-55, detailed as follows:

SALARIES AND WAGES: An increase of \$330,675, or 17.4 percent, provides for 33.8 teachers, 3.4 administrative positions, 7 library positions, and 16 clerks to meet the work load caused by the enrollment growth.

OPERATING EXPENSES: An increase of \$228,682, or 38.7 percent consists almost entirely of additional rented space to house the expanded enrollments and higher rental rates for the space presently occupied on the Los Angeles City College campus. Although most of the classroom space is still rented from the city college, the state college is having to rent in more and more surrounding locations to accommodate the enlarging student body. \$29,500 is also added to purchase instructional supplies necessary for the additional students.

EQUIPMENT: A total of \$115,845, an increase of \$16,309, or 16.4 percent over 1954-55, includes \$100,978 in additional instructional equipment and library books to provide for the growing enrollment.

REIMBURSEMENTS: An increase of \$48,794, or 11.7 percent, consists of a new out-of-state student fee resulting in \$7,500, and \$54,368 in student fees caused by the larger enrollment, partly offset by a reduction of \$12,509 in charges to the Veterans' Administration due to a drop in enrollment of World War II veterans.

30	Cost per student	\$846	\$717	\$717	—
31					

An increase of 150 students in 1954 over the number budgeted for the current school year, plus an additional 450 students projected for 1955, results in an increase in the enrollment base of 600 students, or 33 percent. This enrollment pressure was relieved somewhat in the current fiscal year by addition of two teachers and student assistant funds from excess student fees. This upswing in enrollment, plus completion of several new buildings by 1955-56, creates an increase of \$321,627 over 1954-55, detailed as follows:

SALARIES AND WAGES: An increase of \$281,058, or 21.7 percent, includes 25.6 teachers, 10 clerical and technical positions, and five library positions to cope with the increase in enrollment, 13 maintenance positions to care for additional facilities and grounds, and 3.3 administrative positions.

OPERATING EXPENSES: An increase of \$39,650, or 24.2 percent, is caused primarily by additional buildings and landscaped areas to be occupied in 1955-56. Their operating costs are \$21,650. The balance is caused by enrollment growth for which the largest increase is \$10,300 in instructional supplies.

EQUIPMENT: The total of \$80,063, a decrease of \$831, or 1 percent, under 1954-55, includes \$66,898 in additional instructional equipment and library books to provide for the increased enrollment.

REIMBURSEMENTS: An increase of \$16,238, or 7.4 percent, consists of a new item of \$5,550 in out-of-state student fees, and \$29,990 in student fees resulting from the larger enrollment, partly offset by a reduction of \$19,302 in charges to the Veterans' Administration due to a drop in enrollment of World War II veterans.

Department of Education
SAN DIEGO STATE COLLEGE

A four-year liberal arts college with a primary purpose of teacher training. Besides liberal arts courses and preprofessional courses offered students who plan to transfer to universities for advanced professional study, occupational curricula are offered in such fields as nursing, personnel management, social service, public administration, recreation, and business. San Diego State College also is the only college to offer a minor program in astronomy.

Located at San Diego

GENERAL ANALYSIS

23	Number of positions-----	382.7	430	501.4	71.4
24	ENROLLMENT AND UNIT COSTS				
25	Enrollment (full-time equivalent students)-----	4,024	4,585	5,200	615 (13.4%)
26	Cost per student-----	\$576	\$573	\$578	\$5 (0.9%)

An unanticipated increase of 235 students in fall, 1954, over the 1954-55 budget base of 4,350 has placed an overload on the existing staff which has been met partially during the current school year by addition of six teachers and related expenses from excess student fees. This added enrollment, plus a further anticipated increase of 615 students in 1955-56, thus will create a total increase of 850 students, or 19.5 percent, over the 1954-55 budget base. This growth causes an increase of \$377,347 in 1955-56, detailed as follows:

SALARIES AND WAGES: An increase of \$328,612, or 13 percent, includes 6.9 administrative, 38.5 teaching, 18 clerical, and one library positions to cope with the increase in enrollment. Six positions are provided to meet increased work load in the maintenance and operation of college facilities.

OPERATING EXPENSES: An increase of \$29,979, or 9.5 percent, includes \$6,648 in telephone exchange charges caused by installation of a new, expanded switchboard for the campus, \$27,408 in instructional supplies and other expenses necessary for the expanded enrollment, partly offset by a decrease of \$4,077 in campus maintenance expenses caused by lesser special repair projects in 1955-56.

EQUIPMENT: The total of \$91,383, an increase of \$6,753, or 8 percent, includes \$61,500 in additional instructional equipment and library books to provide for the increased enrollment.

REIMBURSEMENTS: An increase of \$9,616, or 2.1 percent, consists of a new item of \$15,000 in out-of-state student fees, and \$54,480 in student fees resulting from the larger enrollment, offset by a reduction of \$60,320 in charges to the Veterans' Administration due to a drop in enrollment of World War II veterans.

49	Cost per student-----	\$598	\$571	\$603	\$32
50					(5.6%)
51					
52	First year experience in operating at the new campus has found enrollment showing an increase of 700 students over the number budgeted for the current school year plus an additional 300 students projected for 1955. This is an increase in the enrollment base of 1,000 students or 22.2 percent. This enrollment pressure has been relieved somewhat in the current fiscal year by the addition of seven clerical positions in administrative functions, 2.5 teachers, and 5.7 student assistant positions for instructional divisions, and two library positions, all financed from excess student fees. This upswing in enrollment creates an increase of \$350,370 over 1954-55, detailed as follows:				
53					
54	SALARIES AND WAGES: An increase of \$272,309, or 9.3 percent, includes five administrative positions, 28.7 teachers, two library positions, and five clerical and technical positions to provide services for the increase in enrollment. Nine maintenance positions are required to care for new facilities.				
55					
56	OPERATING EXPENSES: An increase of \$48,568, or 11.5 percent, includes \$23,192 in administrative and instructional expenses caused by the enrollment increase, and \$30,786 in maintenance expenses caused by additional facilities.				
57					
58	EQUIPMENT: The total of \$87,544, a decrease of \$6,205, or 6.6 percent under 1954-55, includes \$65,627 in additional instructional equipment and library books to provide for the increased enrollment.				
59					
60	REIMBURSEMENTS: A decrease of \$17,998, or 2.7 percent under 1954-55, consists of a new out-of-state student fee resulting in \$24,000 which is more than offset by a reduction of \$50,483 in charges to the Veterans Administration due to a drop in enrollment of World War II veterans.				
61					
62	a Composed of savings in salaries and wages, \$1,545; operating expenses, \$10,680; equipment, \$8,370; and excess reimbursements, \$3,446.				
63	b Nonscheduled appropriation.

SAN JOSE STATE COLLEGE

four-year liberal arts college with a primary function of teacher training and well-established vocational curricula in such fields as nursing education, police training, and occupational therapy. This college, oldest and largest of California's state colleges, trains approximately 10 percent of the new teachers graduating from this State's teacher-training institutions. Complete separation from the San Jose Junior College has now been accomplished.

GENERAL ANALYSIS				
Number of positions-----	581.4	601.3	668.5	67.2
ENROLLMENT AND UNIT COSTS				
Enrollment (full-time equivalent students)-----	6,904	7,200	7,400	200 (2.8%)
Cost per student-----	\$501	\$518	\$559	\$41 (7.9%)

Although enrollment for 1954-55 is 800 in excess of the final budget, additional staffing and operating expenditures have been allowed only to the extent of excess student fees available, resulting in staff additions during the current year of 5.4 teachers, one clerk, and 1.7 student assistants. A further increase of 200 students in 1955-56 results in an increase in the enrollment base of 1,000 students or 15.6 percent. This enrollment expansion causes a total increase of \$405,679 over 1954-55 detailed as follows:

SALARIES AND WAGES: An increase of \$353,602, or 10 percent, includes 5.5 administrative positions, 35.3 teachers, 19.4 clerical and technical positions, and five library positions to provide services for the expanded enrollment. Seven positions are proposed to meet additional work load in the maintenance and operation of college facilities.

OPERATING EXPENSES: An increase of \$37,398, or 8.4 percent, is caused primarily by the enrollment growth for which the largest item is an additional \$14,412 for instructional supplies.

EQUIPMENT: The total of \$142,017, an increase of \$20,134, or 16.5 percent, includes \$96,964 in additional instructional equipment and library books to provide for the increased enrollment.

REIMBURSEMENTS: An increase of \$26,606, or 4.7 percent, consists of a new out-of-state student fee resulting in \$23,550, and an increase in student fees caused by the enrollment growth, partly offset by a reduction of \$32,462 in charges to the Veterans' Administration due to a drop in enrollment of World War II veterans.

Department of Education

CALIFORNIA STATE POLYTECHNIC COLLEGE

A technical college providing occupational training in agriculture, engineering and industry, and in selected liberal arts fields. The college grants a Bachelor of Science degree in agriculture, engineering, and liberal arts; and has been accredited for granting a general secondary credential, a special secondary credential in vocational agriculture, a special secondary credential in physical education, and the special secondary limited credential in agriculture. In addition a program for graduate study leading to a Master of Arts degree is provided. Two-year vocational and three-year technical curricula are offered in all agricultural and engineering majors.

The college maintains two branches in Southern California—the Voorhis Campus located at San Dimas, and the nearby Kellogg Campus located at Pomona. The Voorhis Campus offers programs in agricultural inspection, citrus fruit production, and ornamental horticulture. The Kellogg Campus, consisting of 812 acres acquired by gift in 1949, is for the expansion of instructional facilities at this branch.

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	GENERAL ANALYSIS—Continued				
2	ENROLLMENT AND UNIT COSTS—Continued				
3	Completion of a large science-classroom building at San Luis Obispo will enable enrollments to increase by 367 to a level of 3,792 students in 1955-56. This will cause an increased cost of \$256,314, or 8.7 percent over 1954-55, detailed as follows:				
4	SALARIES AND WAGES: An increase of \$236,390, or 9.6 percent, includes 10.1 instructors and eight clerks to meet the increase in enrollment, and seven custodians to care for additional buildings to be completed in 1955-56. A librarian III has been provided for the Kellogg-Voorhis Campus to act as head librarian and to plan for a new library to be constructed within the next three years.				
5	OPERATING EXPENSES: An increase of \$25,496, or 4.8 percent, includes \$15,438 to meet enrollment growth in such items as general expense, printing, and instructional expense, and \$7,374 to care for additional buildings and grounds.				
6	EQUIPMENT: The total of \$106,075, a decrease of \$1,498, or 1.4 percent under 1954-55, includes \$57,984 in additional instructional equipment and library books to accommodate the increased enrollment. The remainder is primarily for farm operations.				
7	REIMBURSEMENTS: An increase of \$19,439, or 6.5 percent, includes \$33,750 resulting from a new item of out-of-state student fees and \$16,110 resulting from more fee-paying students, less a drop of \$28,819 in charges to the Veterans Administration due to a decline in enrollment of World War II veterans.

Department of Education

CALIFORNIA MARITIME ACADEMY

The academy educates and trains young men to become licensed officers in the Merchant Marine. The course is three years and leads to the Bachelor of Science degree in Nautical Science, specifying navigation and seamanship for those in the deck course, marine steam, diesel and electrical engineering for those in the engineering course. Prior to graduation, candidates for the degree take the U. S. Coast Guard examination for licenses as third mates or third assistant engineers. In addition to the degree and licenses, graduates are appointed ensigns in the U. S. Maritime Service by the Federal Maritime Administration. By virtue of the technical training received, graduates are also issued appointments as ensign in the U. S. Naval Reserve. The academic course is supported by training at sea approximately three months each year on the training ship *Golden Bear*, which is on loan to the State from the Federal Maritime Administration.

The State receives for the academy an annual subsidy (currently \$25,000) for general overhead from the Federal Government, which also pays to the State 68 7/10 cents per diem for subsistence of qualified Naval Reserve students, and pays approximately \$50,000 annually for the overhaul and drydocking of the training ship. The States of Maine, Massachusetts, and New York have similar maritime academies, similarly subsidized by the Federal Government.

Located at Morrow Cove (Vallejo)

GENERAL ANALYSIS

Number of positions	64.2	62.3	61.3	—1
ENROLLMENT AND UNIT COSTS				
Average enrollment	164	122	150	28 (23%)
Cost per student	\$1,999	\$2,758	\$2,308	—\$450 (—16.3%)

Enrollment dropped unexpectedly from the 200 anticipated in the 1954-55 Budget to 122 in the current fiscal year, but is expected to return to a level of 150 in 1955-56. The result is an increase of \$9,729 in 1955-56, or 2.9 percent over 1954-55.

Loss of student fees from the 1954-55 enrollment drop has created a \$15,421 deficit that could not be met by reducing the current program.

The budget includes a new position of registrar-instructor to enable proper staffing of the student record-keeping functions. This is offset by elimination of two culinary positions which are unnecessary until the enrollment again exceeds 150. The equivalent of 0.8 culinary position was also abolished in the current fiscal year as a result of discontinuing the practice of serving the academy staff in the wardroom.

An increase of \$16,036, or 14.5 percent over 1954-55, in operating expenses includes \$10,111 in added feeding costs arising from the enrollment growth, and \$4,415 to provide for transit of the Panama Canal and a Caribbean cruise. This is partially offset by additional reimbursements in student fees amounting to \$7,070.

CALIFORNIA SCHOOL FOR THE BLIND

residential school for general education of the blind, partially blind, and deaf-blind children through the elementary and secondary school levels. The education of the blind requires special equipment, particularly library and writing facilities, models for tactual study and apparatus for corrective physical education. Guidance service is rendered to graduates and ex-pupils by the school's field service. The deaf-blind unit is the only one in the western part of the United States where these doubly handicapped children may be educated.

GENERAL ANALYSIS

Number of positions	122.3	133.5	163	29.5
ENROLLMENT AND UNIT COSTS				
Average Student Enrollment:				
Resident	215	219	311	-
Nonresident	10	16	24	-
Support cost per student	225 \$2,398	235 \$2,916	335 \$2,653	100 \$263 (9.0%)

The school opened February 1, 1953, to serve 56 primary students. The school reopened with an enrollment of 225 in the fall of 1953 and continued at the same enrollment in 1954. It is anticipated that the enrollment will be 335 in the fall of 1955 with the completion of three dormitories, classrooms, and the vocational building.

SALARIES AND WAGES: The increase of \$148,134 is principally due to 30 additional positions for increased enrollments, (\$100,644), and added cost of existing positions (\$56,111), less increased salary savings (\$8,621). The new positions are as follows:

1	Intermediate account clerk	\$2,844
1	To provide for increased clerical work for maintenance records occasioned by new buildings, student trust records for added enrollments, and property records.	
1	Supervising teacher	5,772
11	Teacher	45,012
1	Intermediate account clerk	2,478
1	To provide one additional supervisor in order to maintain essential supervision over classroom teachers. Ten additional classroom teachers are proposed for the enrollment increase to 335 and one teacher is proposed for special instructor in speech as part of the basic instructional program. Addition of one clerical position is proposed for the added records of the increased enrollment.	
8	Counselor	24,080
1	To provide the same level of counselors for the following new building to be completed in 1955-56: Dormitories—Upper girls, 38 capacity; intermediate girls, 28 capacity; and advanced boys, 32 capacity.	
4	Food service assistant	8,560
1	To provide service to the additional students and to reduce the total staff of food assistants per student to the level now maintained at the School for the Deaf at Berkeley.	
1	Plumber	4,194
1	Groundsman	2,988
1	One plumber, one groundsman plus reclassification of one watchman to a laborer and a second watchman to a building maintenance man are included for maintenance on new facilities and additional landscaped area.	

OPERATING EXPENSES: The increase of \$42,002 is primarily due to instruction and care (\$8,593), feeding (\$19,780) and laundry (\$2,205) for the increased enrollment. Plant maintenance and operation is increased \$9,514 principally for the new building.

EQUIPMENT: The increase of \$12,459 is principally for additional teaching equipment.

^a Composed of savings in salaries and wages, \$7,514; operating expenses, \$27,851; equipment, \$108; and loss in reimbursements, \$8,271.

^b Composed of savings in salaries and wages, \$12,263; operating expenses, \$20,798; and loss in reimbursements, \$12,571.

SCHOOL FOR CEREBRAL PALSID CHILDREN, NORTHERN CALIFORNIA

A residential school for the education and treatment of children afflicted with cerebral palsy. Students are enrolled from 3 to 12 months and are then returned to their local district facilities for continued medical supervision and treatment, and special education in the local district schools. A diagnosis and treatment center is maintained through cooperation with the University of California School of Medicine at San Francisco, which provides diagnosis and clinical treatment for children with cerebral palsy who are referred to the center.

Located at San Francisco State College Campus

GENERAL ANALYSIS

21					
22					
23	Number of positions	46.7	42	54.4	12.4
24					
25	ENROLLMENT AND UNIT COSTS				
26	Average enrollment—resident students	32	32	35	3
27	Average cost per student (excluding diagnostic and treatment costs for nonresident children)	\$9,067	\$9,365	\$9,081	—\$284

Provision is made for continuation of the existing level of services. The 9.4 positions shown as "proposed new" under Administration and Instruction and Care are for the purposes of providing services to residents, formerly performed at the University of California Hospital under contract with the agency. Three positions are proposed under Maintenance and Operation in order to operate and maintain the school at its new location on the San Francisco State College campus.

OAKLAND ORIENTATION CENTER

center admits blind persons as trainees in an intensive program designed to assist blind persons in becoming more self-sufficient, and in cases where feasible, partially prepares them for useful and remunerative work in trades, professions, private business, private industry, or public service. The center also provides a residence for blind persons admitted prior to the separation of the orientation and the workshop manufacturing functions in 1951.

Department of Education

LOS ANGELES CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons, some of whom are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The administrative and related expenses are supported by the General Fund and the manufacturing activities are financed from working capital supplied by the Manufacturing Revolving Fund, as shown in the Appendix.

Located at Los Angeles

OAKLAND CENTER, CALIFORNIA INDUSTRIES FOR THE BLIND

Provides sheltered factory employment to blind and partially blind persons, some of whom are not able to obtain or retain jobs in private industry. Industrial training and vocational guidance is also given to enable blind persons to contribute to their own support. The administrative and related expenses are supported by the General Fund and the manufacturing activities are financed from working capital supplied by the California Industries for the Blind Manufacturing Fund, as shown in the Appendix.

STATE TEACHERS' RETIREMENT SYSTEM

Administers through the State Teachers' Retirement Board the Teachers' Retirement Act. Computes, collects, records, and refunds contributions, and computes and pays retirement benefits. Members of the system consist of certificated employees of the Public School System and employees of the state departments holding valid teaching credentials who have elected to join the State Teachers' Retirement System.

GENERAL ANALYSIS

Number of positions----- 29.6 33.5 33.5 —

The State Teachers' Retirement System will continue its growth into the budget year as reflected in the following table:

Active accounts-----	137,544	144,385	151,285
Retired accounts-----	13,816	14,886	15,866
Total case load-----	151,360	159,271	167,151
Closed accounts-----	7,609	8,100	8,650

This budget provides for a continuation of the existing level of service, with minor operating expense increase due to growth in the number of accounts handled offset by completion of actuarial surveys.

b Of which not to exceed \$100,000 was available for expenditure in 1953-54.

c Represents four graduate students full-year, plus 126 undergraduates in College of Letters and Science, spring semester only.

d Approximately \$13,675,000, substantially all of the remainder of these reserves derived primarily from reimbursements for overhead costs on federal contracts and savings, have been allocated by the Regents to the construction of student residence halls and other capital outlay projects of an income producing nature.

GENERAL SUMMARY

The support budget of the University of California for 1955-56 proposes expenditures totaling \$83,351,807, of which \$59,308,352, or 71 percent is from state funds. The remaining 29 percent (\$24,043,455) will be financed from University sources. In addition the State General Fund bears the fixed charges for contributions to the State Employees' Retirement Fund on account of non-academic employees of the University estimated at \$3,031,000 in 1955-56.

The budget provides for an increase in support expenditures of \$4,630,032, or 5.9 percent over the budget for 1954-55. This is the smallest percentage increase in operating expenses since 1943-44. The State is asked to provide \$2,225,638, or 48 percent, of this increase. The remaining 52 percent will be financed from income other than state appropriations. The requested increase in state appropriations is 3.9 percent—the smallest since 1948.

This requested increase of \$4,630,032 or 5.9 percent is compared to an estimated increase in student enrollment in 1954-55 of 1,686 or 5 percent over that of 1953-54, and an additional increase in enrollment of 2,513 students or 7.4 percent is expected in 1955-56. These increases will result in a total enrollment of 34,138 students during 1954-55 and 36,651 in 1955-56.

MAJOR ITEMS OF BUDGET INCREASE

The proposed increase of \$4,630,032 in the operating budget for 1955-56 is composed in major part of the following items: (1) an addition of \$2,727,983 to the budgets for the Medical Centers in Los Angeles and San Francisco; (2) \$248,167 to provide student health services at Los Angeles comparable to those at Berkeley (the cost of these services throughout the University is financed by the incidental fee collected from all students); and (3) \$1,163,000 to finance, under the established personnel policies of the Regents and the State, promotions and merit increases for both academic and nonacademic staffs. These three items aggregate \$4,139,150, leaving an increase of \$490,882 to cover all other University activities.

- Of the \$2,727,983 increase allocated to the Medical Centers, Los Angeles and San Francisco, \$2,515,598, or 92.2 percent, represents the cost of expanding to 12 months' operation the newly-completed teaching hospitals at Los Angeles and San Francisco. At Los Angeles this will require an increase of \$1,713,743 and at San Francisco an increase of \$801,855. These increases will be in large part offset by an estimated increase of \$2,209,462 in hospital and infirmary income from part-pay and full-pay patients. Approximately 57,200 citizens of the State will receive diagnostic or therapeutic services at these two medical centers during 1955-56, 21,200 at Los Angeles, and 36,000 at San Francisco. The in-patient cost for University hospitals in Los Angeles is \$31.36 per day, and in San Francisco \$32.35.
- The increase of \$248,167 for student health services at Los Angeles will make available to students for the first time, for a full year, the personnel and facilities of the new Medical Center Hospital and clinics, and bring the student health service on that campus to a level comparable with the Berkeley campus.
- The provision for normal promotions and merit increases in salary, in accordance with approved scales (\$1,163,000) amounts to 1.4 percent of the 1955-56 total budget, and 2.3 percent of the total amount of salaries and wages to which it applies.

ANALYSIS OF INCREASES

Berkeley Campus

Budget Increase ----- \$71,833

The Berkeley campus budget (\$22,878,746), which is the largest among all University units, represents an increase of \$71,833, or three-tenths of one percent. As a result, there will be decreased expenditures in some 43 departments of instruction. These decreases will be accomplished chiefly by reductions in equipment purchases, and either by not replacing men retiring or resigning, or by replacing them at lower ranks and salaries.

^a Net current expenditures (including contributions to the State Employees' Retirement Fund) after deducting current revenue from sources other than state appropriations. Excludes expenditures, income, and enrollment, if any, for the following activities and functions, together with the proportionate amount of maintenance and operation of plant and state-wide expenditures attributable thereto:

- (1) Summer Sessions, Extension, Vocational Education.
- (2) Organized Research Activities, such as the Agricultural Experiment Station, the Scripps Institution at La Jolla, Lick Observatory, the Institute of Experimental Biology, etc. However, expenditures for research and investigation carried on by academic personnel under departmental auspices are included; these are particularly significant in the Medical Center, San Francisco.
- (3) Auxiliary Enterprises, such as dormitories and dining halls.
- (4) Organized activities of educational departments, such as the University Creamery at Davis, and the Optometry Clinic at Berkeley, which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included in computing expenditures per student.
- (5) The School of Medicine and Teaching Hospital at Los Angeles, still in developmental stage.

^e Annual basis. College of Letters and Science open spring semester only.

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1	ANALYSIS OF INCREASES—Continued				
2					
3					
4	Davis Campus				
5	Budget Increase -----			\$185,851	
6					
7	The proposed increase will be financed in part (\$82,287) from earned income, reducing the required State appropriation to \$103,564,				
8	or 1.4 percent. The increase will provide for three academic and four nonacademic positions needed to carry on important				
9	research programs, to contribute to teaching, and to put into full operation new buildings, laboratories, and other facilities.				
10	Among the major increases are \$15,341 for veterinary science; \$15,832 for soils and plant nutrition; \$8,155 for agronomy;				
11	\$11,016 for food technology; and \$4,728 for research on mastitis.				
12	An increase of \$35,193 is proposed for the College of Letters and Science, in order to provide instructional staff in Geography,				
13	European History, and English, to meet increased teaching load; and to make the position of dean of women full time because of				
14	a larger enrollment of women students.				
15					
16	La Jolla Campus				
17	Budget Increase -----			\$25,341	
18					
19	New construction on the La Jolla campus, notably the addition to Ritter Hall, will increase the area of maintained grounds and				
20	buildings by 10.5 percent, necessitating an increase of \$6,269 in the budget for maintenance and operation of plant.				
21	The major increases apart from plant maintenance and operation are two items of \$5,000 and \$10,000 for increased cost of				
22	operation of the ships upon which most of the research of Scripps Institution depends, and minor items of equipment, supplies,				
23	and expense, and general assistance for organized research aggregating \$4,240.				
24					
25	Los Angeles Campus				
26	Budget Increase -----			\$2,220,369	
27					
28	The budget increase proposed for the Los Angeles campus, amounting to \$2,220,369, or 12.4 percent, is made up of an increase of				
29	\$1,736,734 (40 percent) for the rapidly growing Medical Center, an increase of \$248,167 (58.8 percent) for the student				
30	health service, and an increase of \$235,468 (1.8 percent) for all other activities. The total state appropriation required to				
31	meet these budget increases is reduced to \$874,595 by an estimated increase of \$1,345,774 in income from other sources.				
32					
33	Los Angeles Campus—Nonmedical				
34					
35	The proposed increase in budget for all activities on the Los Angeles campus other than Medical Center and student health				
36	service amounts to \$235,468, or 1.8 percent, of which \$111,216 is offset by estimated increased income, leaving a net increase				
37	in state appropriation of 0.9 percent.				
38	Maintenance and operation of plant is estimated to increase \$76,022, to cover the cost of maintaining 9.9 percent more building				
39	area and 5.3 percent more ground area. Major items of increase are \$49,230 for janitorial expense, \$17,953 for utilities, and				
40	\$13,102 for building maintenance. Minor increases are also required for garbage disposal and steam heating.				
41	The Departments of Instruction and Research have a number of needs based on enrollment increases. Enrollment at Los Angeles has				
42	not only increased 61 percent since 1939-40, it has also changed in character as a result of a 322 percent increase in the number				
43	of graduate students, while lower division enrollment increased only 19 percent. An increase of 600 students, or 4.4 percent, in				
44	1955-56 is forecast.				
45					
46	Medical Center, Los Angeles				
47					
48	Of the \$2,220,369 increase in the budget proposed for the Los Angeles campus, 78 percent, or \$1,736,734, is required to meet the				
49	needs of the Medical Center, without taking into account an increase of some \$50,000 in the cost of campus-wide maintenance				
50	and operation of plant attributable to Medical Center development.				
51	Teaching Hospital. Of the \$1,736,734 increase required to meet the needs of the Medical Center, 98.6 percent, or \$1,713,743, repre-				
52	sents the added cost of the first full year of operation of the new 320-bed teaching hospital. This cost, is partly offset by in-				
53	creased income from full and part-pay patients in the estimated amount of \$1,305,697, leaving a net state appropriation				
54	increase of \$408,046. These costs have been computed on the basis of experience at San Francisco and elsewhere.				
55	Medical School. The net increase of \$93,530 for the School of Medicine results from specific increases of \$148,489, reduced by sav-				
56	ings of \$54,959 elsewhere. Estimated student enrollment in the Medical School for 1955-56 is 167 in the basic courses, and 100				
57	graduate students. The proposed budget provides for staff increase of 7.1 persons in academic classifications, 3.5 in nonacademic				
58	salaries, and a full-time equivalent of 28.9 in general assistance.				
59	School of Nursing is proposed for a net increase of \$18,872, or 12 percent, in 1955-56 to provide the adequate staff for anticipated				
60	enrollment and full-year operation of the new Teaching Hospital.				
61					
62	Mount Hamilton				
63	Budget Increase -----			\$9,000	
64					
65	The completion of the new 120-inch telescope at Lick Observatory, and the integration of it into the observatory research program,				
66	requires increased personnel and operating expenses partially offset by the deletion of part-time employees.				
67					
68	Riverside Campus				
69	Budget Increase -----			\$41,047	
70					
71	An increase of \$41,047 is proposed for the adequate operation of the Riverside campus during 1955-56. Increases in other income				
72	reduces the increase in the state appropriation requested for Riverside to \$17,128.				
73	The student health service, financed from the incidental fee, is expected to increase \$11,626 due to a 72 percent increase in				
74	student enrollment in 1955-56.				
75	An increase of \$22,840 for departments of instruction and research in the College of Letters and Science will add two instructors to				
76	meet enrollment and curricular problems and will provide for minor equipment needed for teaching purposes.				
77	Specific increases of \$140,000 for departments in the College of Agriculture at Riverside are largely offset by decreases in other items.				
78	Among the major activities proposed for increase are: air pollution research, plant nematology and nematode research, biology				
79	control research, and soils and plant nutrition research.				
80					
81					
82

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
ANALYSIS OF INCREASES—Continued					
1					
2					
3					
4	San Francisco Campus				
5	Budget Increase -----			\$990,688	
6					
7	The budget proposed for the San Francisco campus includes an increase in expenditures of \$990,688, but will require slightly less				
8	money from the State than it received in 1954-55. This is due to the fact that much of the expense of operating the new 483-bed				
9	H. C. Moffitt Hospital was budgeted in 1954-55 to permit of opening in a series of scheduled steps, and for a shakedown period				
10	with low income. The expenditure budget for a full year of operation in 1955-56 will be raised only \$801,855, while income from				
11	full- and part-pay patients will increase by an estimated \$903,765.				
12	There will also be increased income from student fees, departmental sales, and miscellaneous, dental clinics and clinic service, and from				
13	endowments, which will bring the total to \$993,880, or \$3,192 more than the proposed increase in expenditures. The principal				
14	items of increase are as follows:				
15	General maintenance and operation of plant will require an increase of \$27,417 to meet increased costs apart from those prorated to				
16	the hospital. The major item in this increase is janitorial expense, amounting to \$19,613 and representing the extension of the				
17	use of buildings on the San Francisco campus from part-year in 1954-55 to full-year in 1955-56. There will also be an increase				
18	of \$15,411 in the cost of steam heat. These and a number of minor items are in part offset by decreases in the budget for elevator				
19	operation, utilities, police service, and refuse disposal. During part of 1954 two hospitals are in at least part-year operation. In				
20	1955-56 the 286-bed University Hospital will be closed for changes and repairs, thereby temporarily reducing the maintenance				
21	building area.				
22	University Hospital cost schedules have been built up in the light of past experience at both the old University Hospital and other				
23	enterprises of like nature. It is expected that 74 percent occupancy will be achieved in 1955-56, on a 469-bed basis, with 14,900				
24	admissions for 126,677 patient days, as compared with 9,936 admissions and 77,673 patient days of care at the old hospital				
25	in 1953-54. More effective design will permit a decrease in employees per bed from 2.13 in 1953-54 to 2.09 in 1955-56, although				
26	higher than average admissions necessarily involve a heavier than average work load. The estimated operating cost per bed will				
27	be \$32.35 per day, and the enterprise will be operated on a 60.3 percent self-support basis. The hospital will offer bed, clinic				
28	and diagnostic service to 36,000 people, and provide teaching facilities for 381 senior medical students, interns, and technicians				
29	as well as for some 250 nursing students, nursing interns, and pharmacy interns. The total budget for 1955-56 with the proposed				
30	increase of \$801,855 will be \$5,284,906.				
31	The Medical School, like the University Hospital, will be faced with considerably expanded operations in large, new quarters during				
32	1955-56. Some 76 beginning medical students will be resident at Berkeley, and 233 second, third, and fourth year students at San				
33	Francisco, as well as 245 post-doctoral students, and 54 specialized students, making a total of 532 as compared with 480 in				
34	1954-55.				
35	The major changes include: \$25,000 additional for subsidy of teaching beds as required to obtain a proper selection of cases				
36	\$24,358 additional for clinic and service laboratories which will be largely offset by income; \$7,960 additional for rental of				
37	microscopes; and various amounts in the departments of instruction and research chiefly to provide full-year support for post-				
38	graduate students and activities supported for only the last part of the year 1954-55. The total increase for instruction and research in the				
39	School of Medicine is \$91,312, or 4.8 percent. Organized research and other activities of the Medical School bring the total				
40	increase to \$126,335, or 5.8 percent.				
41	The College of Dentistry will have an estimated increase of 26 students in 1955-56, and expects a further increase in subsequent years.				
42	At this time the addition of one new instructor, an additional secretary-stenographer, and a few minor adjustments are recommended,				
43	which will increase the budget \$10,550, or 2.2 percent.				
44	The Medical Center Library is recommended for an increase of \$15,409 to meet augmented demands.				
45					
46	Santa Barbara College				
47	Budget Increase -----			\$48,385	
48					
49	The enrollment at Santa Barbara College was 1,725 students for the fall of 1954, which is 8.7 percent greater than that for the fall				
50	of 1953. It is estimated that the average enrollment for 1955-56 will be 11.6 percent greater than that for 1954-55.				
51	Increases proposed for Santa Barbara may be summarized as: \$9,778 for general administration; \$4,175 for general expense; \$10,070				
52	for instruction and research; and \$9,972 for the library.				
53					
54	State-wide				
55	(a) Provisions to be allocated for promotions, merit increases, contingencies, salary savings, and other University-wide purposes.-----			\$881,381	
56	(b) State-wide activities budgets-----			156,137	
57					
58	Total -----			\$1,037,518	
59					
60	The lump sum provision for merit increases in salary and promotions budgeted under state-wide miscellaneous is in part balanced				
61	by an estimated increase during 1955-56 of \$206,024 in salary savings, by a decrease of \$44,953 in the request for contingencies,				
62	and by a decline of \$52,954 in unallocated endowment income.				
63	The major increases other than for self-supporting items are: \$21,976 for increased services expected of the Controller's Office				
64	\$10,000 for additional state compensation insurance costs; \$19,483 for the personnel office, chiefly in connection with the				
65	large medical center developments at Los Angeles, and \$11,887 for the School of Public Health which moves into its new				
66	building on the Berkeley campus. University extension estimates an increase of \$53,233, or 2 percent, in its 1955-56 operation				
67	which are largely self-supporting. The College of Agriculture is allocated \$31,636 for six months operation of the new South				
68	Coast Field Station in Orange County.				
69					
70					
71					
72					
73					
74	The major changes in University income other than from the State General Fund are reflected in the following schedule:				
75	Student Fees -----			\$245,099	
76					
77	The anticipated increase in student fees (\$375,477) in regular sessions is due to the expected increase in total average student enrollment				
78	in 1955-56 but it is offset in part by a decrease in veterans' tuition (\$130,387) due to the continued decline in number of				
79	veterans enrolled under Public Law 346.				
80	Student incidental fees are maintained at the current level of \$42 a semester.				
81					
82	Summer Sessions -----			\$78,968	
83					
84	Enrollment with its related fees from the 1955 summer sessions is expected to increase income by \$92,000, which means that there				
85	is a decrease of \$13,032 in the amount needed from the reserve from summer session losses to finance the anticipated expense				
86					

UNIVERSITY OF CALIFORNIA—Continued

LINE	EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
1					
2					
3					
4	Hospitals and Infirmaries				\$2,190,912
5					
6	The following are the estimated increases and decreases of income from operation of hospitals and infirmaries.				
7					
8					
9	University Hospital and Herbert C. Moffitt Teaching Hospital			Increase	Decrease
10	Teaching Hospital—Los Angeles			\$903,765	—
11	Marion Davies Clinic			1,305,697	—
12	Student Health Service—Dental Work			—	\$9,000
13	Berkeley			4,568	—
14	Los Angeles			7,050	—
15	Student Health Service—Miscellaneous			—	31,168
16	Dentistry Clinic—San Francisco			10,000	—
17					
18	Totals			\$2,231,080	\$40,168
19	Less: Decrease			\$40,168	—
20					
21	Net Increase			\$2,190,912	—
22					
23	The large increases in income estimated for the Herbert C. Moffitt Teaching Hospital at San Francisco and the Teaching Hospital at				
24	Los Angeles reflect the first full year's operation for these two hospitals.				
25	With the anticipated increase in student enrollment at Berkeley and Los Angeles, income from dental work is expected to increase				
26	as shown.				
27	The decrease in estimated income from the student health service reflects an adjustment of expected income from the Metabolic				
28	Unit, Berkeley, from the estimate made from 1954-55.				
29					
30	Residence and Dining Halls				\$53,829
31					
32	Expenditures on all campuses are budgeted entirely from income of the operations. Following are the significant changes accounting				
33	for the estimated net increase in over-all operations:				
34				Increase	Decrease
35	Berkeley			\$15,000	—
36	Davis			30,910	—
37	Los Angeles			4,895	—
38	Riverside			3,024	—
39					
40	Net Increase			\$53,829	—
41					
42	Departmental Sales and Miscellaneous				\$42,185
43					
44	The decrease in income from departmental sales and miscellaneous is due to a variety of changes on the various campuses.				
45					
46	Overhead on Federal Contracts				No Change
47					
48	In financing the budget for 1954-55, a total of \$1,000,000 was assigned from overhead earnings on federal research contracts.				
49	Of this sum, \$600,000 supplemented by an additional sum of \$400,000 was assigned from overhead collected during 1953-54.				
50	This amount finances in part the deficit in the budget resulting from the reduction in the support appropriation by the State.				
51	The budget for 1955-56 includes an estimate of \$1,000,000 from anticipated overhead to be earned in 1954-55.				
52					
53	Donations				\$56,149
54					
55	The policy of the University is to include in the printed budget only such donations on hand or firmly pledged which support con-				
56	tinuing activities. The anticipated decrease in income is accounted for as follows:				
57				Increase	Decrease
58	Marion Davies Foundation Children's Clinic			—	\$69,418
59	Carnegie Foundation—Retiring Allowances			\$12,469	—
60	Miscellaneous			800	—
61					
62	Totals			\$13,269	\$69,418
63	Add				13,269
64					
65	Net decrease in income from donations				\$56,149
66					
67	Endowment Income				\$57,271
68					
69	There are no significant individual items comprising the net increase of \$57,271. The increase arises primarily from income of				
70	new funds and, in a few cases, increases in anticipated earnings of older funds.				
71					
72

HASTINGS COLLEGE OF LAW

The Hastings College of Law was founded in 1878 by S. C. Hastings with the grant of \$100,000 to the State through the Regents of the University of California. By stipulation in the original agreement the State must pay the sum of 7 percent interest on the grant or repay the \$100,000 in full to a Hastings heir. According to the act creating the college, it is affiliated with the University of the State.

The college offers facilities for the acquisition of learning in all branches of the law, and to this end it has established a complete curriculum of studies and matriculates students who are granted the degree of "Bachelor of Laws" by the University of California.

Located in San Francisco

19					
20					
21	ENROLLMENT AND UNIT COSTS				
22	Enrollment	312	405	453	48
23					(11.8%)
24	Expenditures per student	\$626	\$617	\$577	—\$40
25					(—6.5%)

The enrollment of the Hastings College of Law is estimated to increase to 453 in 1955-56, an increase of 48 or 11.8 percent. It is expected that the enrollment will increase to 750 by 1965. A part-time director of placement is the only new position requested. Revenues show an increase of but \$880 despite an increasing number of students due to a decrease in the number of veterans enrolling under Public Law 346. The college continues to operate at a deficit estimated at \$117,149 for 1955-56, the college making up the difference out of surplus accumulated during the early postwar years.

In line with the policy established by the Legislature in 1954, funds sufficient to cover the cost of maintaining and operating the college buildings are included in the 1955-56 Budget in an amount of \$42,000.

^a Constitutes the annual interest payment of \$7,000 on the original gift required by Section 20152, Education Code, and an amount sufficient to pay for the cost of operating and maintaining the college building.

^b Funds of the college are not maintained in the Treasury. Neither the revenues or expenditures of these funds are included in the over-all budget totals.

BOARD OF CONTROL

The board makes rules and regulations governing the presentation and audit of claims relating to the amount and methods of traveling on official business of the State, and relating to the making of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made.

STATE CONTROLLER

The State Controller is the accounting and disbursing officer for the State, responsible for the legality of all payments and receipt of moneys due the State. He supervises the administration of state inheritance and gift taxes, collects the motor vehicle fuel license tax, petroleum and gasoline assessments, and motor vehicle transportation license tax, assists county and city officials in maintaining required accounting and budget records and prepares reports of their financial transactions, makes refunds to nonhighway users of motor vehicle fuel, administers property deeded to the State for nonpayment of taxes, administers unclaimed property and audits expenditures made by local governments under the Local Postwar Public Works, Plans and Sites Law, Local Postwar Construction Law, State School Building Loan Act, and the Collier-Burns Act.

^a Salary increased by Chapter 1613, Statutes of 1951, effective date delayed until January 3, 1955, by Section 22, Article V of the Constitution.

STATE CONTROLLER—Continued

General Activities

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
	53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
ACCOUNTING DIVISION						
The principal functions of this division are to maintain the control accounts covering the receipts, disbursements and balances of all state funds, the audit and funding of all deposits into the State Treasury, the preparation of the various financial statements covering the State's condition and operations, the making of various apportionments of revenues to local government, and the control and administration of unclaimed bank deposits, estates of deceased persons, and other classes of unclaimed or abandoned property.						
Analysis						
A net decrease of \$49,120 is anticipated for 1955-56 below the revised estimate for 1954-55. The principal reason for the reduction is the conversion of the division's bookkeeping unit and part of the financial reporting to tabulating machines in the Disbursements Division. This change will eliminate 15 positions and \$57,800 from this division's budget.						
SALARIES AND WAGES

31	AUDITS DIVISION						
32							
33							
34	The function of this division is to pass upon the correctness and validity of all state expenditures. It audits all claims against the						
35	State, approves the payment of all expenditures found to be legal and valid, and disallows any withdrawals which are contrary						
36	to law or public purpose. It conducts field audits of expenditures by counties, cities, and other local governmental agencies						
37	from various financial aids received from the State, to determine the State's share of the costs of the programs and the pro						
38	priety of the expenditures.						
39							
40	Analysis						
41							
42	The net decrease of \$1,545 is due to a reorganization of the division's Claim Audit Unit, which has resulted in the elimination of						
43	three positions and an anticipated annual savings of approximately \$10,700. This savings is offset by a possible decrease in						
44	vacant positions and employee turnover in the amount of \$8,800.

DISBURSEMENTS DIVISION

This division issues United States Savings Bonds, services the control accounts maintained by the Accounting Division, operates the State's uniform State Pay Roll System, and performs the Controller's duties with respect to disbursement of state funds by issuance of warrants drawn on the State Treasury for regular claims including warrants for payment of tax refunds, payment of State Employees' Retirement System retired employee rolls, payment of retired teachers on State Teachers' Retirement System rolls, veterans' educational assistance payments, and subvention payments to local government.

Analysis

The estimated increase of \$116,807 for 1955-56 over 1954-55 is for the following major changes in program:

1. The processing of the Accounting Division's control accounts on tabulating equipment at a cost of \$49,400, which is expected to realize a net of \$8,400 in savings agency-wide.
2. Increased work load caused by the full year processing of the Department of Public Works pay roll documents, proposed new positions state-wide for 1954-55 and 1955-56, and a continuing decrease in the number of vacant positions state-wide at a cost of approximately \$50,000.
3. Transfer of the United States Savings Bonds program from the State Employees' Retirement System at a cost in this division for 1955-56 of \$8,000, for an expected savings of about \$5,000 annually.

1	MOTOR VEHICLE FUEL FUND						
2							
3							
4	The principal functions of this division are to refund motor vehicle fuel taxes after auditing and investigating refund claims; and to						
5	administer the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax						
6	Act, the tax on insurance companies, and the assessments on oil and gas operators.						
7							
8	Analysis						
9							
10	Effective January 1, 1955, the Tax Collection and Motor Vehicle Fuel Tax Refund Divisions were consolidated for the purpose of						
11	improving administrative direction to, and audit procedures in, the fuel tax refund function at a substantial saving in temporary						
12	clerical help. It is also expected that the integrated field program will develop some economies. No further change in program is						
13	planned for 1955-56.

STATE CONTROLLER—Continued

Tax-deeded Lands Division

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
	53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
REDEMPTION TAX FUND						
The Tax-deeded Lands Division administers the general procedures for tax sales, tax deeds, and redemptions of lands deeded to the State for nonpayment of taxes; enters into leases for the rental of tax-deeded property; advises county officials regarding the levying and collection of taxes on real property; and renders service to the counties by setting up an abstract and index of tax-deeded lands.						
Analysis						
The \$8,616 increase for 1955-56 over 1954-55 is due principally to a change in the method of funding the divisions abstract and index service from a reimbursable to a state-supported program for those counties that are unable to finance the service from county funds.

General Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)				
1	GENERAL ANALYSIS							
2								
3								
4	Number of positions—General Fund activities-----				2,392.1	2,019.2	2,018.2	—1
5	Number of positions—Special Fund activities-----				204	210.1	213.1	3
6								
7	Total Number of Positions-----				2,596.1	2,229.3	2,231.3	2
8								
9	The \$953,374 over-all decrease in the board's 1955-56 budget below the revised estimate for 1954-55 is due principally to the							
10	transfer of funds to the Department of Alcoholic Beverage Control—offset to some extent by additional funds for increased							
11	work load, and reduced employee turnover. A detailed explanation of these changes may be found by references to the analy-							
12	ses under each division.							
13								
14								
15								
16	GENERAL FUND							
17								
18	GENERAL ADMINISTRATION							
19								
20	This division consists of the general administrative, departmental accounting, and personnel administration functions of the Board							
21	of Equalization.							
22								
23	Analysis							
24								
25	The \$14,226 decrease for the 1955-56 Fiscal Year below the revised estimate for 1954-55 is due principally to the elimination of							
26	four assistant to board member positions, at a savings of \$35,000. A significant portion of the board's administrative responsi-							
27	bility was removed by the recent amendment of Section 22 of Article XX of the State Constitution which transferred the							
28	board's responsibilities for alcoholic beverage licensing and enforcement to a new Department of Alcoholic Beverage Control.							
29	Three clerical positions have been transferred from the accounting section to the new department. These reductions are partially							
30	offset by \$13,000 for the biennial printing of the Revenue Laws of California, \$8,545 for an anticipated further reduction in							
31	employee turnover, and an additional \$7,700 for necessary equipment replacements.							
32	A charge to the Department of Alcoholic Beverage Control for a pro rata share of the board's general administration and research							
33	and statistics overhead accounts for an additional reduction of approximately \$37,000.							
34

48	DIVISION OF RESEARCH AND STATISTICS						
49							
50	This division performs the research, statistical, and report preparation functions of the board.						
51							
52	Analysis						
53							
54	The additional \$5,079 for 1955-56 over the amount estimated for 1954-55 provides \$6,060 for a new associate research technician, offset						
55	by reductions in amounts requested for temporary help and equipment. Cumulative demands on this division for information on						
56	such items as interstate reciprocity problems, alcoholism, property assessments, etc., in addition to recurring work on Board of						
57	Equalization and Franchise Tax Board tax programs has created an acute need for additional technical assistance.

35							
36	SERVICE DIVISION						
37							
38	The principal functions of this division include cashiering, mailing, supply, tabulating, duplicating, and other general services.						
39	Analysis						
40							
41	The \$10,360 decrease in the amount budgeted for 1955-56 below the revised estimate for 1954-55 is due to a complete year's elimination						
42	of six positions and related expenses in the amount of \$143,716 as against a six month's reduction in 1954-55 of \$72,486. These						
43	positions and estimated amounts are transferred to the Department of Alcoholic Beverage Control.						
44	The decrease caused by the transfer to the new department is offset by a \$8,181 increase in salaries and wages for an anticipated						
45	reduction in employee turnover, a \$49,724 increase in operating expenses, and \$2,965 in equipment for continuing work load						
46	increases. Added space and higher rental rates in the amount of \$42,575 is the principal operating expense item. This amount						
47	provides for a full year's rental in 1955-56 of offices approved for 1954-55 and the need for the relocation of certain offices.

General Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	DIVISION OF ASSESSMENT STANDARDS						
2	This division has the administrative responsibility of equalizing the assessment of local property between counties. To fulfill this						
3	responsibility the division is required to issue cost and other appraisal data to the county assessors, to prepare maps for						
4	county use, and in general to assist the county assessors in the performance of their duties.						
5	Analysis						
6	The \$53,061 increase in the division's 1955-56 budget is due principally to an unusually high percentage of vacancies in those posi-						
7	tions authorized during 1954-55 to carry out the provisions of Section 1831 of the Revenue and Taxation Code.						
8	SALARIES AND WAGES

1	RETAIL SALES TAX DIVISION						
2	This division assesses and collects the retail sales and use taxes.						
3	Analysis						
4	The \$178,358 increase will provide approximately \$180,000 for decreased employee turnover and \$37,000 in operating expenses—						
5	principally in traveling for an expanded out-of-state audit program. These amounts are offset by the transfer of four positions						
6	and related expenses to the Department of Alcoholic Beverage Control.						
7	Headquarters

BOARD OF EQUALIZATION—Continued

General Activities

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)				
1								
2	ALCOHOLIC BEVERAGE CONTROL DIVISION							
3								
4	Prior to January 1, 1955, this division assessed and collected the alcoholic beverage excise taxes, and administered the licensing							
5	and enforcement provisions of the Alcoholic Beverage Control Act. Effective January 1, 1955, Section 22 of Article XX of							
6	the State Constitution, and Chapter 20, Statutes of 1954 (First Extraordinary Session) created a Department of Alcoholic							
7	Beverage Control to which the responsibility for licensing and enforcement was transferred. The assessment and collection of							
8	alcoholic beverage excise taxes remains with the Board of Equalization.							
9								
10	Analysis							
11								
12	The \$1,190,653 reduction for the 1955-56 Fiscal Year under the revised amount for 1954-55 provides for a complete year's elimi-							
13	nation of 426 positions and related expenses, as against a six-month period in 1954-55. The remaining \$291,612 is for the							
14	support of the board's alcoholic beverage excise tax program.							
15

Division of Highway Taxes

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1							
2	MOTOR VEHICLE TRANSPORTATION TAX, ITINERANT						
3	MERCHANTS, AND MOTOR VEHICLE FUEL FUNDS						
4							
5	This division administers the Motor Transportation License Tax Act, the Itinerant Merchants Act, assesses the motor vehicle						
6	fuel tax and the liquefied petroleum taxes, and assesses and collects the use fuel tax.						
7							
8	Analysis						
9							
10	The principal reason for the \$53,902 increase for 1955-56 over the revised estimate for 1954-55 is increased work load for which						
11	three proposed new positions and related expenses costing \$18,435 are provided. In 1951-52 this division processed 22,863						
12	active transportation tax licenses and 5,606 active use fuel tax permits. In 1953-54 the number of licenses and permits in-						
13	creased to 24,464 and 7,977, and to an estimated 25,467 and 9,525, respectively, in 1954-55. The remainder is for an anticipated						
14	reduction in employee turnover in the amount of \$26,831, and necessary equipment replacements at a cost of \$8,636.

GENERAL ANALYSIS

Number of positions	1,376.6	1,398.8	1,442.3	43.5
The increase in the proposed budget results principally from the staffing and related expenses for new facilities which will be completed during the budget year and the inclusion of full-year maintenance costs for buildings completed in the current fiscal year.				
The major changes in the proposed budget are summarized as follows:				
New positions for increased work load in Purchasing Division				13,284
New facilities				\$293,345

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	ADMINISTRATION DIVISION						
2	Analysis						
3	The proposed budget reflects the elimination of 12 inspectors of automotive equipment, and the transfer of four Merit Award						
4	Board positions from the Division of Budgets and Accounts. Reimbursements reflect the effect of reduced automotive inspectors.

DIVISION OF FAIRS AND EXPOSITIONS

Exercises general supervision over the district, county, and citrus fairs. Prepares a master premium list, approves premium lists and operating budgets of the fairs. Prepares claims for distribution of funds appropriated from the Fair and Exposition Fund and recommends allocations for Capital Outlay.

GENERAL ANALYSIS

Number of positions

74.3

76.4

77.4

1

Generally the budget provides a continuation of the California State Fair activities at approximately the 1954-55 level. Expenditures will exceed the estimated revenues by \$666,146. It is proposed to fund this deficiency from available surplus in the amount of \$41,146; transfers from the Fair and Exposition Fund under provisions of existing law amounting to \$140,000, and an additional transfer of \$485,000 from the Fair and Exposition Fund.

One new position is proposed on an eight months basis for the purpose of aiding in the preparation of the capital outlay program and the preparation of signs. In the past the position has been financed from temporary help and an offsetting reduction in this allotment has been made.

The budget includes \$77,800 recurring maintenance and special repair items of which approximately \$40,000 have formerly been included in the minor capital outlay budget request.

Department of Finance

DIVISION OF STATE LANDS

ministers the public lands belonging to the State, consisting of school land, swamp, overflowed, salt marsh, tide, submerged, and other sovereign lands. Principal revenue-producing function is the leasing of the public lands for the extraction of oil and minerals.

Office at Los Angeles

GENERAL ANALYSIS

Number of positions 69.4 80.5 76 —4.5

The decrease is due principally to the reduction of work load on the Defense of Tide and Submerged Lands and the completion of work load for the Defense of State's Interest on property along the Colorado River Boundary.

An expansion of the current program of disposing of school lands is proposed. Three new positions and related expenses amounting to \$20,000 are proposed for the appraisal of remaining State School Lands for the purpose of reviewing present and determining future policies regarding disposal of such lands. The disposal of over 500,000 acres of school lands is the objective of this program and it is estimated that this program will be completed by June 30, 1957.

In addition, one new position is proposed on a work load basis for the General Leasing Section. The backlog of work in this section has been steadily increasing and the position is necessary to reduce the accumulated backlog and keep the work current.

GENERAL ANALYSIS

Number of positions..... 727.6 779 802 23

The total budget increase for 1955-56 over 1954-55 is \$153,282, analyzed as follows:

SALARIES AND WAGES: The \$105,535 increase in this category includes the following changes in program and work load:

	Number of Positions	Amount
1. General work load increase:		
Permanent positions added	7	\$20,748
Temporary help reduced	—18.4	—39,123
2. Collections work load increase	7	20,874
3. Allocation audit program	4	19,920
4. Federal comparison and information at source programs	5	19,050
Provision is made to extend 34 positions previously granted on a limited basis.		

OPERATING EXPENSES: The additional \$47,051 is primarily for work load increases. In addition money is provided for printing the revised tax laws, for purchase of revised regulations for field and audit staff, for special investigations, and other purposes.

EQUIPMENT: A total of \$51,863 is proposed. Of this amount \$5,368 is provided for new positions, \$14,215 is directly related to increased work load requiring additional file capacity, \$12,579 is related to both work load increase and improved operations, and \$6,175 provides for directories, books and related items. The balance \$13,526 is for replacement of worn out and obsolete items.

^a Composed of savings in salaries and wages, \$36,540; operating expenses, \$18,058; and equipment, \$1,263.

^b Composed of savings in salaries and wages, \$17,852; operating expenses, \$41,830; and equipment, \$814.

		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	ADMINISTRATION						
4	In addition to the general administration of the state income and franchise tax programs, this division includes the agency's accounting, statistical, collection, legal, and special investigative functions.						
7	Analysis						
9	The \$52,743 increase in the budget year is principally due to increased work load. There are no major program changes in the division. Additional personnel is proposed for the following reasons:						
11	1. Three clerical positions are proposed in lieu of temporary help.						
12	2. Six clerical positions and one field representative position are proposed for increase work load in the collections section.						
13	During 1951-52 the collection unit received 49,248 items while during 1953-54 the unit received 106,963 collection items. A continuation of this rate of growth is anticipated in the budget year.

69	FRANCHISE TAX DIVISION						
70							
71	This division administers the Bank and Corporation Tax Law.						
72							
73	Analysis						
74							
75	The \$57,447 increase provides in part for an augmented allocation audit program anticipating increased revenue, and in addition provides staff for increased work load.						
76							
77							
78	Five positions are extended for the following programs formerly authorized to June 30, 1955:						
79	1. One income and franchise tax examiner II and two clerks for the processing and reviewing of declarations regarding sub-						
80	versive activities by corporations claiming an exempt status, as provided by Section 23705 and Chapter 4, Article 2 of						
81	Part 2 of the Revenue and Taxation Code.						
82	2. One accountant-auditor I for checking sources of information for locating taxpayers. In 1953-54 this program obtained						
83	\$118,000 in additional assessments.						
84	3. One clerk to assist general audits section head in certain clerical functions related to audit control.						
85	Two clerical positions are proposed because of increased work load.						
86

29	PERSONAL INCOME TAX DIVISION						
30							
31	This division administers the Personal Income Tax Law.						
32							
33	Analysis						
34							
35	The \$43,092 increase in expenditures for the budget year is principally due to increased work load. There are no major program						
36	changes in the division. Additional positions are proposed for the following reasons:						
37	1. The extension of 20 clerical positions is proposed for continuation of the Federal Comparison Project which was established						
38	July 1, 1954. This investigation is expected to last three years and to realize approximately \$4,000,000 in added revenue.						
39	2. Five additional junior accountant-auditor positions are proposed for increased work load in the Los Angeles and San Francisco						
40	offices. The increased work load is due in part to the Federal Comparison Project activity for which auditor positions						
41	were not previously provided, and in part to the Information at Source program. In 1951-52 the Personal Income Tax Law						
42	vision received 2,300,000 reports and sent 99,000 to the field offices. It is anticipated that 4,740,000 reports will be received						
43	and 215,000 processed in the field during 1955-56.						
44	3. Two clerical positions are proposed for the headquarters preliminary examination unit for increased work load brought about						
45	by increasing volume and complexity of the tax computation features in the law.						
46	4. During the current fiscal year nine limited term clerical positions were established by a reduction in temporary help. These						
47	positions are extended into the budget year.

GENERAL ANALYSIS

Number of positions-----	37.6	38	40	2
The State Treasurer's program for 1955-56 will be substantially the same as that provided for in the prior fiscal year.				
A delay in the mechanization of the warrant operation required an additional conversion of permanent positions to temporary help and resulted in a savings in permanent positions of about two man-years during 1954-55.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
	53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			

FIELD OPERATIONS

This function includes all field personnel, field office operation, and the Los Angeles headquarters.

Analysis

To achieve more adequate policing of the highways 24 additional traffic sergeants and 246 additional traffic officer positions are proposed. These positions together with related operating expenses and equipment comprise the bulk of the increase.

In addition four dispatcher clerk positions are recommended to provide for central dispatching service at four locations as a portion of a program to concentrate dispatching activities at approximately 25 points. Also proposed is a moderate increase in time of part-time janitor positions.

DEPARTMENT OF INDUSTRIAL RELATIONS

Department administers the state laws relative to labor through its nine divisions. In general, it is the duty of the department to foster, promote, and develop the welfare of the wage earners of California; to improve their work conditions; and to advance their opportunities for profitable employment.

EXPENDITURES	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	DIVISION OF ADMINISTRATION						
2	The Division of Administration is composed of the director's office, the Supervisor of Industrial Accident Self-Insurance Plans, and						
3	the accounting office. The functions also include all general housekeeping services and fiscal management.						
4							
5	Analysis						
6							
7	Provision is made for minor increases in rent at such locations where renewal of existing leases must be negotiated at higher rates						
8	All departmental automobiles are to be assigned to the Department of Finance automotive pool on July 1, 1955. Automobile						
9	operation is therefore increased to 5 cents per mile plus storage. The increase in operating costs is offset against equipment						
10	purchases of new and replacement automobiles which are eliminated in the budget year. An intermediate clerk, established during						
11	1954-55 to organize a departmental automobile pool is deleted in 1955-56.						
12

56	DIVISION OF INDUSTRIAL WELFARE						
57							
58	Administration						
59							
60	The Division of Industrial Welfare is responsible for the administration and enforcement of laws and the issuance of orders relating						
61	to minimum wages, the Eight-Hour Law for Women, the Weight Lifting and Seating Law for Women, and the Industrial Home-						
62	work Act. The work program consists of making inspection of establishments employing women and minors, issuing citations and						
63	holding hearings on disputed or controversial cases, and referring cases of wilful and persistent violators for prosecution.						
64							
65	Analysis						
66							
67	No work load or program changes are proposed in this division.

2								
3	DIVISION OF APPRENTICESHIP STANDARDS							
4								
5	The establishment and functioning of the Division of Apprenticeship Standards is provided by the Shelley-Maloney Apprenticeship							
6	Labor Standards Act of 1939. This act creates an Apprenticeship Council, which includes the Director of Industrial Relations							
7	as an ex officio officer, and provides that the council will establish standards for minimum wages, maximum hours, working							
8	conditions of apprentices; and advance their opportunities for profitable employment.							
9								
0	Analysis							
1	The presently authorized level of service is continued. Indentured apprentices are anticipated to remain at 17,000 to 18,000, and sup-							
2	porting work load areas measuring registrations, completions, cancellations, etc., are expected to continue at the current level.							
3	Promotional activities equivalent to six man-years are presently being expended in organizing new apprenticeship committees,							
4	contacting new firms, and counseling. As this level of promotional time is considered adequate, further expansion in this area							
5	is not budgeted.							
6

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	DIVISION OF LABOR STATISTICS AND RESEARCH						
2	This division collects and compiles facts and statistics relative to the condition of labor in the State; publishes monthly statistics of						
3	employment, and, in cooperation with the Department of Employment, prepares monthly estimates and forecasts on civilian employ-						
4	ment and unemployment within the State. It works in conjunction with other state agencies and the U. S. Bureau of Labor						
5	Statistics in the collection and presentation of this data. The division makes studies and investigations in the field of industrial						
6	relations. It compiles statistics of industrial accidents for use in accident prevention work; administrative statistics for the Indus-						
7	trial Accident Commission, and performs similar services for other divisions of the department. All new factories are required by						
8	law to be registered with the division.						
9	Analysis						
10	An additional key punch operator is proposed as a result of increased statistical programs pertaining to work injuries as well as						
11	employment and pay roll schedules. This budget also reflects an increased mechanization. The increase in machine rental is offset						
12	against reduced salaries.						
13	SALARIES AND WAGES

GENERAL ANALYSIS

23	Number of positions	48	47.6	48.5	0.9
24	Provision is made for continuation of the same level of activity as currently authorized plus one new position for increased work load.				
25	SALARIES AND WAGES: Increase of \$6,122 is primarily due to one new position for work load.				
26	OPERATING EXPENSES: Decrease of \$20,796 is due to elimination of the research contract for hazards caused by cleaning solvents of \$25,000 and various small increases for the proposed new position.				
27	EQUIPMENT: Increase of \$3,166. The \$6,721 budgeted provides for replacement of four automobiles, one additional automobile, and other small equipment.				
28	REIMBURSEMENTS: The decrease of \$25,000 represents the decreased amount to be paid by the Board of Dry Cleaners for research in fire hazards.				
29	The following is a functional analysis of the agency's expenditures for comparative years:				
30	Public and private school inspections	\$42,681	\$52,303	\$54,477	
31	Welfare institution inspections	31,777	32,611	33,986	
32	Private mental hospital inspections	5,608	5,755	5,997	
33	General and private hospital inspections	51,093	52,433	54,644	
34	State institution fire protection and training	23,677	24,298	25,323	
35	District and county fairs inspection	7,477	9,686	10,096	
36	Places of public assemblage inspections	12,150	12,469	12,995	
37	Dry cleaning plant inspections	66,358	68,099	70,970	
38	Dry cleaning shop inspections	4,050	4,156	4,331	
39	Flame retardants, flammable fabrics, wearing apparel and laboratory testing	23,365	23,978	24,990	
40	Other fire prevention	43,303	33,925	35,396	
41	TOTAL EXPENDITURES	\$311,539	\$319,713	\$333,205	

^a Composed of savings in salaries and wages, \$9,135; operating expenses, \$2,413; and equipment, \$828.

^b Composed of savings in salaries and wages, \$2,086; operating expenses, \$828; and equipment, \$229.

GENERAL ANALYSIS

Number of positions

550

587.4

613.4

26

The budget as proposed includes additional legal positions to reduce the backlog of cases in the Division of Civil Law, additional clerical assistance to the attorneys and additional personnel in the Bureau of Criminal Identification and Investigation and the Bureau of Narcotic Enforcement to meet increased work load.

Included in the program for the current fiscal year are expenditures of \$100,000 for investigations concerning alcoholic beverage licenses. The cost of these investigations was financed by the allocation of that amount from the Emergency Fund.

In addition, a \$24,922 allocation was made from the Emergency Fund in 1954-55 year to cover added costs for telephone, teletype rental, cost of suits, and out-of-State traveling.

DIVISION OF GENERAL ADMINISTRATION

Includes the Office of the Attorney General, the accounting and personnel sections, the stenographic pool, other service functions, and the teletype section.

Analysis

The five additional stenographer positions are for stenographic assistance to the proposed attorney positions in this budget and to bring the working ratio of stenographers to attorneys to the standard of two to three.

The additional clerical position is proposed for the San Francisco office to assist in the filing of papers with the courts, the sorting of mail, and numerous other related tasks.

GENERAL ANALYSIS

The Department of Mental Hygiene's 1955-56 Fiscal Year budget provides a program that includes further improvement in level of service consisting of:

- More intensive ward staffing coverage, additional physicians, psychologists, intramural social workers, and rehabilitation therapists in the mental hospitals,
- Establishment of a preadmission and diagnostic clinic at the Porterville State Hospital,
- Establishment of an initial service at the Neuropsychiatric Institute at University of California, Los Angeles, and
- Additional equipment.

The work load changes in existing facilities include a significant number of personnel for: (a) ward reclassifications based upon resurvey in 1954; (b) activation of new facilities that include three ward buildings at Pacific, 14 ward buildings at Porterville, receiving hospital at Sonoma, increased capacity at Stockton, Patton, Mendocino, and Camarillo.

DEPARTMENTAL ADMINISTRATION, LANGLEY PORTER CLINIC,
NEUROPSYCHIATRIC INSTITUTE AT UNIVERSITY OF CALIFORNIA, LOS ANGELES, AND
OUTPATIENT CLINICS

Analysis and expenditures for these agencies will be found under their respective budgets.

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT

In this group are the following:

Eight state hospitals for the care of mental patients:

Agnews, Atascadero, Camarillo, Mendocino, Metropolitan, Napa, Patton, and Stockton.

Three state hospitals for the care of mentally defective patients:

Pacific, Porterville, and Sonoma.

Two state hospitals for the care of both the mentally ill and mentally defective patients:

De Witt, and Modesto.

These hospitals provide treatment and care for the mentally ill, mentally defective, alcoholics, narcotic addicts, sexual psychopaths, and defective and psychopathic delinquents, with the emphasis being on treatment centers rather than custodial institutions.

	ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56	CHANGE FROM 1954-55
POPULATION AND UNIT COSTS				
Average population	42,017	45,377	48,377	3,000 (6.6%)
Average per capita costs ^a	\$1,260	\$1,304	\$1,356	\$52 (4%)

In general the increase of \$6,341,020 (10.4%) over 1954-55 is the result of the following factors:

- Population changes
- Price level
- Authorized position costs
- Recruitment and turnover of personnel reflected in salary saving
- Standards of allowance for additional positions:
 - New positions for work load.
 - New positions to activate newly constructed buildings.
 - New positions for increased level of service.

The following proposals are common to the hospital budgets and are, therefore, discussed as groups rather than individually under each hospital.

^a Excludes departmental and clinic operation costs and other current expenses.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES: The increase of \$5,429,734 provides for the following 1,495.1 new positions at a cost of \$4,230,568.

Psychiatric Technician and Nursing Personnel:

1	Senior psychiatric nurse	\$2,973
9	Psychiatric nurse	25,515
17	Senior psychiatric technician II	37,231
51	Senior psychiatric technician I	101,502
981	Psychiatric technician trainee	2,273,133

1,059 Total \$2,440,354

This budget will provide the first ward service increase approved for general wards other than receiving and treatment wards since the 1951-52 G.B. Five hundred sixty-seven positions are included to staff the new facilities and the existing wards at the level of service approved for the 1954-55 Fiscal Year, and 492 positions are included to improve the level of service. The distribution of positions and costs are indicated in the following schedule:

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

One psychiatric nursing education director position is required to head the affiliate nursing program in the case of abnormal children at the Sonoma State Hospital.

Three supervising psychiatric nurse positions are required to complete the staffing for 24-hour daily coverage of the acute wards at the Mendocino State Hospital. This will provide comparable staffing authorized at other mental hospitals for receiving and treatment services.

Five supervising psychiatric nurses are required for the purpose of augmenting present staff for in-service training of psychiatric technician trainees and other nursing staff. The present in-service training staff was authorized in 1950 and since that time the hospital staffs have increased in size, thereby increasing the teaching load at Camarillo, Napa, Pacific, and Porterville.

Five supervising psychiatric technicians are required to establish a sixth area assignment within the organization of nursing service at the Camarillo State Hospital. The distribution of capacity in this hospital will provide for 860 beds in the acute area (which includes the juvenile unit), and 5,387-bed capacity distributed in five nonacute areas. Nonacute area assignments generally include capacity under 1,000 beds.

15 Surgical nurse \$57,150

The hospitals are performing increasing numbers of major and minor operations. It is necessary to have at least two surgical nurses assist in main surgery and one for central supply and in some of the large hospitals another one for assisting in minor surgery, hospital clinics, such as fractures, rectal, and surgical consultations. This allowance will permit a staff of five at Agnews, Camarillo, Napa, Patton, and Stockton; a staff of four at Sonoma; and a staff of three at each of the other seven hospitals.

44 Physician and surgeon/psychiatrist 433,488

Forty-four physician positions are provided to raise the standard of care and treatment. As the last improvement in physician staffing occurred in the 1952-53 budget, ample time has now elapsed for the absorbing of this increase into an integrated treatment program. It is therefore considered desirable to provide an additional increase in this budget to permit a continued advancement in the treatment program.

9 Senior clinical psychologist 51,948

Nine senior clinical psychologist positions are provided to increase the level of service in the more acute areas, and to recognize the desirability of moving toward a more balanced program in terms of relative advancement toward a standard for the various professional and technical groups.

1 Senior dentist 8,112

One dentist position is required to care for the increase in resident population at the Porterville State Hospital.

Other Professional and Special Groups

2 Supervising psychiatric social worker \$10,464

12 Senior psychiatric social worker 56,880

14 Total \$67,344

Twelve senior psychiatric social worker positions are included to increase the level of intramural social service approximately 10 percent. No increase in level of service in this area has been provided in the last two budgets. This is another case in which the level of service is low as compared with other phases of the department's program. The addition of two supervising psychiatric social worker positions are required for the growth in social service staff.

It is the responsibility of the social worker to get information for medical use from relatives, to help patients solve family problems while they are in the hospital, and to work closely with the doctors to survey hospital population for possible placement material. Many of the patient's relatives visit the hospital and that is the ideal time to work out plans for the patient's reception at home.

1 Occupational therapist II \$4,296

6 Recreation therapist 23,976

4 Occupational therapist I 15,240

12 Coordinator of volunteer services 47,952

23 Total \$91,464

Five therapist positions are required for work load increase factors and 18 are included to improve the level of service as the rehabilitation therapists are presently the lowest staffed professional group. The rehabilitation therapists work directly with difficult patients and indirectly with others by training and support of psychiatric technicians who carry out simple activities on the wards. The rehabilitation therapist observes and reports to the doctor the behavior of the patients to therapeutic situations by means of clinical records.

The coordinator of volunteer services at each hospital is the result of increasing recognition of the need to provide proper planning and supervision for the increasing number of volunteers who are giving their time and service to the patients. Volunteers provide service both as individuals and groups, and in order to do an effective job in the hospital they must be properly recruited, screened, oriented, trained, and supervised.

2 Pharmacist \$9,960

One-tenth relief position for each hospital that has one pharmacist position is necessary to permit uninterrupted service during periods of vacation. A second full-time position is included for Patton State Hospital to cover both the tuberculosis hospital and relief, which is comparable staffing to that provided for Napa and Camarillo.

1 Electroencephalograph technician 3,456

One additional electroencephalograph technician is provided for the increasing work load at the Camarillo State Hospital. The present technician can do almost 60 tests per month in addition to the other required duties and has been a month behind in this work on urgent cases. The large treatment center requires the additional technician in order to furnish the doctors with tests within a reasonable time.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

Other Professional and Special Groups—Continued

2 X-ray technician ----- \$6,912

An additional X-ray technician is included for work load increase at Camarillo and Patton State Hospitals.

Camarillo has two X-ray technicians now authorized. This hospital does the X-ray therapy for the southern hospitals. Therapy treatments given during the period January to July, 1953, number 130 and for the same period of 1954 the number given was 382. Diagnostic examinations for the same period increased from 1,742 to 3,480.

Patton has two X-ray technicians now authorized. The increased work load since the TB Unit was established is more than one full-time assignment. Besides patients, it is necessary to check approximately 200 employees on the tuberculosis service quarterly. The hospital has an admission rate of over 3,000 patients per year. Many patients returning from leave must be checked so the work load in the Receiving and Treatment Center is in excess of the capacity of one technician.

2 Photographer (clinical) ----- 7,992

A position of photographer is included for work to be performed in the Napa and Camarillo receiving and treatment centers. The medical profession recognizes the value of clinical photography for work with clinical material which includes microscopic slides, autopsy material and surgical specimens. The slides are used for teaching, conference work, and development of research data by the medical staff. Other requirements of the position include the preparation of identification photographs of patients for their file. The large general hospitals, such as Los Angeles General Hospital and Harbor Hospital, and many government hospitals, have clinical photography departments authorized, especially those located near training centers and medical schools.

7 Physical therapist ----- 26,670

Under medical direction, physical therapists administer hydrotherapy treatments, electrotherapy, diathermy, light therapy, ultrasonic, active, passive, resistive therapeutic exercises and local or general massage, muscle training and corrective exercise. Five of the eight positions are to re-establish positions previously abolished because of extended periods of vacancy, and two positions are for Pacific and Porterville where the work load is increasing.

6 Barber ----- 18,828

A barber position is included for each of the following hospitals: Agnews, Atascadero, DeWitt, Mendocino, Patton, and Porterville. The other seven hospitals have an authorized position to train the psychiatric technicians in the correct methods of hair cutting, trimming, shampoos, etc. The person in this position would work primarily with those psychiatric technicians associated with male patients in a similar way the beauty shop managers work with those technicians assigned to female wards.

13 Teacher ----- 57,498

One elementary school teacher is included for Atascadero State Hospital to assist the one authorized elementary school teacher with a group of approximately 60 patients that will reside at the hospital on an average of 18 months.

Three grade school teachers are included for the Camarillo State Hospital juvenile unit where the school patient enrollment is estimated to more than double from the present 60.

Two elementary school teachers are included for Pacific State Hospital where there is presently a waiting list of 18 elementary-level patients who can and should be included in the school program which the present school staff cannot accommodate. The 50 percent increase in population will increase the elementary-level waiting list to about 40.

Four teachers, namely, teacher of cerebral palsied children, teacher of mentally defective deaf children, music teacher and speech correction teacher are included for the Porterville State Hospital on the basis of comparability of teaching staff to Pacific and Sonoma, as well as for increased enrollment. One elementary teacher is included for work load increase in 1955-56.

Two teachers are included for the Sonoma State Hospital. A screening of patients indicates that at least 20 percent of the patients have speech disorders. There is at present a waiting list of selected patients with serious speech defects at the speech center which indicates the need for the second speech correction teacher. A teacher for hard of hearing is included to teach basic skills, provide instruction in speech reading, auditory training, speech and voice training, and the use of amplification devices. Also to work with the speech correction teacher in effecting the students' ability to acquire new, corrected speech patterns. A recent survey of the hard-of-hearing patients at Sonoma indicates approximately 50 patients in this category who are not being cared for.

Preadmission and Diagnostic Clinic

Porterville State Hospital (7 positions) ----- \$33,378
Pacific State Hospital (2 positions) ----- 6,618

In 1952 the Legislature authorized the establishment of a Preadmission and Diagnostic Clinic at Pacific State Hospital and Sonoma State Hospital. These units are operated as an all-purpose clinic offering the three types of service in consultation diagnosis, and treatment of children, adolescents, and adults having a problem related to retardation. The team consisting of a psychiatrist, a psychologist, two social workers, and clerical assistance evaluate the most urgent applications to determine whether hospitalization is necessary. The diagnosis of mental retardation is not in itself an adequate reason for institutional care.

At the time of opening the Porterville State Hospital, it was deemed advisable to defer the establishment of this type of unit until the hospital was in operation. Transfers from the other hospital have been practically completed and direct commitment to Porterville is now regular procedure.

The inclusion of an additional clerk and graduate nurse at Pacific State Hospital will (1) permit the return of a psychiatric technician to the ward temporarily assigned to this duty, and (2) the clerical assistance is required during the period the new wards are being occupied and until the work load returns to a normal rate.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

Administration Personnel

4	Hospital industry supervisor-----	\$21,984
8	In a study of the business services departments of the hospitals, it was recognized that the size of the hospitals, coupled with the complexity of operations, required further supervisory assistance in this department. As a result of the study, positions were authorized at all hospitals except DeWitt, Modesto, and Pacific. Porterville was not in existence at that time. These hospitals have now increased to a size that warrants assistance in this department. The position of hospital industries supervisor will relieve the assistant superintendent, business services by providing direct supervision over such activities as laundry, tailor, sewing rooms, mattress and upholstery shop, shoe repair shop, and other related operational activities.	
2	Storekeeper I-----	7,260
17	One position each is requested for Atascadero and Mendocino for central control of engineering and maintenance supplies to eliminate loss of materials and supplies and increase the efficiency of maintenance personnel by stocking of required items. These two hospitals now have space available for centralization of the handling of engineering and maintenance supplies. In addition, the position will keep separate minor construction project records of all material ordered for that purpose. Ten of the other state hospitals have a storekeeper position now authorized in order to perform the above functions.	
4	Telephone operator-----	11,376
25	Two telephone operators each at Napa and Patton are included to provide full 24-hour coverage for two-position boards at these hospitals. The hospitals have changed from one-position boards, which creates an additional post, plus a relief position. The increase from a staff of five to a staff of seven will provide Napa and Patton with the same coverage as Agnews, Camarillo, and Stockton State Hospitals which also have two-position boards.	

Clerical Personnel

8	Intermediate clerk-----	22,752
34	Eight additional intermediate typist-clerk positions are required for the personnel sections of the various hospitals to maintain the work load ratio of one clerk per 250 authorized positions.	
12	Intermediate account clerk-----	34,128
37	Eleven additional positions are included for the mental ill hospitals and one additional position for Pacific State Hospital to staff for collection of patients' board charges and veteran investigation. The formula of one position per 1,000 annual admissions plus one position per 2,000 resident population will permit some additional reviews and follow-ups to be made and resultant increase of revenue collections. The duties include review of patients' commitment papers, medical records, questionnaires completed by patients, patients' valuables and documents, benefit claims filed with insurers, government organizations, such as Veterans Administration, U. S. Public Health Service, Social Security Administration.	
6	Intermediate account clerk-----	17,064
46	Six intermediate account clerks are included to staff the cashier and patients' property and fund section. With the exception of Atascadero and Pacific, one intermediate position is now authorized at each hospital for this function. One additional position is included for the larger hospitals (Agnews, Camarillo, Napa, Patton, and Stockton) for specific coverage of the patients' personal property function and to act as relief for the cashier. Since Pacific does not have a position authorized for this combined function, a position is included to place this hospital on a comparable level with the smaller hospitals.	
4	Intermediate clerk-----	11,376
54	The four positions are included for work load increase in the filing sections of Camarillo, Mendocino, Modesto, and Sonoma State Hospitals.	
3	Intermediate typist-clerk-----	8,532
58	Three clerical positions are included for the X-ray departments of Mendocino, Napa, and Patton State Hospitals. The duties are to keep current index and cross-index files on X-ray films, electroencephalograms, electrocardiograms, and thereby relieve the X-ray technicians of other clerical duties, permitting more time for the professional side of the work. In addition to the routine X-ray work for all hospitals, it is necessary to have a second clerk at Napa and Patton to take care of the heavy clerical work connected with treatment of tubercular patients and one additional for the Mendocino's receiving and treatment facility.	
6	Intermediate typist-clerk-----	17,064
65	Six additional positions are included for the larger hospitals (Agnews, Camarillo, Napa, Patton, Stockton, and Sonoma) to provide clerical assistance in the clinical laboratories to relieve laboratory technicians of clerical work and permit them to spend full time in the technical functions for which they were authorized.	
1	Intermediate typist-clerk-----	2,844
70	A typist-clerk is provided for Modesto's rehabilitation therapist department to type instructions for therapists, nursing personnel, program schedules, maintain records and files on patients' progress while under treatment, typing of reports for doctors so that proper medical evaluation can be made, general correspondence in the office, and to perform other clerical duties in the office of the supervisor. This allowance has been provided other hospitals when the therapist staff reached 10.	
2	Intermediate stenographer-clerk-----	5,976
76	The two positions are included to provide stenographic assistance for the director of clinical services at DeWitt and Modesto. These two hospitals provide one-third time of a stenographer from the medical records pool. The volume of work in their own offices has made it necessary to assign the equivalent of a full-time stenographer.	
13	Intermediate typist-clerk-----	36,972
81	Thirteen additional positions are requested to provide full-time clerical assistance in the in-service training departments of the various hospitals. Currently, part-time service is provided from the medical clerical pool. Because of the expansion of the in-service training programs at the hospitals during recent years, it is believed that full-time clerical assistance is now justified for this function.	

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

Clerical Personnel—Continued

23	Intermediate typist-clerk	\$68,724
The additional clerical positions are based on the ratio of one typist for each three professional staff members, including psychiatrists, physicians, psychologists, social workers, and chaplains. The medical clerical pool must take medical dictation, consisting of examinations, progress notes on patients, other medical reports; correspondence with relatives and other agencies, maintain records on diagnosis, deaths, leaves of absence; prepare surgical records, shock therapy reports, tuberculosis reports, autopsy records, electroencephalograph reports, daily reports of patients in restraint and seclusion, and many other records required in the hospital.		
2	Intermediate account clerk	5,688
Two additional positions for Patton and Pacific are provided to properly record the accountability of property and equipment based on work load increases. The positions are based on a standard of one clerk for each 1,800 beds.		
5	Intermediate information clerk	14,220
Additional information clerks are included to provide Porterville and Sonoma with a receptionist position where none is presently authorized, and two positions for Napa and one for Patton are included to provide comparable allowances with Agnews and Stockton State Hospital. Information clerks are required for directing relatives, visitors, and business callers to various offices, clinics, wards, etc.		
2	Intermediate clerk	5,688
Two intermediate clerks are included for DeWitt and Sonoma for handling incoming mail, date stamping, preparing mail for distribution, segregating out-going mail, routing internal communications, operating mimeograph machines, operating postage meter machine and other related work. This will provide comparable staffing with other hospitals.		
1	Intermediate typist-clerk	2,844
This position is required to provide clerical assistance for the school department at the Porterville State Hospital which is comparable to the authorization for Pacific and Sonoma State Hospitals. The present teaching principal performs all clerical work at the expense of supervision of other teachers.		
1.2	Temporary Help (Microfilming)	
	Agnews State Hospital	1,386
	Patton State Hospital	1,848
The microfilming of all inactive patient clinical histories was started in the 1951-52 Fiscal Year. About 60 percent of the material was put on film when the allotment was exhausted. These two hospitals will complete that portion of the records started under previous authorization.		

Food Service Personnel

3	Institution food administrator, grade I	12,888
Mendocino, Metropolitan and Patton State Hospitals are provided food administrator positions to plan, direct and supervise a therapeutic diet program comparable to the service that has been authorized and is functioning at seven other state hospitals. Mendocino and Patton have new receiving and treatment buildings which provide space and equipment for a diet kitchen program. Metropolitan State Hospital plans to utilize facilities in their present main kitchen, for the diet program. The administrative dietitian directs the interpretation of physician's prescriptions for therapeutic diets and assures their proper preparation and service.		
1	Supervising cook, grade I	3,810
10	Cook	34,560
7	Assistant cook	19,908
One supervising cook, grade I, is included to give full coverage of two posts plus relief at Porterville State Hospital. This is comparable staffing to the other state hospitals. Five cooks and one assistant cook are included to provide corrective diet kitchen staffing for Mendocino and Patton State Hospital's new receiving and treatment buildings, as well as Agnews' new food service building. The positions permit coverage on two shifts, with relief provided by the present cook staff for a daily operation. This is comparable to service already provided for at five other state hospitals. Five cooks and six assistant cooks are included on the basis of work load for Camarillo, Pacific, and Sonoma State Hospitals.		
1	Baker	2,961
1	Meat cutter	1,686
One baker to provide relief for the two now authorized baker positions and an additional meat cutter, are included for the Porterville State Hospital, based on increased population in the 1955-56 Fiscal Year.		
47	Food service assistant	121,260
An increase of 47 food service assistant positions are included to provide 11 kitchen post assignments and 36 dining room assignments. The 11 additional positions are included on the basis of work load and comparable staffing among the hospitals to be distributed one each at Agnews and Metropolitan, three at Pacific, four at Porterville, and two at Sonoma. The 36 food service assistant positions are assigned to congregate dining rooms on the basis of 12 each at Camarillo, Napa, and Stockton, for the receiving and treatment buildings.		
1	Laundry supervisor	3,456
15	Laundryman	44,820
5	Laundress	14,220
12	Laundry helper	30,960
The laundry staff was reviewed for changes in work load since the state-wide survey was conducted by the management engineers. The adjustments provide adequate additional laundry personnel to keep pace with the projected work load estimated to June 30, 1956. The distribution of new personnel provides five positions for Camarillo, two for DeWitt, one for Mendocino, two for Metropolitan, one for Patton, three for Pacific, 13 for Porterville (due to critical shortage of patient help and increased laundry poundage at Porterville), and six for Sonoma (two are for reduction of patient details at Sonoma).		

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

Food Service Personnel—Continued

1	Assistant seamstress-----	\$2,706
2	On the basis of work load comparability with Sonoma, the additional position is required for in-	
3	creased population at Porterville in the 1955-56 Fiscal Year. The operations of Porterville State	
4	Hospital for the mentally retarded require a great amount of mending and repairing of linens and	
5	clothing, and the making of clothing for special types of patients.	
6	1 Supervising housekeeper-----	3,138
7	1 Housekeeper-----	2,844
8	18 Janitor-----	51,192
9	Two positions plus one relief position are provided Camarillo State Hospital for cleaning the new	
10	Juvenile Unit Administration offices and school building.	
11	One position is provided for work load increases at Mendocino for cleaning the new auditorium and	
12	library with more time available for other facilities.	
13	One additional position is included to provide Metropolitan State Hospital with the same level of	
14	service that is budgeted for Mendocino State Hospital.	
15	Six additional janitor positions are provided for Napa State Hospital to replace all patient help in	
16	the performance of janitorial functions in the tubercular unit. The hospital estimates that 32 man-	
17	hours per day will be required, seven days a week. This coverage will require four posts plus relief	
18	positions. Similar service was previously allowed for the Patton tubercular building.	
19	One additional position is included for the cleaning of the Napa receiving and treatment building.	
20	Two full time positions were previously allowed in the 1953-54 budget for this function.	
21	Two additional positions are included over the present authorizations for janitorial services in the	
22	Patton receiving and treatment building.	
23	One janitor position is included to provide cleaning service for the new administration building	
24	annex at Pacific State Hospital to be completed within the 1955-56 Fiscal Year.	
25	Five positions are required for complete service of the Sonoma tubercular unit similar to the service	
26	included for Patton and Napa State Hospitals.	

Maintenance Personnel

17	Maintenance personnel-----	\$69,822
One additional stationary engineer position is required to give proper attention to the equipment and operation of the new food serv-		
ice building at Agnews State Hospital which is to be in operation before the next fiscal year.		
One additional plumber position is required for Atascadero State Hospital due to the additional buildings now being activated. One		
plumber cannot keep in operation all the fixtures, lines, and distribution systems.		
One additional stationary engineer position is required for the new juvenile unit to be placed in operation during 1955-56 and for		
the additional load recently added by Kitchen No. 3 at Camarillo State Hospital.		
One building maintenance man will be required for the new juvenile unit to keep all equipment in operation and to do minor repairs		
at Camarillo.		
One refrigeration engineman is required for servicing refrigeration units in Camarillo's kitchen Number 3.		
One plumber position is included for work load brought about by new buildings at the Mendocino State Hospital including the		
receiving and treatment building, phase II.		
The work load for Mendocino electricians has reached a volume that two electricians cannot give adequate coverage requiring an		
additional position. The newer buildings now being put into service contain many additional motors, elevators, and electrical		
appliances that require constant inspection and maintenance.		
A position of locksmith is urgently needed at Modesto State Hospital as the lock system has deteriorated to the extent that it is		
now a major problem to maintain.		
One stationary engineer is required for Patton State Hospital for work load added by new buildings.		
One building maintenance man is required for work load increases in the maintenance program resulting from new buildings at		
the Stockton State Hospital.		
One stationary engineer and one electrician are required for work load increases at Pacific State Hospital resulting from the open-		
ing of new wards and other buildings.		
Four maintenance positions are required for Porterville State Hospital because of the number of new buildings and the large number		
of mechanical units in each building. The required positions are a painter, plumber, stationary engineman, and refrigeration		
engineman.		
One stationary engineer is required for Sonoma's new kitchen and the increasing amount of heating and ventilating equipment		
throughout the hospital that requires a skilled mechanic's services continuously.		
2 Automotive equipment operator-----		\$5,142
Two additional positions are proposed for Porterville State Hospital for increased deliveries related to		
the opening of new wards during the budget year. This staffing will be comparable to that of Pacific		
State Hospital, which is the next larger hospital housing the same type of patients.		
8.5 Groundsman and flower gardener-----		20,700
The eight-and-a-half groundsman positions are required for maintenance of grounds at the Porterville		
State Hospital.		

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR MENTAL ILL AND MENTAL DEFICIENT—Continued

SALARIES AND WAGES—Continued

Farming Personnel

An additional allotment of \$3,000 is included to provide seasonal help at the Agnews cannery during the canning season. This amounts to approximately one full-time position. The canning season at this institution lasts well over six months due to the processing of various seasonal vegetables, as well as fruit. The seasonal help will provide necessary assistance to the canning supervisor. One head farmer II and one dairyman are included to establish general farming activities and dairy, at the Atascadero State Hospital at a cost of \$9,872 for the two positions.

SALARY SAVINGS: The increased expenditures for salaries and wages are partially offset by an increase in salary savings in 1955-56 due to the number of new positions to be recruited.

OPERATING EXPENSE: An increase of \$836,282 is explained within the analysis of each hospital. The increase is generally due to population factors and to physical plant expansion.

EQUIPMENT: Equipment items totaling \$862,807 are explained within the analysis of each hospital and represent replacement equipment of \$516,852, or 3.3 percent of the total investment in equipment on June 30, 1954, and additional equipment amounting to \$345,455, a total decrease of \$70,387, or 7.5 percent below the 1954-55 Fiscal Year allowance for equipment. The equipment requests include office equipment for new positions; additional feeding and housekeeping equipment for increased population and for improvement of conditions where there is inadequate equipment to meet existing needs; additional equipment to continue the level of medical care and treatment of patients for the increased population and also to improve service that is below standard.

REIMBURSEMENTS: A total of \$1,074,048 is estimated for 1955-56, an increase of \$40,132 over 1954-55. The increase is attributable to services to employees for meal sales and rental of quarters.

Department of Mental Hygiene
DEPARTMENTAL ADMINISTRATION

Under the administration function, the department carries on the activities of general direction of the hospitals, clinics, special programs, fiscal accounting and budget control, collection activities, deportations and transfers, guardianships, statistics, personnel services, food administration, nursing service, maintenance service, community services, and private institution inspections.

ADMINISTRATION

Analysis

SALARIES AND WAGES: The increase of \$30,110 is as follows:

Accounting:

The estimated requirements for peak loads due to budget work and year-end closing of accounting records can be efficiently processed by regular trained staff on an overtime basis at an approximate cost of \$750.

Personnel:

One additional intermediate stenographer-clerk at a cost of \$2,988 is required to assist the two technical positions now authorized. The work load of this position will involve a considerable amount of record keeping and follow-up in addition to correspondence. Collection and tabulation of monthly vacancies, examination scheduling and merit award suggestion follow-up are examples of this work.

Nursing Services:

One assistant to director of nursing services (psychiatric technician) in the Sacramento office of the department is to function in the section of nursing services. This position is to assist with the evaluation of the nursing programs in the hospitals, interpret to the psychiatric technicians group the aims and policies of the department, act as liaison between the psychiatric technicians and nurses, act as representative of the technician group in assisting in the planning and carrying out of in-service training programs for psychiatric technicians, and cooperate with the staff of the department in implementing the total nursing program at a cost of \$5,772.

Deportation and Transfers:

Along with the increased work load in the deportation and transfer section resulting from the greater number of cases in the hospitals, there are a greater number of cases being submitted for investigation by other states. Since the load has increased beyond the capacity of the two persons assigned to maintain the daily correspondence required for completion of the number of investigations necessary to carry out the department's obligation, an additional intermediate stenographer-clerk is included at a cost of \$2,988.

Guardianships:

An additional intermediate account clerk is added for increased work load in the guardianship section. The case load has increased from 423 on July 1, 1948, to 1,150 cases by July 1, 1955. The increased work has been performed by parceling out essential accounting activity to other clerks whose own functions have increased so that they will no longer be able to perform the added accounting work.

Increased cost of authorized positions, \$15,117, and increased salary savings, \$349, account for the balance of change in salaries in 1955-56.

OPERATING EXPENSES: The increase of \$5,225 is due primarily to anticipated increases in the cost of travel because of current year position vacancies and new positions effective July 1, 1955.

EQUIPMENT: The amount of \$12,913 provides \$4,690 for replacement and \$8,223 for additional equipment.

The following are significant additional items: Office equipment for new positions, \$1,038; films for community services film library, \$3,000; film strip projector with films for personnel section, \$500; files for punch cards in statistics section, \$626.

DEPARTMENTAL ADMINISTRATION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1953-54	ESTIMATED 1954-55	PROPOSED 1955-56
		53-54 (Filled)	54-55 (Auth.)	55-56 (Auth.)			
1	BUREAU OF PATIENTS ACCOUNTS						
2	Analysis						
3	SALARIES AND WAGES: The increase of \$37,274 is as follows:						
4	New Positions:						
5	4 Agent I						\$18,960
6	1 Senior stenographer-clerk						3,456
7	2 Intermediate typist-clerk						5,832
8	The case load of the field offices located in San Francisco, Los Angeles, and Sacramento have been reviewed in terms of experience o						
9	the last six months of the 1953-54 Fiscal Year. The July 1, 1954, case load per agent in the San Francisco office was 216; i						
10	Los Angeles, 233; and in Sacramento, 286. The inclusion of one new agent position for the San Francisco office, two new agen						
11	positions for the Los Angeles office and one new agent position for the Sacramento office will provide an estimated case load pe						
12	agent, by June 30, 1956, as follows: in San Francisco, 316; in Los Angeles, 271; in Sacramento, 362.						
13	The field staff produced through the medium of cash collections, installment payment programs and charge increases, income totalin						
14	\$756,640. Average collection credit per agent positions now authorized amounts to \$84,071.						
15	One senior clerk is included to handle the functions necessary in the Los Angeles regional office. It is planned that this employee shal						
16	be responsible for preparing the deposit and depositing the cash collected through the office amounting to \$250,000 per year. Thi						
17	position will answer the majority of the semi-technical questions by telephone and personal calls pertaining to veteran procedures						
18	insurance, and guardianships as they pertain to the Welfare and Institutions Code, the Civil Code, and the Probate Code. Th						
19	position will be responsible for the maintenance of records pertaining to the agents, weekly performance reports, monthly cas						
20	flow records, agent records, and control of requisition supplies and equipment.						
21	One intermediate clerk is included for the San Francisco regional office for the purpose of preparing agent reports and acting as relie						
22	cashier and receptionist. In view of the case load carried by the agents, the allowance of one clerk for two agent positions i						
23	included for the regional offices.						
24	One intermediate typist-clerk for the central office legal section is included for the 1955-56 Fiscal Year. For the past several years, th						
25	preparation and filing of claims has been parcelled out to various members of the staff of the legal section with no one perso						
26	primarily responsible for all aspects of the operation. Because of the increased volume and the multitude of tasks essential to thi						
27	activity, it becomes necessary that one person be made responsible, and a claims desk within the legal section established. Claim						
28	filed for the 1953-54 Fiscal Year totaled \$324,177. Claims approved and/or paid totaled \$197,006. This case load of claim filin						
29	has been absorbed in the section at the expense of other important tasks. These tasks cannot, however, be postponed indefinitely						
30	without causing a substantial monetary loss to the General Fund.						
31	Increased cost of authorized positions, \$9,665, and increased salary savings amounting to \$964, account for the balance of change i						
32	salaries in 1955-56.						
33	OPERATING EXPENSES: The increase of \$7,650 is due to increases in the cost of office expense, printing, postage, travel, and						
34	rent; relating primarily to new positions effective July 1, 1955.						
35	EQUIPMENT: The amount of \$12,817 provides \$503 for replacement and \$12,314 for additional equipment. The following are						
36	significant additional items: office equipment for new positions, \$3,582; files for expansion of patients' accounts, \$1,176; calculator						
37	to be used in the accounts receivable section, \$670; four automobiles for new agent positions, \$4,800.						
38	SALARIES AND WAGES						
39	Patients Accounts:						
40	Manager	1	1	1	SALARY RANGE

36	GENERAL ANALYSIS				
37	Number of positions	78.1	76	79	3
38	As administrator of National Mental Health Act funds for California, the Department of Mental Hygiene is responsible for the allocation of such funds to other state and local agencies and seeing that required standards of service are met and maintained.				
39	The following schedules indicate the number of hours spent by professional employees in interviews with patients, (on either an individual or a group basis), and in preventive services to communities during the Fiscal Years 1953-54, 1954-55 (estimated), and 1955-56 (projected). The hours spent by patients in individual and group therapy are also shown. Of the professional time allocated to all services, 86 percent was directed toward treatment of clinic outpatients and 14 percent toward preventive work in the community, in the year 1953-54. It is estimated that these percentages will amount to 85 percent and 15 percent respectively in 1954-55 and 1955-56.				
40	The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g. in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between children and adults in the case load of patients (e.g. a child's case takes two to three times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g. 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); (5) other miscellaneous, extraneous factors.				
41	In conjunction with the rendering of these services, the Berkeley Clinic conducts an extensive training program for social workers, psychologists, and psychiatrists.				
42	^a Federal funds, neither receipts nor expenditures are included in the budget totals.				
43	^b Composed of savings in salaries and wages, \$19,676; operating expenses, \$20,776; equipment, \$639; and loss in reimbursements, \$15,150.				
44	^c Composed of savings in salaries and wages, \$57,691; and operating expenses, \$4,603.

SALARIES AND WAGES: The increase of \$26,817 is as follows: 2.4 additional positions at a cost of \$9,638 are to be financed from federal grant-in-aid funds and are for the purpose of carrying on a research project, "Comparison of Hospital and Clinic Treatment Costs." Increased cost of authorized positions, \$14,288; and decreased salary savings due to improved recruitment conditions, \$2,891, account for the balance of change in salaries in 1955-56.

OPERATING EXPENSES: The decrease of \$12,376 is due primarily to anticipated decreases in the cost of contracts with state and local agencies for mental health clinics and training.

EQUIPMENT: The amount of \$9,255 provides \$1,248 for replacement and \$8,007 for additional equipment. The following are significant additional items: dictating equipment for present positions where shortages exist, \$2,451; office equipment for new positions, \$527.

Outpatient (per interview) -----	14.07	14.68	15.47	0.79 (5.4%)

Analysis

Total expenditures for support in 1955-56 amount to \$1,083,246, an increase of \$55,719, or 5.4 percent over 1954-55. The average population remains unchanged in the 1955-56 Fiscal Year.

SALARIES AND WAGES: The increase of \$46,733 is as follows: Three new positions at a cost of \$23,196.

1 Assistant neuropathologist is proposed to assist in the neuropathological program at the Langley Porter Clinic and in the State Hospitals for the mentally ill and mentally deficient.

1 Psychiatrist II is required in the Adult Outpatient Department for increased work loads in administrative and teaching activities, as well as treatment of the more difficult cases which cannot be handled adequately by trainees.

1 Supervising psychiatric social worker I is required for supervision of the social work program in the Children's Division and the Adult Inpatient Service to strengthen the service, teaching and research program of the clinic.

The increased cost of authorized positions, \$26,258, and increased salary savings, \$2,721, account for the balance of change in salaries in 1955-56.

OPERATING EXPENSES: The small decrease of \$90 is due to miscellaneous adjustments to continue the authorized program into the budget year.

EQUIPMENT: The amount of \$22,829 provides \$11,338 for replacement and \$11,491 for additional equipment. The replacement equipment amounts to 4.9 percent of the equipment investment on June 30, 1954. The following are significant additional items: office equipment for new positions, \$537; calculator for the business office, \$670; electrically heated food carts for patients' dining room, \$1,545; dictating equipment for present and new personnel, \$1,053; research equipment for the electroencephalographic department, \$2,634; books for medical library, \$800.

REIMBURSEMENTS: A total of \$11,340, consisting of services to employees, is estimated for the 1955-56 Fiscal Year.

^a Composed of savings in salaries and wages, \$3,547; operating expenses, \$19,821; equipment, \$4,810; and excess reimbursements, \$66.

^b Composed of savings in salaries and wages, \$6,925; and operating expenses, \$1,080.

^c Represents average count Monday through Friday and excludes week-end visits. Practically all active treatment and therapy is given during these five days. The feeding allotment is based upon the seven day average for approximately 10 percent less inpatient than shown above.

^d Represents total number of interviews by the professional staff.

^e Costs have been allocated between inpatient and outpatient departments on the basis of estimated time distribution of all employee and a proportioned allocation of other expenses.

GENERAL ANALYSIS

Number of positions----- 1.8 1.8 5.3 3.5

SALARIES AND WAGES: The Neuropsychiatric Institute at Los Angeles is to operate in conjunction with the University of California at Los Angeles similar to the method of operating the Langley Porter Clinic in conjunction with the University of California on the campus of the Medical School in San Francisco. Continuation is provided in the budget for three-fourths time salary for the medical superintendent and a senior stenographer-clerk in order that the superintendent may consult with the architects and the department with regard to the plans for the Neuropsychiatric Institute, which is to be built as a portion of the Medical School of the University of California at Los Angeles.

The additional four positions are to permit the establishment of a small initial unit for training and research. This unit will be housed in temporary quarters assigned by the University of California, pending the construction of the permanent facility. The small initial unit will be augmented by arrangements with the Department of Psychiatry of the Medical School to furnish some professional personnel and it is contemplated that professional people in private practice will assist in operating this small unit. The establishment of the unit for training is urgently required for the reason that the Medical School is in full operation and the training of medical students in psychiatry must be provided for. The unit will also permit gaining experience in the operation of a training and research unit in conjunction with the Medical School and will provide opportunity for training psychiatrists for the state hospital system.

The budget year cost of the four proposed new positions will be \$15,348. Increased cost of authorized positions, \$679, and increased salary savings, \$301, account for the balance of change in salaries in 1955-56.

OPERATING EXPENSES: The increase of \$8,500 is due to activation of the initial training and research unit.

EQUIPMENT: The amount of \$9,328 provides additional office equipment for the two present positions, the proposed four new positions as well as for volunteer and donated position time from the U. C. L. A. Medical School.

(12.5%)

Analysis

Total expenditures for support in 1955-56 amount to \$5,973,811, an increase of \$560,120, or 10.3 percent over 1954-55. The average population for 1955-56 is 1.9 percent less than the estimate for 1954-55.

SALARIES AND WAGES: The increase of \$547,247 is accounted for as follows: 213.6 new positions at a cost of \$587,622 are explained under "State Hospitals for Mentally Ill and Mentally Deficient" following the departmental summary. The increased cost of authorized positions, \$74,877, and increased salary savings reflecting the time required to recruit the proposed new positions, \$115,252, account for the balance of change in salaries in 1955-56.

OPERATING EXPENSES: The decrease of \$8,695 is due primarily to adjustments in feeding cost relating to a decrease in the estimated population for 1955-56

EQUIPMENT: The amount of \$75,586 provides \$42,695 for replacement and \$32,891 for additional equipment. The replacement equipment amounts to 2.2 percent of the equipment investment on June 30, 1954. The following are significant additional items: office equipment for new positions, \$3,848; vegetable cutter and slicer for annex kitchen, \$675; steam cookers for main kitchen, \$2,660; tray carts for ward feeding, \$1,200; bedside stands for wards, \$1,650; books for medical library, \$1,000; 1-ton pickup truck for maintenance crews, \$975; spray rig for orchards, \$4,100.

REIMBURSEMENTS: A total of \$85,312, consisting of services to employees, sale of surplus products and miscellaneous is estimated for the 1955-56 Fiscal Year.
